Archaeological summary for the parish of Chaddesley Corbett

This document contains your Historic Environment Record search. The following pages will provide an archaeological summary of the buildings and monuments within your parish. This is followed by an overview of our service alongside an explanation of the documentation included and guidance on its use. The appendix to this document includes the historic and modern mapping for your parish, the record lists and the full records providing detailed information.

An historic environment record search was completed on 15th February 2020 to provide an evidence base for the Chaddesley Corbett Neighbourhood Development Plan (NDP) Important Spaces Working Group. The search focused on the area of land within the modern-day parish boundary of Chaddesley Corbett. A total of 407 monuments were recorded within the search area, including 2 Historic England Scheduled Monuments.

The Parish of Chaddesley Corbett is set within an intermediate, gently undulating landscape, bordered by higher ground to the North and East and falling to lower elevations in the South and West into the low-lying ground of the Stour Valley. The parish shares a boundary with 8 neighbouring parishes and is within 5km of both urban centres of Bromsgrove and Kidderminster. Chaddesley Corbett is based on a geological bedrock of Wildmoor and Bromsgrove Sandstone in the North and West of the parish changing to Mudstone in the southeast. Superficial deposits of Alluvium parallel the Hockley Brook which cuts through the south of the parish, and the Fenn/Beln/ Hoo Brook in the north. Holt Heath Sand & Gravel, Worcester Terrace and Glaciofluvial superficial geological deposits are also recorded within the parish. The geology is reflected in a soil profile of mainly free draining, acidic soils in the north and west of the parish, changing to clayey, acidic loamy soils in the south and east.

The ancient, semi-natural woodland of Chaddesley Woods is located in the east of the parish. Stream-side trees and mature hedgerows provide the remainder of tree cover throughout the parish. The gradual decrease in elevation throughout the landscape from northeast to southwest provides wide, open views towards the south where not contained by high hedgerow banks along roadsides. In Chaddesley Corbett village viewsheds are further enclosed by buildings situated immediately at the roadside, whilst greenspaces to the south of the village provide an open feel at the villages main entrance from the A448. The village of Harvington hold a slightly wider street scene resulting from the A450 passing through the settlement however wider views are restricted by topography and a combination of tree lines and high brick walls.

A mixed farming practice within the parish has resulted in a historic landscape character of parliamentary and piecemeal enclosure which has suffered considerable boundary loss producing a dominant character of field amalgamation comprised of medium to large scale irregular shaped fields. Small areas of meadow and rough pasture are also present in the parish and there is also parkland belonging to Brockencote in the South and Sion in the North. To the south of the parish a similar historic landscape character stretches out

towards Droitwich, whilst to the east, woodland and parliamentary enclosure balances out the modern field amalgamation character. To the north of the parish, small to medium parliamentary enclosure and parcels of woodland are frequent, changing to the urban, modern expansion of Kidderminster in the East.

195 historic buildings were identified within the parish of Chaddesley Corbett. Of these, 67 have been designated as Listed Buildings by Historic England. The structures are evenly distributed across the parish, with a stronger presence (Listed and Unlisted) at the village of Chaddesley Corbett and to a lesser degree, Harvington with Harvington Hall. The earliest structures in the parish include the Listed, Medieval St Cassian's Church & Cross in Chaddesley Corbett village, Harvington Hall and two 15th century timber-framed dwellings.

Several, dispersed farmsteads across the parish contain structures dating to the 16th and 17th century. At Harvington, barns, stables, a malt house and garden features are dated to the 17th century as well as farm buildings and houses within the village, whilst a larger amount of farm buildings and dwellings are also recorded in Chaddesley Corbett village in addition to an Inn and Malt House. Several Listed structures are recorded within Chaddesley Corbett village dating to the 18th and 19th centuries, including a Post Office, School House, public house and memorial tombs in St Cassian's churchyard. A mill in the north of the parish and several additional farm buildings, including dwellings in the villages of Drayton and Harvington, are also Listed structures of a similar date. A priest house and chapel at Harvington Hall are also recorded.

The remaining unlisted, 18th-19th Century historic buildings that are identified also include a high proportion of farm dwellings and barns dispersed throughout the parish. Additional school buildings, a police house, several cottages and a bridge are recorded in Chaddesley Corbett village, with further dwellings at Drayton, Hill Pool, Bluntington, Harvington and Cakebole Lane including structures related to Blackmsiths workshops and water mills. Only a small number of 20th century buildings are recorded; Brockencote Hall rebuilt in the 20th century after a fire, anti-tank cylinders and a war memorial at St Cassians and three post boxes throughout the parish.

A Historic England funded, Worcestershire Farmstead and Landscapes Project identified 48 traditional farmsteads within the Parish. These farmsteads, which were mapped from early 20th century Ordnance Survey maps, are generally dispersed across the parish and are found to be an even mix of isolated farmsteads, farmsteads within loose clusters and farmsteads associated with villages or hamlets. They vary in date with 15th, 16th and 17th century farmsteads recorded although principally are 19th century structures and the majority survive into the modern period although with significant alteration (more than 50% loss of buildings) and the addition of large modern sheds. 10 field barn/ outfarms are also recorded within the parish in the early 20th century however only half of these remain. Across the county 'field barns' are subject to high rates of loss and are becoming increasing rare (approximately 72% of out farms and fields barns have been lost in Worcestershire since the turn of the 20th century).

The Historic Buildings of Worcestershire project funded by Historic England has also identified a total of 397 buildings present on the 1st edition OS Map that are still extant on modern mapping today. Although these buildings are not all recorded on the HER, a map of their location points has also been provided. Please note that for many parishes

these points have not yet been verified on the ground and it is highly possible that buildings have been demolished and replaced by a modern building with a similar footprint.

Chaddesley Corbett village is a nucleated row settlement with closely associated interrupted row settlement; spread south along Fox Lane, Dobes Lane and Cakebole, North along The Holloway and West into Brokencote. The main section of the village itself has seen little form change between the 1839 Tithe and Modern Mapping, focused along the main road through its centre. The houses principally date to the 17th and 18th century suggesting the form of the village was developed early and has not changed. Several new buildings were added opposite the church in the 19th century including a police house, school house and farm buildings beyond the main street, replacing earlier buildings visible on a 1745 estate map of the Throckmorton Estate in Chaddesley Corbett. During this period, new farm buildings and dwellings also appear at the interrupted row settlements to the south and west of the village including a steam mill at Cakebole Lane, suggesting a prospering agricultural community. There is little further change until the modern period when housing was added in the middle of the 20th century behind the main street along Hemming Way, and more recently, replacing the primary school with houses along St Cassian's Way. A large area of housing was also added to the north of the village on Briar Hill in the 1950s which has begun to draw the village and its outliers together. To a lesser degree, building to the south along Fox Lane and at Brokencote at the same time has also expanded the settlement.

Houses within the village are originally small, located immediately on the street front, without front gardens and providing an enclosed, compact scale to the main street of the village. Several houses have however been rationalised into fewer, larger homes in the 20th century. Towards the south of the main village, a more varied mix of building dates and architectural styles is present, including larger structures and in some cases, a roadside placement which is further set back allowing for small front gardens. Gardens to the rear are mainly long and narrow however there has been loss of garden length in the north of the village with the development of Hemming Way to the back of the main road properties. Buildings along Hemming Way are also a varied mix although generally are large detached or semidetached dwellings in large plots, in contrast to the recent St Cassians Way development which are defined by much smaller plots. The Briar Hill development to the north of the village, comprising semi-detached and terraced council housing, all benefit from large plots with front gardens bounded by hedgerows and facing onto a large green space.

The nucleated row settlements of Bluntington and Woodrow located just to the north of Chaddesley Corbett village retain a small number of historic buildings previously associated with Bluntington Common, however following enclosure and a series of 20th and 21st century development the settlements have become more linear in nature, linking along Woodrow Lane.

The village of Harvington is also a nucleated row settlement, linear in nature focused along what now is the A450 which links further interrupted row settlement to the north. A detached area to the east of the main village encompasses the historic buildings at Harvington Hall. Principally comprising buildings dating to the 16th and 18th century within the village and 16th-19th century at Harvington Hall, analysis of the 20th Century Ordnance

survey maps shows little change until the development of Park Lane and Morton Road in the 1950s which coincided with further, sporadic housing along the A450 to the north.

To the south of Harvington, Winterfold House and Farm appear to have undergone little change since the early 19th century when they were built, replacing the cottages visible on the 1745 estate map, aside from some enlarging of buildings and the creation of an extra structure to the south during the 21st century.

The settlements of Hill Pool and Drayton in the northeast of the parish appear on the 1745 estate maps, focused at a tangle of narrow lanes approaching a crossing of a tributary of the River Stour. Comparison of historic maps suggests there was an increase in buildings in both settlements in the late 18th/ early 19th century, including mill works and associated buildings. Drayton saw additional houses added to the southwest of the village in the 1970s and the creation of Drayton Grove in the early 2000s.

The remainder of Post-Medieval and earlier settlement currently recorded within the HER is mainly dispersed throughout the parish in isolated farmsteads and small farmstead clusters/ hamlets. Modern expansion of these settlements have created a string of interrupted row settlements along main routeways, but with a dispersed nature which retains the rural nature of the parish.

The appearance of vernacular design in the village of Chaddesley Corbett and across the wider parish is principally 17th and 18th century timber framed with red brick infill, often painted white although some pebble dashing, and plain red brick is present. Tile roofs with dormer windows and fenestration characterised by short, but wide windows, some formed as bay-windows. A varied mix of architectural styles are also found amongst the timber framed dwellings in Chaddesley Corbett Village, including Victorian villa, Georgian buildings, and one structure, Tudor House an 18th century mix of classical pediment, venetian fenestration and ogee headed gables.

In addition to the built environment, 223 monument site records were identified within the parish of Chaddesley Corbett. The earliest records are related to geological deposits in the parish which have the potential for Palaeolithic archaeology dating back to 190,000 years ago, as identified through a Historic England funded project. The Prehistoric period is further represented in the archaeological record by the Bronze Age barrow at Barrow Hill and fieldname evidence for the possible location of further barrows. A small number of cropmark enclosures are also present. Romano-British activity is however only evident in the parish in the form of a possible pit feature dated to the period, and the postulated route of the Roman Road from Droitwich to Greensforge.

The Medieval period is better represented in the parish. 21 records indicate the survival of earthworks of medieval ridge and furrow throughout Chaddesley Corbett, and 11 records describe the known or conjectured sites of documented Medieval Settlements. The site of several fishponds, moated sites and osier beds further indicated medieval settlement activity. A field to the west of St Cassians has been conjectured to contain the remains of a Medieval settlement however this could more likely be the location of water meadow earthworks. Fishponds and channels present in the field to the south of St Cassians are also well preserved and have been deemed to be nationally important, of an equivalence with Scheduled Monuments and therefore should be treated as such.

A Medieval deerpark is also documented at Chaddesley Corbett and its extent has been conjectured from the 1745 estate map although the physical earthworks of a park pale are not recorded. Several historic roads are also dated to the Medieval period, including a small number of hollow ways which may also date to the Post-Medieval.

For the Post-Medieval period, records indicate the site and locations of several outfarm/ field barns which have now been demolished as well as other dwellings, a mission hall and a workhouse. There are also numerous records for the sites of watermills, forges and works, principally along the Fenn/Beln Brook in the north of the parish. Associated mill pools and other water management features are also recorded. Fieldname evidence indicates the location of several brick kilns. Gravel pits, clay pits, sand pits, coal pits and quarries indicate further extractive and industrial activities. Several areas of Post-Medieval park land are recorded throughout the parish; a deer park at Winterfold, parkland at Monks, a garden at Harvington Hall and parks at Brockencote and Sion House.

A small number of 20th Century records are also identified within the parish, principally features related to the defence of Worcestershire during the Second World War including an air field and Women's Land Army hostel located west of Harvington, and a RAF stores depot just over the parish boundary southwest of Cakebole.

2 Historic England designated Scheduled Monuments are recorded within the parish of Chaddesley Corbett; Harvington Hall Moated site and Barrow Hill. No Registered Gardens or Registered battlefields are recorded within the parish. The relative lack of late 20th century development in the parish has contributed to an absence of evidence in some areas where locally, regionally or nationally important archaeological remains may still be buried. Designated assets are sites, monuments and buildings which are perceived to be of national significance, they are comprehensively protected in legislation. Other assets perceived to be of regional or local significance do not have the same level of protection in national legislation but can be given greater weight through the mechanisms of Neighbourhood Planning.

The historic landscape character and monument record demonstrates that the northern area of the parish has evolved in relation to the management of the Fenn/ Beln brook, its use for industry and the road communication dictated by its crossings. The lower half of the parish has also been affected by the management of the Hockley Brook, however here there is an earlier focus with fishponds and osiers beds related to settlement and the estates and parkland of the wealthy. The mixed geological makeup of the parish has also produced a varied record of extractive activities, although not on a modern scale.

The A448 from Bromsgrove to Kidderminster is the main route by which most visitors experience the parish, moving Southeast to West across the bottom half of the parish. In the east the wooded character is prominent, changing to a more open sense of space in the western part of parish. There is however the sense of settlement being enclosed, meaning that significant views are present along this routeway including the view of St Cassian's Church across open space at the bend of the A448 when heading towards Kidderminster, and the view across earthworks beside the Hockley Brook, south and west of the church, when heading towards Bromsgrove.

Many of the remaining roads in the parish, a combination of pre and post enclosure routes and including the A450, move across the parish from Southwest to North, meeting the main road from Belbroughton to Blakedown just over the parish border. The dispersed nature of much of the settlement throughout the parish has resulted in rural feel that should be preserved in any future development, avoiding block development and retaining tall hedgerows for screening.

In conclusion the historic environment record for the Parish of Chaddesley Corbett contains a number of assets which are both characteristic and integral to the landscape and built infrastructure of the parish. Opportunities to preserve and enhance the inherent character of linear settlement, vernacular styles and rural aspect should be considered a priority, as should the preservation of medieval and post-medieval earthworks associated with parkland, settlement and fishponds in and around present day settlement. It is recommended that any re-development of traditional farmsteads should be informed by the Worcestershire Farmsteads Assessment Framework.

Your Place Matters

All rural places and buildings are a reflection of how people have lived, worked, thought and related to each other throughout history. Rural settlement – the villages, hamlets, farmsteads and houses that we call home – is at the core of our everyday lives, connecting us to each other, and to our shared sense of history, and providing a base from which we view and enjoy the wider landscape. Understanding the series of changes, throughout time, that has created a place, can inspire and guide future change as well as opportunities presented by the natural and historic environment. Your Place Matters: Community Planning for the Future of Rural Buildings in their Setting and Your Place Matters: Understanding Buildings in their Setting in Rural Worcestershire have been designed by Worcestershire Archive and Archaeology Service, in collaboration with Historic England, to help community groups (including those involved in Neighbourhood Planning), non-heritage professionals and researchers to identify and then champion the distinctive characteristics of an area, focusing on how all buildings of different dates are sited and experienced within the landscape. It will also be of interest to anyone who wishes to learn more about their local area.

This guidance is available online here:
http://www.worcestershire.gov.uk/Yourplacematters and as an appendix to this HER search report.

* Please note an absence of archaeological records in a particular area should not necessarily be interpreted as an absence of archaeology or heritage, surviving archaeology/heritage may have not been identified in the HER for a number of reasons. Please inform the HER if you feel records are missing for important heritage assets in the search area.

Information about the data sent to you

The Worcestershire **Historic Environment Record** (HER) is the largest collection of archaeological information in the County with details of over 45,000 sites, buildings, finds, and landscapes alongside information on past archaeological research and investigations. These records hold information on a vast and diverse array of archaeological remains, from Iron Age Hillforts to Second World War pillboxes. The HER is held in a database linked to a Geographical Information System (GIS), a computer mapping system designed to allow users to collect, manage and analyse large volumes of spatially referenced data. When you request information from us we carry out a search around a grid reference or criteria supplied by you, withdrawing all the records within that area from the database and allowing us to produce reports and mapping which fulfil your requirements. Our standard search radius is 500m from your specified location; however, we are able to undertake searches of more defined extents if requested. We are also able to provide information for records of particular types or dates such as a search for Neolithic enclosures.

The Historic Environment Record can be an ideal starting point if you are interested in researching your local area or a particular period of Worcestershire's past. While we can provide reports in digital format or by post, we encourage you to visit us in person to examine the large quantities of additional information stored in our offices, including banks of filing cabinets with detailed information on thousands of sites, and hundreds of aerial photographs covering large swathes of the county. In addition, the service has a reference library with general and specialist texts on British archaeology alongside an online collection of archaeological reports regarding Worcestershire's heritage accessible at www.worcestershire.gov.uk/archaeology/library. Finally, many of the archaeologists working at our offices are very knowledgeable about particular places, or are specialists in certain subjects or periods and are keen to help independent researchers.

The potential value of our records to your research may not however be restricted to an initial assessment of a particular area. We believe an appreciation of the historic form of landscapes is vital to understanding the people that occupied them; allowing us to contextualise and therefore improve our understanding of past activity. Our records and historic mapping can be used to understand these historic environments providing either fresh perspectives upon people and places identified through documentary research, or reconstructing historic landscapes to be populated through further research. We therefore strongly recommend consulting our archive service if you have not already done so on.

If you require additional information or assistance we encourage you to contact or visit us at The Hive. Many of our records are also now available online with the Heritage Gateway at www.heritagegateway.org.uk.

Parish Searches for Neighbourhood Plans

This search has been prepared especially for use in putting together a neighbourhood plan. Worcestershire's Parishes all contain a substantial amount of historic environment data and we understand it can be difficult to digest. The archaeological summary provided attempts to highlight significant archaeological features of your parish, by period. However, it is important to remember that the Neighbourhood plan should be focused on identifying the undesignated heritage in the parish that is *important to the people who live there*.

Guidance on how to consider the historic environment within a neighbourhood plan can be found in the "Knowing Your Place" guidance produced by English Heritage (now Historic England)
https://content.historicengland.org.uk/images-books/publications/knowing-your-place/knowing-your-place12.pdf/ and through the Historic England Neighbourhood Planning website:
https://historicengland.org.uk/advice/hpg/historic-environment/neighbourhoodplanning/

If you require any clarification about any of the data provided please do not hesitate to get back in touch.

Guidelines for Access

The **HER** began life as a sites and monuments record in 1968 and contained the minimum level of data. Since then the records have been added to and enhanced over the years as more information has come to light. The records, therefore, vary greatly in their detail and accuracy. We are constantly updating and improving these records, however, they are compiled from a range of sources of varying quality and the information they contain should not be seen as definitive. We cannot accept responsibility for the accuracy of any information supplied and the user must accept that information may be outdated or inaccurate.

The sources referenced in the reports should be consulted in order to fully understand the nature of the archaeology in your search area. While the majority of these reports can now be accessed online at https://archaeologydataservice.ac.uk/archives/view/greylit/ other sources may need to be consulted at the HER offices, and we recommend that you come visit the HER office once you have received your search results to consult all the sources mentioned along with other more general information that we hold.

The modern rural and urban environment is the product of millennia of change and development, producing dynamic landscapes of distinct historical character. **Historic Landscape Characterisation** (HLC) aims to holistically identify and map these character areas through examination of their current and preceding forms, facilitating a deeper understanding and appreciation of a landscape's evolution through time, and contextualising archaeological features within their contemporary landscape settings. Combining HLC and HER data can therefore provide a valuable tool for the research into many archaeological features and landscapes.

If your site is within, or close to, one of the 'Central Marches Historic Towns', you should consult the CMHTS report for that town. These can be found at https://archaeologydataservice.ac.uk/archives/view/marches_eus_2005/ and relate to the following towns: Alvechurch, Bewdley & Wribbenhall, Broadway, Bromsgrove, Clifton-Upon-Teme, Droitwich, Evesham & Bengeworth, Kidderminster, Pershore, Redditch, Stourport-on-Severn, Tenbury Wells and Upton-Upon-Severn.

If your search area includes a Historic Farmstead or Outfarm, as identified by English Heritage's 'Historic Farmsteads Project', you should consult the current project publications, including the County summary, online at http://www.historicengland.org.uk/images-books/publications/wm-county-summaries/

Diversity and Disability

Worcestershire County Council is committed to offering equal access to its services to all members of the community. We recognise that some of our customers will have particular communication needs, and we endeavor to provide services befitting to their individual requirements. This document can be made available in alternative formats (large print, audio tape, computer disk, and Braille) and in other languages (including British Sign Language) on request from the Corporate Equality and Diversity Team, County Hall, Spetchley Road, Worcester, WR5 2NP, telephone 01905 766 938, email E&D@worcestershire.gov.uk. We also have staff trained in providing effective and appropriate face-to-face services to the deaf, deafblind, deafened, hard of hearing or speech-impaired customers; those with learning disabilities; and customers who need help communicating in English.

General Data Protection Regulations (GDPR)

The following information as it relates to the Historic Environment Record is part of the full Archive and Archaeology service privacy notice which can be found online: http://www.worcestershire.gov.uk/info/20569/how_we_use_your_information/1915/archives_and_archaeology_privacy_notice

Purpose for processing

Personal information is processed to provide, manage and administer the Archives and Archaeology services either directly or jointly with partners and commissioned private and third sector providers. This includes the provision of:

- The records search facility for individuals in the Archive catalogue, Archaeological Library, Historic Environment Record and a range of individual databases on-site and on-line.
- Advice to help enrich research through access to our resources. The Archives and Archaeology service offers support to planners, landowners, developers, consultants, schools and universities, local groups and members of the general public.

Personal information collected and lawful basis

The Historic Environment Record, as part of the Archives and Archaeology Service, processes personal information which is relevant to individual cases which may include, but is not limited to, the following personal data:

- Personal details – e.g. name/age/address
- Contact information – e.g. telephone numbers/email address
- Other relevant information needed to provide the service required by the user.

The legal bases for processing this personal information are:

- Consent where personal information is given to access the collections and information e.g. the Historic Environment Record.
- Contract where for example you engage the services of the Archive and Archaeology service for a project, or work with the Archive and Archaeology Service on a project.

Who we may share your information with

We may need to share the personal information you have given to us or we have collected about you with partner organisations where relevant to the individual and/or their use of the service provision. A list of these organisations can be found in the Archive and Archaeology Service Privacy Notice which is online:

Information will only ever be shared when it is strictly necessary to help us provide effective services and you may have the right to refuse. We will not pass it onto any other parties unless required to do so by law or in all reasonable circumstances the disclosure is fair and warranted for the purposes of processing or subject to a data protection exemption. We have specific data sharing agreements in place with local agencies and sometimes the law requires that we may have to pass your details on to a third party, for example, to prevent crime.

How long we will hold your information

The standard record retention for HER search requests as a result of planning is five years. However, there are also a range of other retention periods affecting different types of information and service needs. These range from 10 years to permanently depending on the type of information and service. More information on our retention periods can be found summary Disposal Schedule

Please note stated retention periods may be subject to any legal holds imposed under the Inquiries Act 2005 that may concern the information and override standard retention periods.

Your information rights

You are entitled to a copy, or a description, of the personal data we hold that relates to you, subject to lawful restrictions. Please go to our Make a Data Protection Request webpage to find out how to make a request.

You may be entitled to rectification, restriction, objection, and erasure of your personal information depending on the service and legal basis. Please in the first instance contact Victoria Bryant, Worcestershire Archive and Archaeology Service Manager, at VBryant@Worcestershire.gov.uk or on 01905 845506 to exercise these Information Rights or call the main Worcestershire County Council contact telephone number of 01905 765765.

Copyright

The sources referenced in the HER records may require permission from the copyright holder for reproduction. The copyright holder is usually a third party, not the HER. In these instances, the onus is on you to obtain permission for reproduction from the relevant person(s). The HER accepts no responsibility for any user making unauthorized copies of such documents. In some instances the HER has been granted permission by the copyright holder to give out a copy of a source for reference only. In these instances, you must not copy, pass on or publish that source without permission from the copyright holder.

All reports that are produced via the development control process are considered to be within the public domain. However, copyright restrictions (particularly with regard to Ordnance Survey mapping) or the inclusion of confidential or commercially sensitive information means that not all reports can be made freely available over the internet. Other reports have been excluded by request of the copyright holder. The metadata for reports that cannot be accessed online has been included, but you must visit either our offices or Worcester City to view these reports.

If Ordnance Survey maps are included in this report, then they are for reference only and require copyright permission from The Ordnance Survey for any reproduction.

Planning

National Planning Policy Framework (NPPF) was published in 2012 and revised in 2018. It sets out the Government's planning policies, including those on the conservation of the historic environment. It replaces Planning Policy Statement 5: Planning for the Historic Environment (PPS5), which was published in 2010.

If your search is in advance of a planning application, you may be required to describe the significance of any heritage assets affected, including the contribution made by their setting, in accordance Paragraph 189 of NPPF and the Local Authority's Local Plan. The Archaeological Summary below and the sources mentioned in the HER records should be taken into consideration when detailing the significance of the heritage assets. The Archaeological Summary does not consider the effects of any specific development on the historic environment; it lays out the archaeological survival, significance and potential.

The statement submitted with a planning application would also need to consider the effects of your proposed development on the historic environment.

Frequently Asked Questions

Where is the HER located and when are you open?
We can be found on floor 2 of The Hive, Sawmill Walk, The Butts, Worcester, WR1 3PD

We are available via phone or email Monday to Friday between 10am and 4pm. The Hive is open from 8:30am to 10pm seven days a week with many of our resources accessible via self-service during these hours.

Monday	Closed	Thursday	Closed
Tuesday	13:00 – 16:00	Friday	Closed
Wednesday	13:00 – 16:00		

Can you provide a physical copy of this document and/or the sources mentioned within?
Yes, but only within The Hive and this will incur a small printing cost.

Can you provide information for Worcester City?
Archaeological records for the City of Worcester are held by the Worcester City Historic Environment Record. They are contactable on 01905 721 132 or by email at archaeology@worcester.gov.uk. In some instances we can answer simple queries on sites within the city, but if you wish for detailed information you will need to contact the city HER. We can book appointments for you with the City HER officer on Tuesdays in The Hive.

What happens if my search area crosses county boundaries?
While we occasionally hold records which cross county boundaries, you will need to contact the HER for the relevant county and request a separate search. The contact details for our surrounding counties can be found on Heritage Gateway:

https://www.heritagegateway.org.uk/gateway/chr/default.aspx

The HER Data and Documentation

This document contains two types of report:

The Single Line or Short Report – this provides the basic information: the WSM Number, the Name/Title of the Record, the monument type, the date range and finally the National Grid Reference (the WSM number is the unique number given to each record within the HER).

The Full Report – this provides the above information **plus** a more detailed description of the monument/site/find/fieldwork etc. It also contains the sources and references that the record is based upon and gives its relationship (if any) to other associated sites. A 'full' report is not definitive and all sources mentioned should be consulted to gain a full understanding of the record. Each source has a unique SWR number which can be used to locate it within our offices.

Modern Maps with HER Records

The maps will show the location of all the sites in the report, labelled with the WSM number. **Please note:** The labels only give the approximate location of the sites and monuments. The reason for this is that if there is more than one record for a location or there are lots of sites in close proximity – i.e. on a street of historic houses – then the labels overlie each other and cannot be read. We, therefore, move or adjust the labels very slightly to make them easier to see. To get the precise location you must use the grid reference. The HER is set up with a number of themes or layers. Each theme contains a different type of record e.g. Historic Buildings or Excavations. This allows us to switch the various themes on and off to look at different types of record separately. The various themes are colour coded to make them easily identifiable and can be seen within the legend of each map.

Historic Maps

A 1st or 2nd Edition Ordnance Survey map will be supplied with the search based on our own original copies. Where this is not available we will supply a 1st Epoch or 2nd Epoch Landmark Digital map based on 1st Edition/2nd Edition OS Map. These are drawn from several maps and are referred to as Epochs not Editions. It is important to note that Copyright restrictions mean that they must ***not*** be used in any report and are for research purposes only. The 1745 estate map of Throckmorton Estate in Chaddesley Corbett can be found online at: https://gis.worcestershire.gov.uk/website/tithesmapping/

GIS Shape Files

If you have access to a GIS system we can provide site location data as ESRI shapefiles for your own use as an alternative to the aforementioned mapping. This is the best way of sending and receiving complex spatial information. In built up areas where there are a large number of records, the data will be sent out in several files. We will provide site location data as individually themed shape files for each type of record.

Glossary of commonly used terms

AS: The unique number given to each aerial photograph referenced in the HER

Cropmarks: The visible effect of arable crops caused by the presence of below ground historic environment features

HER: Historic Environment Record

HWCM (Herefordshire and Worcestershire County Monument): Unique number given to each HER Record during the period Herefordshire and Worcestershire had a joint County Council. Superseded by WSM.

Monument: an archaeological site either showing as visible remains on the ground or a below ground site revealed by, for example, aerial photography or geophysical survey

National Planning Policy Framework (NPPF): The full statement of the Government's planning policies, including those on the conservation of the historic environment. It replaces Planning Policy Statement 5: Planning for the Historic Environment (PPS5).

Palaeochannels: ancient silted up river channels, or other watercourses that are often associated with well-preserved organic remains and historic environment features

Palaeo-environmental: Organic remains associated with past landscapes. Such deposits can reveal information about climate, the types of fauna and flora in a landscape and past human activity

Ridge and furrow: large-scale earthworks associated with former medieval and post-medieval open-field communal farming that appear as a distinctive corrugated surface

SWR: The unique number given to each report, document, map etc

WCC: Worcestershire County Council

WSM (Worcestershire Sites and Monuments): The unique number given to each monument, building and archaeological event recorded in the HER.

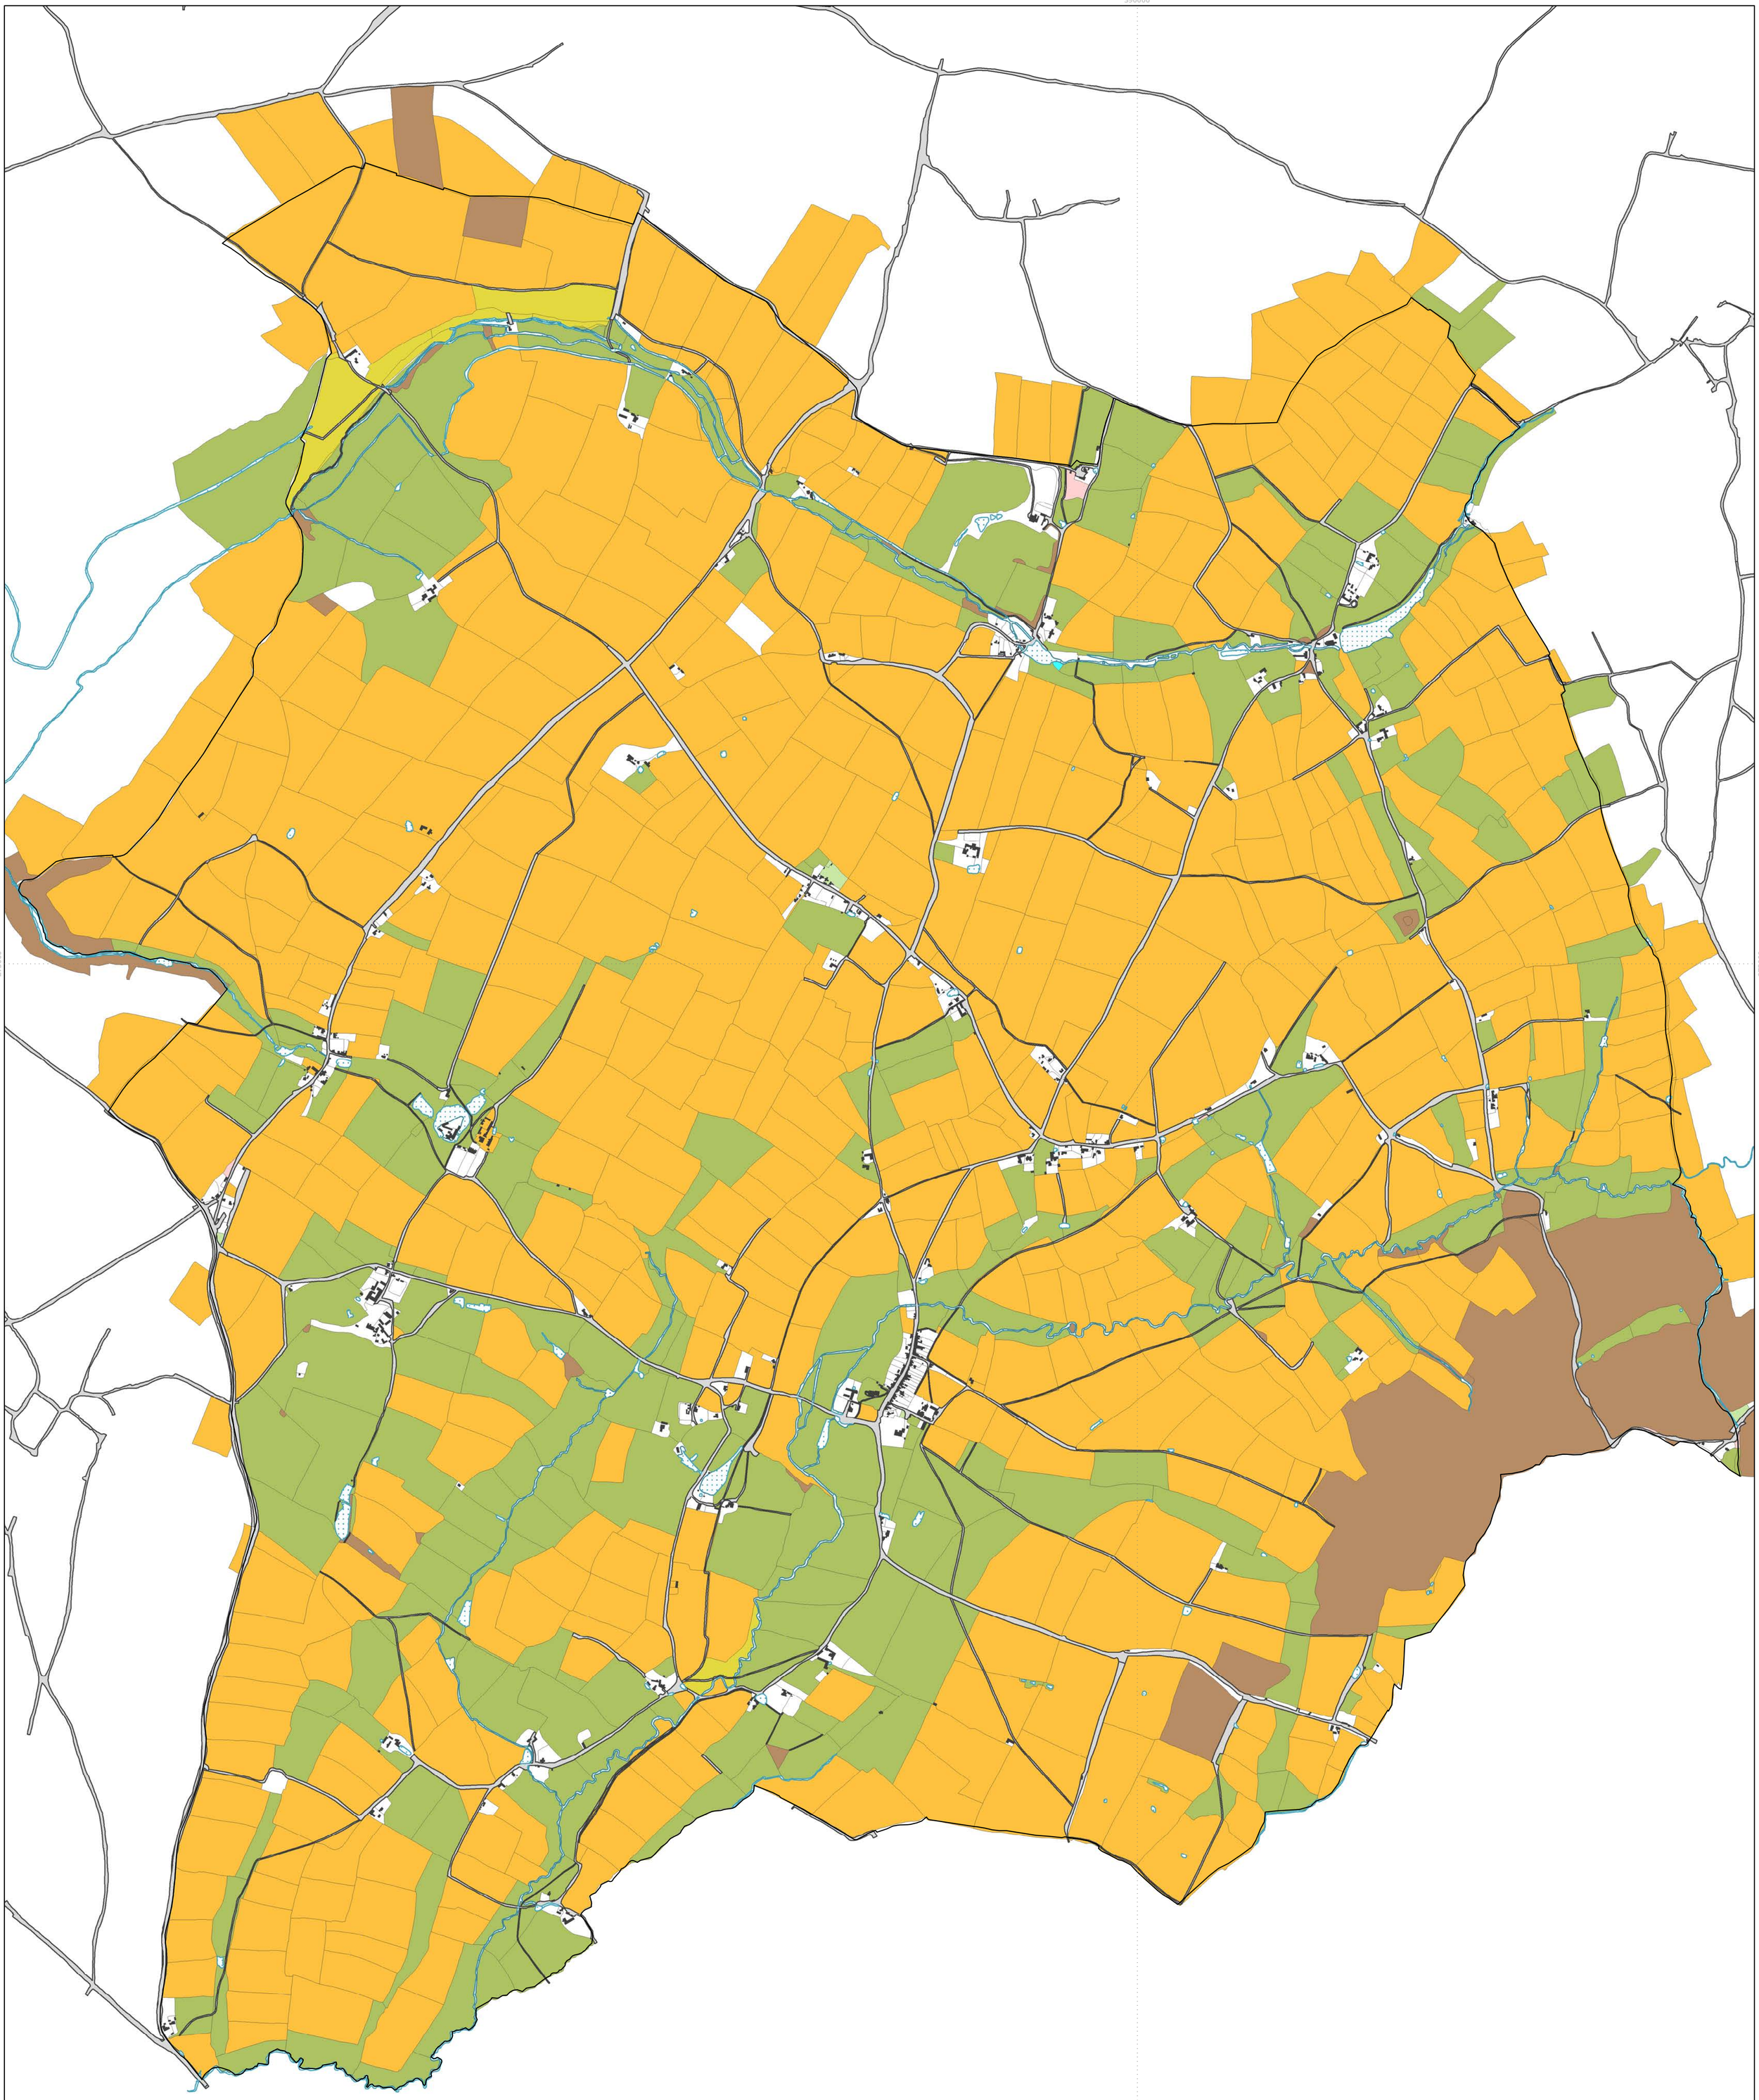

General periods in the HER

The beginning and end of certain periods is a contentious issue. In the HER, the following dates are used. This is a standard convention across all HERs.

Palaeolithic	-500000BC	to	-10001BC
Mesolithic	-10000BC	to	-4001BC
Neolithic	-4000BC	to	-2351BC
Bronze Age	-2350BC	to	-801BC
Iron Age	-800BC	to	42AD
Romano-British	43AD	to	409AD
Post-Roman (Early medieval)	410AD	to	1065AD
Medieval	1066AD	to	1539AD
Post- Medieval	1540AD	to	1900AD
Modern	1901AD	to	2050AD

Name: Barrow Hill

Grade: **Date Assigned:** **Amended:** **Revoked:**

Legal Description

This record was the subject of a minor enhancement on 21 May 2015.

This monument includes a bowl barrow located on a hillock at the summit of a large ridge between Drayton Pool and Hockley Brook. The monument survives as a flat topped barrow mound and outer construction ditch. The barrow mound is sub circular in plan, is approximately 10m in diameter and stands up to 1m high. The ditch survives as a continuous partially buried feature measuring approximately 1m wide. A 4m wide sub circular depression in the centre represents the site of a partial excavation carried out in 1894 which recovered prehistoric artefacts. Material from the south west and eastern sides may also have been removed at this time.

Despite excavation, quarrying and afforestation the bowl barrow on Barrow Hill survives reasonably well. The monument is an important local landmark and continues to maintain a prominent landscape setting. The monument will include layers and deposits containing important archaeological information relating to the use and construction of the barrow in addition to providing environmental evidence. [2]

Curatorial Notes

Description: Scheduled as Bronze Age barrow, but may in fact be medieval in origin, or even geological. [1]

Description

Mostly 12th century Grade I listed church. Norman northern doorway. 13th century northern chapel with early 14th century chancel has east and south windows with good tracery. Tower and spire rebuilt 1782. 12th century arcade. Norman font 14th century effigies. [1][2]

Font, outlier of Herefordshire school c.1160-70. [1][3]

Possible site of Pre-Conquest minster. [4]

The Domesday Survey for Worcestershire notes the presence of two priests at Chaddesley Corbett. ([5], 28.1).

The Benefice of Chaddesley Corbett is mentioned in the Taxatio of Pope Nicholas IV 1291. The benefice included the church, valued at £9 630 0s 0d. No Patron is given. [6]

Parish church. 12th century, extended late 13th and 14th century; tower and spire rebuilt 1778-1779 by James Rose, restored 1863-4 by William Butterfield. Sandstone ashlar with tile roofs. West tower with spire, 1778-9; 12th century nave, 14th century north and south aisles; 14th century chancel, 13th century north chapel. Tower: four stages capped by an octagonal stone spire, with two levels of windows, the upper windows each have a pair of 2-centred lights. The tower windows have two lights under a 2-centred head. Crenellated parapet above moulded cornice, offsets to each stage, angle buttresses. Third stage windows of two lights under 2-centred heads; second stage with circular window in quatrefoil recess. First stage with 2-light window under 2-centred head. Ground floor on west side has a 3-light 19th century window under 2-centred head in place of door, entrance now in south wall under 2-centred head of two moulded orders. South aisle: crenellated parapet, diagonal buttresses with 18th century flying buttress to right of centre. Three windows: three cinquefoiled lights under segmental pointed heads. Behind flying buttress is an ogee-headed burial niche with crocketted canopy; east window extended 14th century of three lights, the outer two trefoiled, the central light cinquefoiled, under a 2-centred head. North aisle: four bays, three to left each have a 19th century window of two trefoiled lights under 2-centred heads. Right hand bay has a 12th century doorway with semi-circular head of two enriched orders and engaged respond shafts with scalloped capitals. West window of three trefoiled lights under 2-centred head. 13th century north chapel is of three bays defined by heavily restored stepped buttresses. Windows each of two lights under 2-centred heads set in hollow moulded reveals. East window rises above 19th century vestry and has three lights under a 2-centred head. 14th century chancel is a fine example of Decorated style. South wall of three windows: to left of three lights, two trefoiled, the central one cinquefoiled, below a 2-centred head. To right similar but quatrefoil central light. Central window has three trefoiled lights, over an ogee-headed doorway. East window: five trefoiled lights with reticulated tracery under 2-centred head. Interior: nave: late 12th century south arcade of three bays, columns with scalloped capitals, 2-centred arches of two plain orders. North arcade: mostly early 12th century, four bays, columns support semi-circular arches, save that to west end which is similar to south arcade. Tall tower arch, 2-centred of two chamfered orders, mostly obscured by mid-20th century organ loft. Chancel arch: segmental pointed arch of two chamfered orders, the inner dying into the responds; north arcade of two bays with octagonal pier supporting 2-centred arches with two orders of hollow chamfers. Three-seat sedillia with ogee heads to south wall and a piscina with nodding ogee head. Roofs: nave: eight bays, restored 19th century; trusses have arch-braces and a pair of raking struts above elaborately cusped; north aisle lean-to roof 19th century of five bays; chancel: 19th century barrel vault. Fittings: south aisle: 13th century recumbent stone effigy of knight; nave: 12th century Hereford school font of goblet form with interlaced knop and four dragons to bowl, pulpit by Butterfield; chancel memorial brass (now wall mounted) to Thomas Forrest died 1511, and his wife Margaret; north chapel, under arcade a 13th century recumbent stone effigy of a priest; in chapel on north wall: tablet to Lady Mary Yate (daughter of Humphrey Packington) died 1696, flanked by Doric pilasters with entablature, floral panel below, surmounted by armorial bearings; also tablet to Humphrey Packington, died 1631, in black and white marble, Ionic columns to broken segmental pediment; wall memorial to Dame Ann Audeley, (daughter of Humphrey Packington) died 1642, has eared architrave to inscription flanked by consoles; south-west corner wall tablet to Elizabeth, daughter of Thomas Holt of Aston, died 1647, flanked by Ionic columns with entablature. (VCH, 3, pp 40-41; BoE, pp 116-7; Roper, J S: A History of St Cassian's Church, Chaddesley Corbett, 1978 (second edition): Colvin, Howard: A Biographical Dictionary of British Architects 1600 - 1840, 1978, p 706; Thompson, Paul: William Butterfield, 1971, pp 133, 264, 266, 418, 445, 480). Description

Farmhouse present on 1st edition OS Map associated with Listed Mill building at Barnett Mill. [1] [6]

Complex of buildings, farm, cornmill and iron forge. Small farmhouse of brick and sandstone blocks, dates from the 18th century with 19th century additions. Farmhouse adjoins mill. The mill is combined building with a central wheel chamber with a cornmill on one side and a forge on the other with power from waterwheel available on both sides. The Mill was supplied from a half mile leat from Hill Pool, running on a higher level above a brook with well engineered sluices. The Cornmill is built of bricks on sandstone blocks, with satone quoins. A plaque over the door is dated to 1830. The forge collapsed ion the 1960s. The whole complex appears to have been rebuilt 1830 using sandstone blocks from earlier buildings. The Mill is believed to have belonged to Lady Mary Yate in 1675 and Rob Throckmorton by 1747. The Cornmill remains in use in 1934-42. [2] [3]

Included in Survey of Industrial Monuments of 1978. [4] [5]

Description

CHADDESLEY CORBETT CP HARVINGTON SO 87 SE 10/28 Harvington Hall and attached east bridge 25.2.58 GV I Country house and bridge. Probably 14th century, substantially remodelled late 16th to early 17th century, partly demolished circa 1701 with some remodelling, restored in 1930.

Brick with stone dressings, incorporating timber-framing; tile roof. Basically an L-plan, one limb extending to north, the other to west. The north limb contains a medieval timber-framed range of four bays, with north tower of 17th century date, at south end a late 16th to early 17th century block. The range to west is late 16th century to early 17th century comprising a first floor "banqueting hall", with kitchen to south-west corner, main staircase to north-west; a hall probably extended northwards from the staircase, demolished circa 1701.

Entrance (east) front: two-storey range to centre, three-storey blocks to each corner, that to left with attic. Left-hand block: a 4-light stone mullioned window to each floor, gable to attic, stack with two diamond-plan shafts to left. Central block: five windows, three 2-light casements alternate with two 4- light casements under gablets; similar pattern on ground floor, save large window to right of centre which is the entrance, with two large doors (approached by east bridge). Right-hand block: a 3-light casement to each floor under timber lintels; to left-hand side windows at half level for staircase, including an oval window. On ground floor a boxed glazing bar sash under segmental head. Detailing of rest of building similar to left- hand block, save elevation to courtyard of west limb which is ashlared where the probable hall range stood, dated by "1701" on rainwater head.

Interior: extensive traces of an ambitious scheme of wall painting of late 16th century to early 17th century, including the Nine Worthies in a second floor passage. The main staircase is a 1930s replica of the original, which was removed to Coughton Court, Warwickshire. In the banqueting hall there are remnants of later 17th century panelling with elaborate painted decoration.

The house contains one of the best known collections of priests' hiding holes; in particular, one contrived under the main staircase, entered via hinged steps; and that in Dr Dod's Library, entered via a hole, created by swinging a stud. East Bridge: a single segmental brick arch supports the plain ashlar parapets.

The island on which the house stands [along with the Malt House (qv) and the chapel (qv)] is surrounded by a water-filled moat. Scheduled as an Ancient Monument. (BoE, p 192-194; Hodgkinson, H R: "Recent Discoveries at Harvington Hall, Chaddesley Corbett", Transactions of the Birmingham and Warwickshire Archaeological Society, Vol 62 for 1938 (1943), pp 1 - 26; Hodgetts, M: "Elizabethan Priest Holes: IV - Harvington", Recusant History, Vol 13 (1975), p 18 - 55; Hussey, C & Hodgetts, M: Harvington Hall near Kidderminster, Worcestershire, (1981); Hodgetts, M: "Harvington Hall 1929 - 1979: A Study in Local Historiography", Worcestershire Recusant, Vol 37 (1981), pp 3 - 25). [15]

On triangular island in middle of large irregular moat. Appears as entirely irregular Elizabethan brick house. But the brick is in large parts only a covering of a late medieval timber frame on sandstone base. In 1529 the house came to Humphrey Packington and his son appears to have done work circa 1560-75. House approached from East and lower part of that range, probably the oldest. Tower like North end of range has brick laid flemish bond and must therefore be mid-17th century at earliest. Principal range is to the South. Centre is the hall, placed on upper floor and probably already there in 15th century. Oldest part of Eastern range would then have been the Great Chamber and solar (W Charles suggests that solar timber may have been brought from elsewhere. Whole wing seems medieval, yet must be later addition to hall). Principal items of interest are priest holes and wall paintings. During the excavation of a drainage trench and an area to be used for a new lavatory, flints of possible prehistoric date were found. Continuous occupation of the site began during the 13th century. [1] [2] [3] [4] [5] [6] [7]

Scheduled by English Heritage. Formerly Hereford and Worcestershire 299. [8]

Moat deposits are of 20th century date. No useful information was collected from other excavated trenches. [10]

English Heritage Section 17 Management agreement for the north-eastern portion of the Scheduled area. Period covered 18 October 2001 to 17 October 2004. See paper in TBAS for notes, commentary and photographs of Hall [12] and a follow up paper which supplements it. [11] [12] [13] [14]

This record includes National Record of the Historic Environment Information provided by Historic England on 9th April 2019 licensed under the Open Government Licence: http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/ [24]

Harvington Hall, near Chaddesley Corbett, was originally a timber-framed building on a sandstone foundation, standing in a homestead moat. Fifteenth century pottery has been recovered from the moat which was cleared in 1931 and a retaining wall built on the south bank. The oldest part of the house is the low range forming the middle of the east side. See AO:60:326:5 . The house was fairly certainly rebuilt between 1569 and 1578, those parts of the earlier house which were retained (dating to the 15th, if not the 14th c.) being encased in brick. It was added to in 1701 and restoration carried out from 1931 onwards. [Harvington Hall 1953 plans, photos (C Hussey)][24]

The moat is waterfilled and well preserved. [Field Investigators Comments F1 TPW 17-AUG-62][24]

Three probable fishponds associated with the Manor house are shown to NW of the moat (See AO:60:326:7) (SO 87527458; SO 87587457; SO 8766 7452) [Plan of the Parish and Manor of Chaddesley Corbett 1745-46][24]
No change since report of 17 8 62.Of the three fishponds (6), the upper pond, nearest to the Hall, has been obliterated by the recent construction of another pond. Of the two other ponds, there are only slight traces of a pond-bay about 25.0m long, 0.2m high on its south east side and 0.6m high on the lower north west side at SO 87547461. [Field Investigators Comments: F2 DJC 28-JAN-76][24]

FISHPOND (LATE 11TH CENTURY AD to 19TH CENTURY AD - 1066 AD to 1801 AD)

Evidence EARTHWORK

Description

Pond represented by an earthwork of circa 90m long by 15m with gap in the middle - a dam for mill pond or fish pond. Largely tree covered. [1]

Earthen pond bay 90m length and 9m wide, max height 2.2m. Pond is retained on Northern side ow dry. Break in embankment. 90m to N at SO9057 7299 is a further pond bay 50m long x 11m wide with max height 1.4m. According to Mr Cadbury, NCC warden, another bay formerly existed at SO 906731 within nature reserve. A pond constructed by NCC now occupies site. [2]

Shown but not described on 1745 estate map. [3]

See also [4] [5]

Pond not visible on1st edition OS mapping, with exception of East to West aligned earthwork bank along the southern extent. [6]

TITHE BARN (14TH CENTURY AD to 20TH CENTURY AD - 1350 AD to 1950 AD)

Evidence	DOCUMENTARY EVIDENCE
Evidence	CARTOGRAPHIC EVIDENCE
Main Building Material	SANDSTONE
Main Building Material	TIMBER

Description

In 1943 almost a ruin. Tiled roof and weatherboarded sides. Interior revealed that was timber building of early type of cruck form. In 1945 collapsed. Aligned approximately North-South foundation of dressed sandstone blocks laid in regular courses to 6' high at North end. Externally 94' x 33'. Timber structure carried 5 crucks i.e. 6 bays approx 14' wide. Side walls timber frame rest partly on wall plate part on stone foundations. South end reconstructed and 6th bay added. Suggests that is late 14th century rebuilt/repaired circa 1715 and that tithe barn.[1]

The Council for British Archaeology Report notes that it is now demolished and originally had seven cruck trusses.[2]

Building is on the 1697 map of Warwick Corporation lands (described as Tythe Barn and owned by the Corporation or Warwick), the 1745 estate map (described as Dalloway's Croft with Barnyard and Garden, owned by Corporation of Warwick and occupied by James Olds) and the 1839 Chaddesley Corbett tithe map, as part of the Rectorial Glebe, (described as Barn and Yard, owned by the Corporation of Warwick and occupied by Ann Mary Hill) but not shown on the 1960s mapping.[3][4][5][6][7]

Material digitised as part of NHPP7624 Charles Archive Project. Drawing and reference to article in Birmingham Archaeological Society, as mentioned in source [1]. [8]

HER Number	Site Name	Record Type
WSM02269	Barrow Hill, Round Barrow, Chaddesley Corbett	Monument

Monument Types and Dates

ROUND BARROW (EARLY BRONZE AGE to EARLY IRON AGE - 2350 BC to 701 BC)
- Evidence EARTHWORK

MOTTE (MEDIEVAL - 1066 AD to 1539 AD)
- Evidence EARTHWORK
- Evidence CONJECTURAL EVIDENCE

Description

Site on eminence known as Barrow Hill (first apparent ref lay subsidy 1327 'atte Berewe'). Allies visited site 1844, describes it as 115 yds long 90 yds wide at broadest, in shape like a pear, with narrow part to west. 'Round tump at east end of summit of tumulus and whole hill is very perfect in appearance except at north side which has undergone excavation'. Still of considerable size almost giving impression of a motte. Over 30' high and probably over 100' diameter. No sign of surrounding ditch. Locally believed that sand of which site is composed was derived from elsewhere. [1][2]

See also. [3][4][5][6]

Research Report 1999 suggests that the feature might be geological. [7]

Tom Pagett of Hagley Historical Society carried out research and conducted a site visit in 2006. His initial suggestion is that Barrow might come from Berewe meaning small wood and not be a barrow at all but a geological feature deposited by a glacier. He stresses that there is not enough evidence to draw any conclusions as to the origins of the monument. [8]

The Historic England scheduling record for this monument was the subject of a minor enhancement on 21 May 2015. This monument includes a bowl barrow located on a hillock at the summit of a large ridge between Drayton Pool and Hockley Brook. The monument survives as a flat topped barrow mound and outer construction ditch. The barrow mound is sub circular in plan, is approximately 10m in diameter and stands up to 1m high. The ditch survives as a continuous partially buried feature measuring approximately 1m wide. A 4m wide sub circular depression in the centre represents the site of a partial excavation carried out in 1894 which recovered prehistoric artefacts. Material from the south west and eastern sides may also have been removed at this time. Despite excavation, quarrying and afforestation the bowl barrow on Barrow Hill survives reasonably well. The monument is an important local landmark and continues to maintain a prominent landscape setting. The monument will include layers and deposits containing important archaeological information relating to the use and construction of the barrow in addition to providing environmental evidence. [9]

HER Number	Site Name	Record Type
WSM02288	Site of Lower Forge, Weybridge, Belbroughton	Monument

Monument Types and Dates

WATERMILL (POST MEDIEVAL - 1540 AD to 1900 AD)
Evidence BUILDING
FORGE (19TH CENTURY AD - 1801 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE

Description

Scythe steeling forge. 1865 nearby forge (WSM02289) taken over by Nash. 1870 built by Nash as plating forge. 1949: employed one man.[1][2]

At Weybridge 3 forges stood side by side, at one time there were 6 waterwheels working.... There is evidence for some kind of ironwork being carried on here in the 18th century. Tradition has it that wire drawing took place here before the forges became scythe mills, but is probable that there was blade mill on this site for at least 2 centuries. 1865: Isaac Nash purchased Weybridge Forges and moved the machinery from Galton Mill etc etc.[3]

Simmons gives a very full description of Lower Forge buildings and machinery (only recognises 2 mills though).[4]

The site developed as two distinct units. Upper Weybridge is shown on the Chaddesley Estate Map of 1745 as a Gun Mill and the Belbroughton Tithe map of 1840 shows a layout that probably survived to circa 1938 when the reclamation of lubrication oils and the cleaning and reconditioning of boilers, etc, took place. This layout incorporated the Lower Forges.
The Upper Forge had its water supply channelled from a pool 400m upstream by a head race which is to be seen over most of its length. The spent war=ter originally returned directly to the stream, but it is very probable that with the creation of the lower forges it would have been diverted to their pool. Only excavation would confirm this.
The lower forges were powered by water from a pool which was fed by another stream from the east. The pool has been used by Bromsgrove Council as a land fill site within a short distance of the dam.
Buildings below this dam contain a variety of brick bonds, indicating various building periods.
A wall close to the stream and public path is partly constructed of grinding wheels cut in half, suggesting blade grinding as an activity at some stage.
Some brickwork at the end of the head race is probably the site of Upper Forge.
A complex site with much evidence probably below ground.[5]

Desk Based Assessment 1990.[6]

Included in Industrial Monuments Survey of 1978.[7]

Included in Gazetteer of blade mills.[8]

Site photographed as part of Historic Buildings of Worcestershire Pilot Project in October 2010.[10]

Belbroughton tithe map (1840) shows this as parcel number 1, described as 'Plating Forge, Mill, Offices, etc', owned by Charles Noel, occupied by William and Thomas Waldron.[11]

WSM02303	Unlocated Find of Romano-British Coin Hoard in the Parish of Belbroughton	General Parish Info

Monument Types and Dates

FINDSPOT (3RD CENTURY AD - 244 AD to 250 AD)
Evidence STRATIFIED FIND

Description

"In the year 1833, a Roman jar, containing more than one hundred coins of the early emperors, was found upon the Fern estate, near Farfield or Forfield in this parish. Mr John Amphlett has in his possession several coins of Adrian and Antoninus Pius, one of Marcus Aurelius Antoninus, and several Gordians and Philip, all of which I have seen". [1]

"In the year 1833, in making a drain upon Mr Green's Fern or Fen Farm, a Roman jar , containing more than on hundred coins of the early emperors, was found; some of them bear the impress of Adrian, Antonius Pius, Marcus Aurelius Antoninus, the Gordians and Philip". [2]

Location noted in the Victoria County History [3] and in a manuscript produced on the history of the Bell Inn. [4]

The find was included in a desk based assessment of the area carried out in 1990. [5]

Emperors mentioned in the 19th century sources ruled from c 117 to 249AD suggesting the hoard was buried around the middle of the 3rd century. [6]

TIMBER FRAMED BUILDING (17TH CENTURY AD to 21ST CENTURY AD - 1601 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK
Main building material	SANDSTONE
Main building material	TILE
Main building material	TIMBER

Description

16th-17th century timber framed building with new tile roof. Red sandstone plinth. Ground floor is close set studding. Two gabled porches with steps up. 2 storeys. 5 restored wood mullioned windows with lead lights, Beams have been scraped & the infill is cement rendering, Basement, stone mullion windows in the plinth.[1][2][3][7]

CHADDESLEY CORBETT CP VILLAGE STREET (east side) SO 8873 - 8973 14/47 Talbot Inn 20.10.52 GV II Two houses, now public house. Early 17th century with some mid-20th century alterations. Timber-frame with rendered infill on sandstone plinth; tile roof. Two plus three bays aligned north/south, stacks to rear. Two storeys, five windows: two to left are 4-light casements, the others of three lights; ground floor: entrance to right has a timber-framed porch gabled to street, as does entrance to left. Framing: two bays to left (north) is close- studded to both floors with straight tension braces; to right three bays three square panels high to first floor with straight tension braces over close-studding.[4][5]

Interestingly this building is not shown on the 1697 map, however, it clearly predates the map by some time. This suggests that the map may not be that accurate. Perhaps the building on the other side of the road is the pub and the map maker made a mistake?[6][7]

Photo circa 1965.[8]

With regards to comment above and the 1697 map - the building may not be shown on the Warwick Corporation map if it was not owned by the Warwick Corporation at the time that the map was made.[9]

Material digitised as part of NHPP7624 Charles Archive Project. Sketch reconstruction of the Talbot Inn, incluides elevation and survey drawings.[10]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph of public house, from an unknown date.[11]

Monument Types and Dates

WATERMILL (POST MEDIEVAL - 1540 AD to 1900 AD)
Evidence BUILDING
WOOLLEN MILL (POST MEDIEVAL - 1540 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE

Description

There was a waterdriven spinning mill & a blade mill at Hill Pool. A cloth mill seems to have been in operation here in the late C17, for corbett stated that a Worcester Clothier was working the mill at Hill Pool in reign of Will III. Later when the cloth trade declined in Worcester in the mid C18 it appears to have remained idle, for in 1783 Will Brinton, in his diary claims to have founded a spinning mill in Hill Pool village & provided yarns for the carpet loom craftsmen. Later when the Brintons left, mill continued to be used for supplying yarn by Watson & other Kidderminster firms. In later yrs (late C19?) the carpet trade left for good & mill used for scythe making, In 1930 recorded as disused. Mill building is large empty shed, derelict. There appears to be a waterwheel at each end of the building. 1930 photo shows that at the E end in position. Large iron trough overshot wheel, double width, each appears 5' wide, diam appears to be 20'. Leat long & wide. Wheel now gone & leat dried up. At W end marks on the building of another large wheel. {1}
The mill building has been converted into a domestic dwelling and apart from its length, indicating a textile mill, there is no other evidence. There is no evidence of a mill pool. Close examination of the OS 6" map suggests a head race extending upstream over 300m. {2}
Listed in gazetteer of Blade Mills.[3]
Shape taken from digitised tithe plans.[4]

WSM05326	Fishponds, Chaddesley Corbett	Monument

Monument Types and Dates

FISHPOND (MEDIEVAL - 1066 AD to 1539 AD)
Evidence EARTHWORK

Description

Long rectangular tank and breeding tank complete with leat system. The main pond averages 1.3m in depth and the subsiuary pond has an average depth of 1.6m. Formerly in perfect condition, filling in began 1969 initially focused at the Northeast end of the main pond, and a causeway has been made across the middle of the other.[1]

The main pond is over 100yds long and 30yds across at the widest point, slight signs of having been considerably enlarged at some point. There is a Subsiduary pond on the Eastern side and a very well-preserved set of leats and overflow channels. Further channels and ditches in the same field appear to be unrelated to the pond system.[2][3]

Extract from Gwilliam (1995) 'Mills in Worcestershire': "On the parish map of 1832, by Jereh Matthews, there are a series of pools called Lodge Pools, now dry, and what appears to be a leat of which once took the water from the brook in a direct path to the pools. They could have been fish pools, but the site would have been too accessible to the village, and is some distance from the nearest large house, Brockencote Hall, which has a larger pool within its grounds. Today, the leat and the pools are dry, but the depressions in the field are very prominent and can easily be seen from the road."[4]

Site of National Significance - considered for scheduling by English Heritage.[5]

See also [6][7]

Features are extremely well defined on the 2005 orthophotography and visible within the Environment Agency LiDAR data.[8][9]

Earthworks plotted on Ordnance Survey 2nd Edition County Series mapping.[10]

Pond still recorded as a a pond on the 1745 Throckmorton Estate map (described as Pool Meadow and Pool, owned by Sir Robert Throckmorton Baronet and occupied by Mr Croydon) and the 1839 Chaddesley tithe map (described as Pool, parcel number 607, owned by Sir Charles Throckmorton Baronet and occupied by James Blakeway).[11][12]

WSM05327	Deserted settlement at Ewks, West of Brook, Chaddesley	Monument

Monument Types and Dates

SHRUNKEN VILLAGE (MEDIEVAL - 1066 AD to 1539 AD)
Evidence CROPMARK

Description

Cropmarks shown on aerial photographs which appear to represent a medieval settlement.[1]

No cropmarks marked on the National Monument Record plot. Site could perhaps represent shrinkage of Chaddesley, but peculiar that lies to West of the brook, more likely to be associated with the water system of the ponds.[2]

LiDAR coverage appears to show what looks like a water meadow. Field names on the 1745 and 1839 Estate and tithe map of Chaddesley Corbett are 'Middle and Upper Park now one' and 'Upper Park' respectively, as well as surrounding field names, suggesting this was part of an area of parkland around the village. No mention of the name Ewks in the Placenames of Worcestershire.[3][4][5][6][7]

Description

On main A450 road almost opposite the Dog Inn, there is a low one storey building, which until fairly recently a shoeing smithy. It stands on site and is part of a larger iron working forge which was certainly operating in 1745. All knowledge of it appears to have been lost, but behind building is a great depression, once part of Harvington Millpond and all around, in gardens and in various parts of walls are numbers of round grindstones of various sizes, all bearing witness to days when it was a scythe mill. Present occupant told me he tried to make pit in building in which to repair cars and found below the floor a great chamber with huge oak beams. It was without doubt the wheel chamber of water driven forge. Shows sketch of 1836 map, pool has withdrawn from the building which is a different shape to the 1745 map. [1] [2]

A cottage on the site adjacent to the A450 is called "Forge Cottage". The site of a pool east of the cottage is visible but lacks water except for the stream. This pool is shown on the 6" OS map of c.1880 but is not visible on the 2" OS of 1830. Upstream, west of Harvington Hall is a pool, probably for anglers. This pool is shown as two in the Journal of Midland Wind and Water Mills Group no.2 (1981) but is also visible on the 1830 OS as a single pool. The source of the water supply lies east of the Hall and must be regarded as limited as the life of the forge seems to have been. [3]

Listed within Gazatteer of blade mills. [4]

Description

The present brick built mill was erected around 1880 as a steam mill, and its large water tank can still be seen. It replaced an earlier steam mill of wooden construction which stood 'between the timber yard and the farm buildings' (more or less where the present mill is) which was totally destroyed by fire on Good Friday 1879. [1]

First mill in county to be run by steam power, the Worcestershire Industrial Archaeology Society took photos and we hold own. Building now up for sale for conversion. First mill erected in 1864. [3]

Proposal for conversion to residential use. Survey recording of mill and surviving machinery, history, description and analysis. [4]

No mill recorded on the 1745 and the 1839 estate and tithe maps respectively. The land was owned by Berkeley's Hospital on both maps and is described as 'Homestall and Sling Piece' and 'House Garden Outbuilding Yard Rickyard etc'. Any mill would presumably postdate both these maps. Marked as Longmore Mill on 16960s mapping. [5][6][7][8]

Former Corn Mill and Barn, now dwellings. 19th century. Earliest steam powered mill in the county. Brick and tile. On Local List. [9]

WATERMILL (19TH CENTURY AD - 1801 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE
FORGE (19TH CENTURY AD - 1830 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE

Description

Mill, presumed to have originated as medieval corn mill. Worked early 19th century by Brintons Carpets. Rented 1866-73 by Isaac Nash, scythe manufacturer of Belbroughton. After 1873, when Nash gained the monopoly of scythe manufacture on the Belne Brook, it rapidly declined and soon fell completely out of use. [1]

Fed by an underground channel from Hill Pool are the remains of the Forge. The pool was drained c.1940. Little is known of its history, but it appears to have been a blade mill for centuries. According to Simmons, Hillpool Forge was later known as Lower Mill. In 1831, the contents of the mill included various tools, including scythemaker's anvils. The mill eventually fell into disuse, the roof was removed, and the wheel scrapped in 1942. Reported in 1980 that only the walls, a roof timber and a window frame survived. [2]

Further note, undated: The mill building has been demolished and replaced by a three-car garage. [3]

CORN MILL (19TH CENTURY AD to 20TH CENTURY AD - 1801 AD to 1920 AD)
Evidence CARTOGRAPHIC EVIDENCE
Evidence CONJECTURAL EVIDENCE

Description

Disused mill; possibly one of three mill sites recorded in the parish in 1604, 1675 and 1747. [1]

Belne Brook assumes the name Barnett Brook immediately after passing Barnett Bridge. On the downstream side of the bridge are two sets of sluices, part of the original Foley scheme of irrigation which diverted the stream into three main channels. On the most southerly of these channels are Bellington Mill and Lower Bellington Mill, both marked on early 18th century maps as blade mills. [2]

Simmons visited the mill in 1945, and gives history of mills in Chaddesley Corbett from the Domesday Book onwards. The wheel and all the machinery were sold in 1920. The wheel was enclosed at the east end, and was an overshot, apparently about 10' diam x 5'6" wide. It was fed by a pool some some 50 yards across at the south east corner, on a level with the stone floor, the water flowing to the pentrough by a 20" iron pipe which was still there in 1945. The pool is now filled in and the ground levelled. At some time late in its history the mill was partly rebuilt and refitted, judging by the modern brickwork, new stairs, hand-rails and other timbers, and the insertion of a few iron girders. There were three pairs of stones, one of which a 4'4" peak remains. [3]

Survey by Hagley Society (in 1993?) reported: The mill building is still standing, in a poor state of repair. There are three storeys, with a wooden chute from the first storey. On the north side of the valley is a stable building of two storeys, and close by are the brick arches of cellars originally forming part of the miller's house. [4]

Included in gazetteer of blade mills. [5]

Shown as Bellington Mill (Corn) on 1st and 2nd Edition Ordnance Survey maps. [6][7]

Disused on 3rd Edition map. [8]

Evidence BUILDING

Description

Probably one of three mills recorded in 1604, 1675 and 1747. Disused by time of VCH account. [1]

Site marked as Lower Bellington Mill (Disused) on 1st Edition Ordnance Survey map, but as Deansford Cottage on 2nd Edition map. [2][3]

Belne Brook assumes the name Barnett Brook immediately after passing Barnett Bridge. On the downstream side of the bridge are two sets of sluices, part of the original Foley scheme of irrigation which diverted the stream into three main channels. On the most southerly of these are Bellington Mill and Lower Bellington Mill, both marked on early 19th century maps as blade mills. Lower Bellington Mill later became a dressing mill, and was commonly called Gorse Mill, where gorse was crushed within living memory (1934), but at that date it was disused. Gwilliam visited it in 1969, and found the mill in complete ruin, some sections of wall having collapsed. [4]

In 1945, Simmons noted that both the mill and adjoining cottage were deserted. The mill had not been used for at least 50 years. The mill, comprising upper and lower floors only with a arched double doorway occupying about half its width, was known locally as the Gorse Mill, grinding gorse for cattle feed, to which purpose it was put after it had ceased to be a cornmill. John Richardson was the last miller to grind corn there. [5]

Survey by the Hagley Historical Society reported (1993): The evidence on the ground is limited to some brickwork associated with the mill, which stands at the end of a shallow head race fed from a pool, which itself is well fed by the stream. The difference in levels at this point is between 1 and 2m. Spanning the stream are two brick arches approximately the same size but with variations in brick details and not parallel to each other. They are on the line of the footpath leading north to Sandy Lane. The mill building at ground level measured 7m x 6m. [6]

Included within gazetteer of blade mills. Lower Bellington Mill recorded as being a blade mill in 1737. Detailed history of mill remains unclear, though it is known that the cottage was let with Deansford Farm in 1918. [7]

WSM10173	Possible Mill Site, west of Harvington, Chaddesley Corbett	Monument

Monument Types and Dates

MILL POND (POST MEDIEVAL - 1540 AD to 1900 AD)

Evidence EARTHWORK

Description

Downstream from Harvington Forge (WSM07376) there are a series of dams and pools which suggest a further industrial site. Transcript of Chaddesley Parish Map by Jereh Matthews 1836.[1]
The site west of A450 has no evidence to suggest a mill site. Access would have been difficult and the water supply almost certainly inadequate. There are two small pools on the 2" OS map of 1830 but they were probably for watering cattle, etc. A causeway carrying a farm track from Red House Farm might be considered a dam but no evidence of sluices or buildings exist in this area. There are traces of minor undulations (not ridge and furrow) on the meadow through which the stream passes in a "gorge" which increases in depth and width as it goes westwards.[2]

Monument Types and Dates

SETTLEMENT (MEDIEVAL - 1066 AD to 1539 AD)
Evidence DOCUMENTARY EVIDENCE

Description

Placename first recorded in 1275.[1]

Shape is located on a farm called Pleremore where the Listed farmhouse includes a 17th century wing. Shown on the Chaddesley Corbett tithe map (1839) labelled Blemmore on the map, described as a House and Lawn with a Drying Yard adjacent to it. Also shown on 1745 Throckmorton Estate map described as Homestall and Orchard but no farm name. LiDAR coverage does not show any clear features that could be identified as being a former settlement but this may in part be due to later land use.[2][3][4][5]

Description

Suggestion that Chaddesley Corbett is a planned medieval town. [1]
Dyer argues that Chaddesley Corbett was not a borough but acted as a place of local trade in the medieval period. The village had no market charter but the wide main street is reminiscent of a market place. In the 14th and early 15th centuries there was a shop, fish was sold and there were a number of alehouses. Chaddesley Corbett is defined as a medieval trading place but "hidden" because it lacked a market charter. It developed from a pre-Conquest estate centre. It is one of about half a dozen such trading places in Worcestershire, alongside other chartered markets. [2]
Documentary analysis indicates Chaddesley Corbett was not simply a village, but although planned, it was not (in most definitions) urban. [3]

See [4] for a detailed description of the Conservation Area.

Description

18th-19th century: 2 storeys, brick, 2 gables, tiles. LB II. 17th or 18th century: Granary, timber frame. Barn: Brick with weatherboarded sides. LB II. Farm buildings: sandstone range to north-west of farm.[1]

CHADDESLEY CORBETT CP HARVINGTON SO 87 SE 10/37 Harvington Hall Farmhouse (formerly listed as 20.10.52 Harvington Farmhouse and range of farm buildings on north-west) GV II Farmhouse. Early 17th Century, remodelled in c1700, extended mid-19th Century with some late 20th Century alterations. Timber-frame clad in brick on sandstone plinth with machine tile roof. Garden (east) front: two storeys, gables to each end, band to ground floor, stepped brick eaves. Six windows, mostly 3-light casements, the outer windows each have a segmental head, and in the gable above a blind window with segmental head. Ground floor: six windows, 3-light casements under segmental heads alternate with blind windows. Roughly central entrance has a 20th Century tiled gabled canopy and a half-glazed door. Framing: visible internally with close- studding on ground floor.[2][3]

Photographs from sale particular.[4]

Harvington Hall Farm, Chaddesley Corbett. Partially extant 17th century listed farmstead with converted buildings. Regular courtyard . Additional, prominent detached elements to the main plan, including a smaller secondary yard. The farmhouse is detached with side on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within a Church and/or Manor farm group. [5][6]

West Midlands Farmsteads and Landscapes Project Regional Statement [7]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [8][9]

Farmhouse: 17th century. Timber framed, clad in brick on sandstone plinth, tile roof. Working building(s): 17th century. Timber framed, brick infill, tile roof. Listed 17th century and early 18th century barns. Farmhouse extended during 19th century. Possible additional yard to the east. The dominant yard is enclosed on all four sides by a series of buildings and has a split yard [10]

COUNTRY HOUSE (20TH CENTURY AD - 1901 AD to 2000 AD)
Evidence BUILDING
HOTEL (20TH CENTURY AD to 21ST CENTURY AD - 1992 AD to 2050 AD)
Evidence DOCUMENTARY EVIDENCE

Description

Early 20th century: Neo William and Mary, symmetrical house with high hipped roof. Reused doorcase of circa 1760.[1]

Brockencote Hall, 1/3 mile southwest, stands on the site of an elaborate baronial mansion built by J. G. Bland 1882 for the carpet manufacturer Henry Willis. Largely destroyed by fire in the 1920s, and rebuilt in an almost equally grand neo-William and Mary style; cement rendered, not quite symmetrical, with high hipped roofs. The porch with fluted ionic columns may be reused work of circa 1760. Large hotel addition in 1992-1993 to southwest is of a similar style.[2]

A short distance further south is Brockencote Hall, situated in extensive grounds to which the Doverdale Brook forms the eastern boundary. Standing on the north side of the Bromsgrove road to the south-west of the church is the Lodge, the residence of Mr. James Meredith. Most of the house was rebuilt early in the last century, though the north-west corner dates from early in the 17th century. The walls of this part of the house are of half-timber and brick construction, considerably modernized when the 19th-century alterations were made. To the north-west of the house is a large half-timber barn. It is L-shaped in plan, and was no doubt erected when the original house was built.[3]

Defence of Britain site report form documenting the location of a fire station in the stables of Brockencote Hall during the Second World War.[4]

DWELLING (17TH CENTURY AD - 1601 AD to 1700 AD)
Evidence BUILDING

Description

17th century: 2 storeys, timber frame and brick. Three irregular gables, old tile roof, casements. Two occupations. LB II.[1]

No further information about source 1. Probably old Listing information. Buildings still shown on 1960s mapping, not on modern map. Buildings shown on Chaddesley Corbett Tithe map (1838) and Throckmorton Estate map (1745). The tithe map describes is a 'Three Houses and Gardens' owned by sir Charles Throckmorton Baronet and occupied by Richard Hemming, Thomas Nicholls and Willian Tandy (and the road has been diverted to the south so that it runs behind the cottages). In 1745 the land was owned by Sir Robert Throcmorton, Baronet and occupied by Mr Dalloway (described as 'House and Garden where Dalloway now dwelleth') and the road runs to the north of the building and outbuildings, joining the modern A448 at a more oblique angle.[2][3][4]

DEER PARK (POST MEDIEVAL - 1540 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE
PARK (19TH CENTURY AD - 1801 AD to 1900 AD)
Evidence DOCUMENTARY EVIDENCE

Description

Post Medieval? Deerpark. [1][3]

A 1745 map of the Throckmorton estate in Chaddesley Corbett does not show any park or any park field names on 'Winterfold Yield' (CRO 844) and it is not clear when the deerpark was established before it is shown as a distinct part of the landscape park on the 2nd edition of the Ordnance Survey 6 inch in 1905. There was then a small area of park with the Farm and 2 lodges to the north of the house and the deer park to the south. The house is first noticed by guides in 1814 and shown with grounds on early to mid-19th century maps. It is in fact shown as a park on the 1815 survey for the first edition of the Ordnance Survey one inch. Whitaker describes the deerpark in 1892 as 52 acres, fenced with iron and wood paling, containing 34 fallow deer and some West Highland cattle amid natural oak and elm.
Boundaries takern from Ordnance Survey 1905,15 NW. [2]

There are three fieldnames relating to a park near Winterfold on the Chaddesley tithe map (1839). [4][5]

Monument Types and Dates

DEER PARK (MEDIEVAL - 1066 AD to 1539 AD)
Evidence DOCUMENTARY EVIDENCE

Description

A deer park art Chaddesley Corbett held with the manor in the 15th century, was sold to John Packington. In 1417 repairs were done to the Dere House in the Park.[1]

Probable extent and situation of this park is indicated on the record 6'. The proximity of the manor house site, the occurrence of park field names and the fact that the road from Brockencote to Chaddesley Corbett is not shown on the estate map of 1745-6 (plan of the parish & Manor of Chaddesley Corbett) confirm that this was the park. THe road system in the area suggests that the park extended as far S as SO885726, but this is conjectural.
No remains of park pale seen on the suggested perimeter of the park.[2]

The Sites and Monuments Record suggests that the deerpark was in the area bounded by the B roads to the south of Chaddesley Corbett, west and east of Brockencote. The 1745/6 map there mentioned (CRO 844), however also gives several park field names which are situated north-east of SO 887 736, in fact the area east of the footpath between Brockencote and Bluntington and north, south and west of the church and village. Both these areas are quite distinct from that associated with the deerpark of Winterfold. The grid reference is for Lodge Farm south of the the church. A 1754 valuation of the Throckmorton Estate (CRO 4000/298) also gives park field names : Pitkell Well Park ; Potters Park; Long Park ; Dyall Park ; Yew Tree Park ; Watch Oak Park . There also some other names worth noting : Kennell Ditch ; Upper Dry Pool; Pool Meadow. Lodge Farm then had 71 acres. The garden of the house called Dial Park has been open occasionally in recent years as part of the National Gardens Scheme.
Boundaries not definable, (OS 1905,15 NW).[3]

This record includes National Record of the Historic Environment Information provided by Historic England on 9th April 2019 licensed under the Open Government Licence: http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/ [4]

The probable extent and situation of this park is indicated on the Record 6" (centred: SO 890736). The proximity of the manor house site the occurence of 'park' field names, & the fact that the road from Brockencote (SO 8880 7359) to Chaddesley Corbett (SO 8914 7348) is not shown on the estate map of 1745-6(e) confirm that this was the park. The road system in the area suggests the possibility that the park extended as far south as SO 885 726, but this is conjectural. [Plan of the Parish and Manor of Chaddesley Corbett 1745-6 (A.O. Archives 962)][4]

John Pakinton lived in what apparently remained of the Corbet manor house after two centuries of neglect, till 1578. Thenceforth Chaddesley manor crumbled away till only a mound uncertainly suggests its site, a little south of the church. [Area SO 891734]. [Country Life 8th Nov. 1946 859-860 (C, Hussey)][4]

No remains of a park pale were seen on the suggested perimeter of the park. The 'mound' mentioned by C, Hussey could not be identified. [Field Investigators Comments: F1 DJC 24-MAY-76] [4]

Park listed. [The Medieval Parks of England A Gazetteer 1983 85 No 13 (L Cantor)][4]

Evidence DOCUMENTARY EVIDENCE

Description

Victorian house built as vicarage in 1854 and used as such until 1960. There has been a vicarage on this spot since the 15th century. Descriptions of buildings written in 1635 and 1714 still exist. The previous house had 12 chambers upstairs, big and little, and there were outbuildings with stables, barns with a threshing floor, a pigeon house and foldyards.[1]

Description

Early Victorian building, built in 1848 as house for under schoolmaster and large room for education of girls. [1]

Part of the building can be seen on Images of England in the photograph of the building next door (WSM40660, LB157033). The photograph shows the building to be brick with sandstone lintels and a tile roof. [2]

Former 19th century school building, brick with tile roof. Gothic influenced architecture. Now 4 flats and 1 house. Replacement timber windows. Tall brick multi-flue stacks. [3]

FIRST AID POST (World War Two - 1939 AD to 1945 AD)

Evidence	DOCUMENTARY EVIDENCE

Description

Back of this house considerably older than front which dates to the mid 18th century, with ogee headings on the gables. Records of 1697 mention a tiled house with 3 bays & a thatched hovell. A 1750 report that new house built on part of ground. It seems the house was owned by James Rose architect. In enclosed yard are former coach house & stables (now house) [1].

Wrongly so-called, as its main features are two canted bays with Venetian windows broken round them and two bigogee gables. The doorway in the middle has a classical pediment, but the blank doorways and windows in the end bays are ogee-headed again. So the date is probably about 1750 [2].

The doctor's surgery was used as a first aid post during WW2 [3].

CHADDESLEY CORBETT CP VILLAGE STREET (east side) SO 8873 - 8973 14/48 Tudor House 20.10.52 GV II House. Shortly before 1750, possibly by James Rose. Stuccoed brick with tile roof. Two storeys with attics lit by lunnette windows in tall parapet beneath ogee gables; moulded cornice. Two canted two-storey bay windows with flat roofs and modillioned cornices; Venetian windows wrapped around front flank a central pedimented window with eared architrave. Each bay is flanked on the outer side by a blind window with ogee head. Ground floor: outer corners have blind entrances with ogee heads. Central entrance has pedimented doorcase with engaged columns. (Anon, Notes on Chaddesley Corbett Village Street, nd). [4] [5]

See [6] for a photo circa 1965.

HOUSE (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK
Main building material	TILE

Description

Eighteenth century house, possibly built after recorded fire in eighteenth century. Moulded eaves cornice, windows with voussoirs and ornamental keystones, central door with six panels and architraves and entablature. [1]

CHADDESLEY CORBETT CP VILLAGE STREET (east side) SO 8873 - 8973 14/54 Georgian House (formerly listed as a part of Malt 20.10.52 House and house adjoining) GV II House. Mid-18th Century with some late 20th Century alterations. Brick with machine tile roof and gable-end stacks. Two storeys with attic lit by a gabled dormer to right. Brick coped verges, moulded wooden cornice. Three windows: 2-light casement under wedge lintels with fluted keystones, central one blind. Central entrance approached by two steps has moulded wood architrave, moulded canopy on consoles and 6-panel door. [2] [3]

See also [4]

There is a building shown here on the 1697 map, it is possible that elements of this earlier building survive within the current structure. [5]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph of the village looking south, includes Georgian House.[6]

Evidence	EXTANT BUILDING

Description

These are the best timber framed houses in the village street. Building dates are not known, not on map of 1697 however, this map is clearly not accurate as this building is older than that. Earlier this century use as seven cottages. In the 1960s converted into four cottages, but their frontages are largely unchanged. [1][2]

Dates are conjectural as map evidence not conclusive. Site marked as Workhouse on 1745 Throckmorton Estate map, see WSM39781. [3][4]

CHADDESLEY CORBETT CP VILLAGE STREET (east side) SO 8873 - 8973 14/56 Batch Cottages (Nos 1 & 2) (formerly listed as a part of of Liberty Hall. Range of 20.10.52 6 houses to the south of Liberty Hall) GV II Two houses. Late 16th century and early 18th century with some late 20th century alterations. Timber- frame with painted brick infill and machine tile roof. Three framed bays aligned north/south, with half-bay of 16th century timber-frame to north end and 18th century timber cross-wing to south. One storey with attic lit by two gabled dormers and a canted oriel in the gable to right. Ground floor: six windows: mainly 2-light 20th century casements. Entrance to No 1 between two left-hand windows has a 20th century gabled tiled canopy approached by three stone steps and a 20th Century glazed door. Entrance to No 2 to right has a segmental canopy over a 20th century panelled door. Framing: 16th century portion close-studded, rest of building, two rectangular panels to ground floor, two square panels high to first floor with straight tension braces. (Anon, Notes on Chaddesley Corbett Village Street, nd). [5][6]

Material digitised as part of NHPP7624 Charles Archive Project. Drawings of Batch Cottages, completed in 1962.[7]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph of the village looking south, includes Batch Cottages as the immediate set of timber framed houses on the left.[8]

Material digitised as part of NHPP7624 Charles Archive Project. Photographs of Batch Cottages from unknown date.[9][10]

Description

Largely rebuilt in the 1960s, but of the original external appearance. Was built in 1795 as the village workhouse for the poor on the site of paupers cottages. The brick for the original building & the bridge was made on Harvington Common. Used as the workhouse until the building of the Union Workhouse in Blakebrook, Kidderminster in 1838 [1].
Built on site of pauper's cottages in 1795 as a workhouse. Redeveloped in the 1960's as flats, it was used as a workhouse until 1838 when the Kidderminster Union Workhouse was built. Photograph of building taken in 2005 [2].

Description

18th Century: 2 stories, painted brick, 3 gables. At back 17th Century or earlier timber frame. Most of house rebuilt early in last century, though the NW corner dates from early in the 17th Century. The walls of this part of the house are half timber & brick construction, considerably modernised when 19th Century altered. [1] [2]

Brooch found in the kitchen garden by the owner some years ago, on loan (& display) to the Ashmolean Museum. Early 14th Century, with Latin inscription & arms of the Beauchamps & the... [3]

CHADDESLEY CORBETT CP A 448 (north side) SO 8873 - 8973 14/13 Lodge Farmhouse (Formerly listed as The Lodge) 20.10.52 GV II Farmhouse. Early 17th Century, extended late 17th Century, refronted early 18th Century, altered early 19th Century. Timber-frame; painted brick infill clad in painted brick, and hipped tile roof. U-plan, gable-end stacks on front range. East front: two storeys, plain parapet over dentilled brick cornice. Three windows with painted wedge lintels, two 3-light casements flank a 2-light casement. This arrangement supersedes five blocked windows under rubbed brick heads. Ground floor: two 3-light casements replacing six windows, central entrance has a pilastered wooden doorcase with open pediment, radially glazed fanlight and 6-panel door. Framing: exposed to rear wings, north wing is earlier and had close-studding with mid-rail to first floor, south wing is four square panels high with straight tension braces. [4] [5] [6]

Material digitised as part of NHPP7624 Charles Archive Project. Photographs taken of Lodge Farmhouse at an unknown date. This property was known as The Vicarage and has a later Georgian frontage attached to the original timber frame which is seen at the rear of this building.[7][8]

Description

Much restored old timber framed house. May have been the cottage mentioned in Widow Hunt's property. [1]

Sales details before modernisation. [2]

Sales details after modernisation and extension. States that parts are 1590. [3]

Shown on the 1745 Throckmorton Estate map and the 1697 Warwick Corporation map. 1745 map gives no details for occupier but is owned by the Corporation of Warwick. The 1697 map lists the owner as Widow Hunt and describes it as 'Two tenements which contain two large bays of brick building tiled and three other bays thatched with two bays of stableing and 2 bays of barning as also two little bays of building tiled now in the occupation of her son. The whole being in length 276 feet east and 290 feet west, 100 feet north and 142 feet south'. Google Streetview shows it to have been refaced in brick, all stretcher bond, and substantially altered. [4][5][6][7]

Timber framed cottage. 17th century origins now forming front part of modern house. [8]

Description

There are records of buildings here on the 1697 map. They are shown as individual properties as they are now, although in the intervening years they have been subdivided and some used as shops. [1]

CHADDESLEY CORBETT CP VILLAGE STREET (west side) SO 8873 - 8973 14/66 Saddlers Cottage (previously listed as the Old Post Office) 20.10.52 GV II House. Possibly 16th Century, remodelled early 18th Century, with some mid-20th Century alterations. Timber-frame clad in painted brick; tile roof. T-plan, cross-wing to south, other range extending to north parallel to street. One storey with attic lit by a 3-light casement in gable to left and two gabled dormers to right. Ground floor: three windows, two bow windows, with 3-light casement to right. Entrance to left-hand return front. Framing: visible over entrance, one square panel below eaves with straight angle brace. [2] [3]

SCHOOL (18TH CENTURY AD - 1701 AD to 1800 AD)

SCHOOL (19TH CENTURY AD - 1801 AD to 1900 AD)

Evidence	DOCUMENTARY EVIDENCE
Evidence	BUILDING

Description

Unlisted school, built in 1894 on playground of the previous school. It is possible that the blacksmith occupies part of the site earlier. The previous school still survives as a house called School House. A red brick 1 storey building in churchyard, built 1809, poss on site of ealier school, shown on map of 1745. The windows and door originally had pointed arches but have been blocked up or altered. [1]

Description

Interesting early Georgian house with gable end of roof facing street. There are records of an earlier house on site & the back of the present house is probably part of this. At one time it was the Bell Inn, with a skittle alley, the foundations of which have recently been discovered. [1] [2]

CHADDESLEY CORBETT CP VILLAGE STREET (west side) SO 8873 - 8973 14/65 Lychgate House 20.10.52 GV II House. Early 18th Century with some mid-20th Century alterations. Brick with painted stone dressings. Two storeys with attic lit by a boxed glazing bar sash under rubbed brick head with keystone in gable; stone quoins. Two windows. Boxed glazing bar sashes under rubbed brick heads with keystones, stone sills with consoles below, central window blind. Ground floor: central entrance has a moulded wooden architrave, flat canopy on consoles, door of six raised-and- fielded panels. Front to churchyard (on left) has a blocked entrance and dentilled brick cornice. [3] [4]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph taken of Lychgate House.[5]

- Evidence CARTOGRAPHIC EVIDENCE
- Evidence PLACENAME EVIDENCE

COAL WORKINGS (19TH CENTURY AD - 1801 AD? to 1900 AD)
- Evidence PLACENAME EVIDENCE
- Evidence CARTOGRAPHIC EVIDENCE

Description

Possible Coal Pits. Area to the north east of Chaddesley Wood named as Coalpit Coppice on the 1st Edition Ordnance Survey map and the 1955 Ordnance Survey map.[1][2]

1745 Throckmorton Estate map shows this piece of woodland as 'Coal Pit alias Cut Pit Coppice'.[3]

The geology in this area is Mercia Mudstones, not anything containing coal deposits, more likely to relate to charcoal burning.[4]

Fieldname Cut Field, Cutts Meadow and Cutlinch as 'land drained by deep furrows'.[5]

HER Number	Site Name	Record Type
WSM16506	Lord Foley's Irrigation Scheme, Chaddesley Corbett, Stone	Monument

Monument Types and Dates

WATERCOURSE (17TH CENTURY AD to 19TH CENTURY AD - 1680 AD to 1900 AD)

Evidence EARTHWORK

Description

The original system was constructed around 1680 to convey waters from the high ground of the Clent Hills to the sandy arable areas of the Blakedown/Kidderminster areas. [1]

Dr Nash relates an account of: 300 acres of land, near Chaddesley Corbett, watered by Belbroughton Brook, and, being barren sand, improved from 5s. to 30s. per acre, annual value, and that this improvement was made 100 years ago: this may serve to show, that the improvement of land by watering is not a modern practice or discovery - see Mr. Turner's Account. [2]

One extensive system laid out in the north of the county received mention by Nash in 1782; the year of construction is not known but it was most likely in operation earlier than 1700. This improvement was made by Lord Foley under the direction of Mr. Pratt. [3]

Photographs taken during site visit in 2004. [4]

This feature covers a vast area of fields under pasture and cultivation. The channel systems are clearly seen on LiDAR imagery. There could be some potential for remaining environmental deposits within this area. [5][6]

A survey of the irrigation scheme was undertaken in 2004. [7]

Possible canalised waterways recorded on historic mapping and potentially related to Lord Foley's Irrigation Scheme were identified during a geophysical survey in 2020. [8]

HER Number	Site Name	Record Type
WSM20018	Bronze Age Barrows, Grove Farm, Drayton	Monument

Monument Types and Dates

BARROW (EARLY BRONZE AGE to EARLY IRON AGE - 2350 BC to 701 BC)
Evidence DOCUMENTARY EVIDENCE

Description

Three fields on the Tithe Map called Little Barrow Field, Cross Barrow Field and Long Barrow Field. Suggests that further barrows survived in this area as well as Berrow Hill, which is a Scheduled Ancient Monument c.400m to the south-west. [1]

A geophysical survey against the field's southern edge was undertaken in 2016 in advance of the Birmingham Resilience Project pipeline (area 31 - WSM70442). No anomalies suggestive of ring ditches were detected in this area (G31), although three linear anomalies likely to be of archaeological origin were identified, along with areas of modern disturbance. [2]

Possible archaeological features were also detected in adjacent survey areas G30-33, suggesting that this is an area of extensive archaeological activity (see WSM70453-5). [2] [3]

Two trial trenches were excavated across this area in autumn 2016 by AOC (WSM70492). No archaeological features or activity was identified. [4]

WSM23034	Sion House, Hillpool, Chaddesley Corbett	Building

Monument Types and Dates

BUILDING (POST MEDIEVAL - 1540 AD to 1900 AD)
Evidence EXTANT BUILDING

Description

Sion House - Sion an important local place name, derivation uncertain (Zion?). See HWCM 12789.
Fishponds and ? cascade to W & SW, Parkland to NW, SW & S of Sion House shown on SMR mapping (1970s) . Probable formal landscape gardens.{Ref 1}

A residence is marked at Hillpool by Cary in 1805. The house is shown with grounds on earlier 19th c. printed maps and with a park and lodge on the ist edition of the OS 6 inch in 1882. A sequence of small linked pools in the centre of the park is the main feature. A little more detail can be found on the 1838 tithe map for Chaddesley Corbett, e.g. a ride into the fringe planting (CRO 4000/867). The s. boundary of the park is made up of a narrow wood with yew, sweet chestnut, beech, oak, alder ... A dry ditch connects this (and ? the brook below) with the pools in the centre of the grounds. A pool has been made in the s.e. corner of the old park area [2]

Evidence	EXTANT BUILDING
Main building material	BRICK
Main building material	SANDSTONE
Main building material	TILE
Main building material	TIMBER

Description

Grade II Listed. Dovecote. 17th century with some late 19th century alterations. Timber frame with brick infill on sandstone plinth, pyramidal tile roof surmounted by a glover. East front has an entrance to left-hand corner with pointed head and a dormer window above. Glover has an octagonal cupola. Framing: three square panels high with straight angle braces. [1][2]

Visible on 1st Edition Ordnance Survey map. [3]

Recording undertaken prior to restoration, 1997. The building probably dates to the late 16th or early 17th centuries. Removal of the brick nogging revealed that the dovecot had originally been clad in wattle and daub. Analysis demonstrated that all the mortar samples were lime-based (WSM29641).[4]

WSM28967	Garden at Harvington Hall	Historic Park or Garden

Monument Types and Dates

GARDEN (17TH CENTURY AD - 1601 AD to 1700 AD)
Evidence DOCUMENTARY EVIDENCE

Description

In 1873 Niven described Harvington Hall as "a ruin inhabited by swallows" although a hundred years earlier it was still of sufficient status as a residence to appear on Nash's 1781 map and indeed continues to have a presence on 19th century maps. The Department Of Environment listing specifies the garden wall as circa 1600 with later repairs "enclosing the west,east,south sides of the garden west of the Priest's House. This wall enclosed "The Great Garden" where the greater double blush anemone was recorded in 1629". An 18th century map of the Throckmorton estate in Chaddesley Corbett shows the Great Garden still called such and with a path going round the square within the wall (County Record Office 844). The plan also shows the bowling green beside it and the Pig Green beyond that. The Green is North of the moat with a triangular shaped orchard next to it, arrangements of land still present on the 1882 1st edition of the Ordnance Survey 6 inch map. The brick wall of the Great Garden survives but only the part that serves as garden to the Priest's House is used as such, the rest being car park. The Bowling Green is now used for car parking and the Green is part of the field to the North West of the moats.
Boundaries takern from OS 1905, 15 NW [1]

WSM29001	Park at Sion House, Chaddesley Corbett	Historic Park or Garden

Monument Types and Dates

PARK (18TH CENTURY AD to 21ST CENTURY AD - 1750 AD? to 2050 AD)

Evidence BOTANICAL FEATURE

Description

A residence is marked at Hillpool by Cary in 1805. The house is shown with grounds on earlier 19th century printed maps and with a park and lodge on the 1st edition of the Ordnance Survey 6 inch in 1882. A sequence of small linked pools in the centre of the park is the main feature. A little more detail can be found on the 1838 tithe map for Chaddesley Corbett, e.g. a ride into the fringe planting (CRO 4000/867). The southern boundary of the park is made up of a narrow wood with yew, sweet chestnut, beech, oak, alder ... A dry ditch connects this (and ? the brook below) with the pools in the centre of the grounds. A pool has been made in the south east corner of the old park area.[1]

The boundaries of the site are not clearly marked on the site map. OS 1881, 9 SW.[1]

The Chaddesley Corbett tithe map (1839) shows 3 parcels of land: Upper Park, The Park and Pleasure Garden Grounds, plantation etc with Sion House. Shape drawn to these boundaries. There are no field names indicating parkland for the same area on the 1745 Throckmorton Estate map (1745). Aerial photogrpahic coverage looks to show parkland. Dates are conjectural.[2][3][4][5]

Monument Types and Dates

ROAD (ROMAN - 43 AD to 410 AD)

Evidence	CROPMARK
Evidence	DOCUMENTARY EVIDENCE
Evidence	UNCERTAIN EVIDENCE
Evidence	SUB SURFACE DEPOSIT
Evidence	CONJECTURAL EVIDENCE

Description

In 1852 the Antiquarian Jabez Allies published itineraries for a number of Ancient Roads in the county, one of which ran from Droitwich to Stourbridge. His proposed route went via Hampton Lovatt, Doverdale, Elmbridge, Rushock, Chaddesley Corbett, Brome (sic), Clent, and onwards to the camp called 'The Church-yard' situated at Green's Forge, Stourbridge. [1]

In his work on salt-ways Houghton noted a Route (Route D) which left Droitwich heading for Kidderminster; a branch left it at Elmley Lovett (Route D2) to serve Rushock, Chaddesley Corbett and Belbroughton. [2]

Margary provides a summary of the route, noting that it is generally well marked except for a gap in the area around Chaddesley Corbett. He notes that it left the Worcester to Birmingham road (Margary 180) just before the river crossing and ran north along the line of Crutch Lane to Elmbridge, although there is a gap of about five miles where its course is unknown. From here it ran to Chaddesley Corbett, Yieldingtree and Stakenbridge. He surprisingly comments that it is a road that only recently seems to have been noticed. [3]

The Ordnance Survey note the course of the Roman road on two maps. [4][5]

Two aerial photographs show the characteristic parallel linear cropmarks of a Roman road. One is of the area near Woodhouse Farm, Chaddesley Corbett, where a section was cut, the other near Palmers Hill in Hagley. [6][7]

Further evidence is provided by a partial section in Crutch Lane during the construction of a road. [8]

Strong, but circumstantial evidence, is provided by observations at Purshall Green. [9]

There is anecdotal evidence of two other sections being cut near Broome but these do not appear to have been published. [10]

Further aerial photographic evidence. [11][14][15][16][17][18][19][20]

For convenient reporting the road has been divided into five stretches. [12]

The plotted course of the road should be regarded as conjectural. [12]

Although this route is aligned to the same general direction it is clearly not the same road as that suggested by Allies. [12]

In 1975 Llewellyn reported that a photograph taken on 5/1/1975 from "Harborough Hill looking south-east showed a crop mark in a field rising from Windmill Pool." Also that there was "no trace in field". [10]

Llewellyn also reports that "an aerial photograph (Cambridge University) shows crop mark south of Windmill Pool: road continuing in straight line from known alignment". [13]

Neither photograph can now be located although the AP is known to carry reference AGD 48. The location has been interpreted. [14]

Also mentioned in source [13].

Geophysical surveys for the Birmingham Resilience Project pipeline across the postulated line of the Roman road. No anomalies potentially relating to the road were detected, although the field through which the road is projected to have passed was not surveyed during phase 1 or 2 of the project - it is unclear whether this survey area is included in a subsequent phase

of work or if it was not surveyed at all. [21] [22]

Monument Types and Dates

ROAD (ROMAN - 43 AD to 410 AD)

Evidence	DOCUMENTARY EVIDENCE
Evidence	SUB SURFACE DEPOSIT
Evidence	CONJECTURAL EVIDENCE

Description

For convenient searches and reporting the Roman road between Droitwich and Greensforge has been sub-divided into six stretches. This record relates to the stretch between the Elmbridge Brook (North) and the parish boundary of Chaddesley Corbett [1].

Margary records that, whilst it follows the modern road to Elmbridge there is a gap of about five miles where its course is unknown. From Yieldingtree it runs to Stakenbridge ([2], p.270).

Physical evidence of its existence has been found by County Archaeological staff in the area of Purshall Green [3], [4] and [5].

He plotted alignment should be regarded as approximate [6].

Description

CHADDESLEY CORBETT CP STOURBRIDGE ROAD (east side) SO 87 SE Harvington 10/41 Steppe Farmhouse 8.11.79 - II Farmhouse. 16th century remodelled early 18th century, with some mid 19th century alterations. Timber- frame with rendered infill and painted brick, tile roof. H-plan, main range aligned north/south. West front: two storeys, band to ground floor of central range; one plus two windows, right-hand cross-wing blind, 3-light casement to left, others 3-light casements. Ground floor with one plus two plus one windows, mostly 3-light casements, the two to the centre under segmental heads, with a brick buttress between them. Entrance to left-hand angle with cross-wing has gabled and tiled 19th century brick porch with Tudor arch over 20th century Tudor style door. Framing: right-hand cross-wing close-studded with mid-rail and moulded bressummer to former jetty; gable truss has three struts to collar, clasped purlins. Left- hand range: close-studded, with gable trusses studded with collar. [1][2]

Description

CHADDESLEY CORBETT PARK LANE SO 87 SE (north side) Harvington 1805-0/10/10010 Nos 1-2 - II Pair of cottages in a terrace of three. Circa late 16th century or early 17th century, extended in 17th century and remodelled in circa early 18th century. Timber-frame faced in painted brick. Plain tile roof with gabled ends. Brick axial, gable and lateral stacks. PLAN: Pair terraced cottages. No.2 appears to be the original circa late 16th or early 17th century 2-bay range; the right hand bay of No.1 was probably added in the 17th century, its chamber jettied out at the left end. Later in the 17th century the left hand room of No.1 was added and in circa early 18th century the range was converted into a row 3 cottages and encased in brick, when No.3 [not included] on right was built. The rear outshuts are 19th and 20th century. EXTERIOR: 1 storey and attic. 3-window south front. At centre and right tall wooden cross-mullion-transom windows with metal casements with glazing bars in segmental arch openings; doorway between with chamfered frame with carpenter's mitres and 20th century door and canopy. Doorway with 20th century porch and 2-light casement on left. 2 20th century gabled dormers on right. No.3 [not included] on right. At rear No.2 has large brick lateral stack with set-offs; single storey rear outshuts. INTERIOR: No.2 has 2 unchamfered cross-beams and joists and large lateral fireplace with unchamfered timber lintel; frame exposed with square panels, tension-braces, tie-beam-collar-trusses, wind-braces, trenched diagonally-set ridge-piece and common rafters intact. Tie-beam in left [west] end of No.2 has arched door head cut into its soffit, presumably when east bay of No.1 was added. No.l`s larger left room has chamfered axial beam with cyma stops and unchamfered joists; right hand chamber has exposed framing. [1][2]

THRESHING BARN (POST MEDIEVAL - 1540 AD to 1900 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK

Description

Farm complex, comprising substantial farmhouse, threshing barn reused as cow house and other ancillary buildings indicative of dairy farm. Proposed for conversion to residential 2002 [1].
In the 17th century a timber building was constructed close to the 15th/16th century house. In the 18th century it was reconstructed in brick and used as a threshing barn. To its south a large threshing barn was constructed in the mid-18th century, parts of which were later used as a cow shed. A brick stable was added to it in the late 19th century. [2]

WSM32160	Eastern Range of Farm Buildings at Tanwood House Farm, Chaddesley Corbett	Building

Monument Types and Dates

FARM BUILDING (POST MEDIEVAL to 21ST CENTURY AD - 1540 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK
Main building material	TILE

Description

Range of brick farmbuildings [1].
These formed part of Tanwood House Farm and date from the middle of the 18th century through to the late 19th century. They were replacements for earlier 18th century buildings. The Stock Pen dates to the 18th century and was possibly built as a replacement for an earlier building. By the late 18th century the Loose Box had been added. Around 1800 the Threshing Barn was built. At some time in the early 19th century a building was constructed a short distance to the north and it is possible that it has always been used as a stable. In the early to mid 19th century there were a large number of changes made to the farm. Buildings were added and others changed function. Further buildings were added in the mid 19th century but subsequent changes were small. The buildings are typical of any farmstead and show buildings being constructed as needed or when money allowed. Tanwood House Farm appears to have been built as a new farm in the mid-18th century as a small independent farm [2].

Monument Types and Dates

MILL (POST MEDIEVAL - 1540 AD to 1900 AD)

Evidence	DOCUMENTARY EVIDENCE
Evidence	DEMOLISHED BUILDING

Description

The report on a Field Investigation at Pond Meadow, notes the presence of a mill on 1697 map. Whilst 'probing' has not indicated its location a sketch map shows brickwork noted as being part of the mill.[1]

Listed within gazetteer of blade mills.[2]

Digital transcription of 1697 map shows a mill building on the watercourse south of the pond, on Bromsgrove Lane. Dates are conjectural.[3][4]

HOUSE (POST MEDIEVAL to 21ST CENTURY AD - 1540 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK

Description

A period gentlemen's residence built some time before 1862 and when sold in 1875 described as a suitable residence for a gentleman farmer. It is now no longer a working farm [1].
The sale particulars of 1872 are said to suggest a half-timbered rear of the building [2]

BARN (POST MEDIEVAL to 21ST CENTURY AD - 1540 AD to 2050 AD)

FARM BUILDING (POST MEDIEVAL to 21ST CENTURY AD - 1540 AD to 2050 AD)

Description

A late 16/17th century timber framed threshing barn had been incorporated into a mid-19th century redevelopment which provided new brick built stables, cart shed and granary. In the late 19th century a calf shed replaced an earlier piggery. The present 1950's shelter shed stands on the site of an earlier mid-19th century development, which itself had replaced an earlier building on the site [1].

WSM35574	Ponds and moat at Harvington Hall, Chaddesley Corbett	Monument

Monument Types and Dates

MOAT (LATE 11TH CENTURY AD to 21ST CENTURY AD - 1066 AD to 2050 AD)
Evidence EARTHWORK
POND (LATE 11TH CENTURY AD to 21ST CENTURY AD - 1066 AD to 2050 AD)
Evidence EARTHWORK

Description

Medieval ponds and moat around Harvington Hall. There has been a manor house here since probably 12th century. There were originally four ponds and the moat. The most north westerly two have now completely silted up. The other 3 survive. Earliest surviving map evidence of ponds and moat dates to 1745 [1].

The moat was allegedly dredged in the 1930s. More recent work has been carried out in the 1990s and 2004.[2][3][4]

Moat and pond seen on the 1st, 5th and modern OS maps, aerial photographs and LiDAR imagery. Unknown environmental potential if this feature was dredged in the 20th century.[5][6][7][8][9][10][11]

The moated site, quarries and the sub-rectangular pool to the north-east of the moat was designated a Scheduled Monument in 1939. Please note that the scheduled area does not include the two large ponds to the north-west of the moat.

Details:

The monument includes the buried and earthwork remains of the moated site and its associated fishpond complex and quarries at Harvington Hall, Chaddesley Corbett. The moat is sub-rectangular and measures approximately 150m north to south by 110m east to west with a large triangular island upon which stands Harvington Hall. The Hall, a Grade I Listed Building of the late medieval period, is excluded from the scheduling, although the ground beneath it is included.

To the immediate north east of the moated site is a sub-rectangular pond. This pond is the sole remaining unmodified pond formerly part of a chain of four ponds surrounding the moated site. To the north of the moated site lies a large sandstone quarry, from which the building materials used in the construction and modification of the Hall are believed to have come and which was later reused and adapted to serve as the kennels complex associated with the Hall. To the west of the Hall a further quarry also provided stone for building works at the moat. In the south west corner of this quarry is the entrance to the ice house associated with Harvington Hall. All the arms of the moat remain water-filled. The moat is partly lined with bricks and red sandstone blocks. The main approach to the island is via a Listed Grade I single arched bridge built of red sandstone and reinforced in brick. The buildings on the island rise directly from the moat edge in a sheer face along the inner face of the arms of the moat. On the north west part of the island lie an 18th century chapel and a 17th century malt house both of which are Listed Grade II and are included in the scheduling. There is a second entrance to the island to the south west in the form of a stone built double arched bridge with brick arch linings and which is Listed Grade II. Both entrances are believed to have been original entrances to the moat island.

On the northern side of the moated site, a substantial earthen bank acts as a dam retaining the water against the natural slope away from the site. There is an outlet in the northern angle of the outer bank of the moat ditch, allowing water to flow down hill from the moat. The modern approach to Harvington Hall runs across the retaining bank of the north eastern arm of the moat. The island of the moated site is roughly triangular, orientated north east to south west. The buildings of Harvington Hall are located in the south and east sectors of the island, with the main house in the southern angle. The interior of the island is largely level, although excavations in advance of a drainage trench uncovered archaeological deposits ranging from prehistoric to post- medieval.

To the north east of the moated site, across the modern access road, lies the sub-rectangular pool known as `Gallows Pool' on the late 18th century estate plan. This pond formed the first of a chain of ponds recorded as surrounding the hall in early maps. At the north western end of the pool lies a small separate stone lined pond. This is where the spring rises which feeds the entire system. A cobbled hollow way runs from opposite the eastern end of the quarry arcing towards the Gallows Pool.

The quarry which lies to the north east of the moated site exhibits signs of occupation, including beam slots, tooling and brick lined faces of chimney flues. To the west of the moat lies a second quarry, a further source of building materials for the Hall. This quarry also contains substantial tooling marks and beam slots. In the south eastern angle is a brick lined archway which is the entrance way to the ice house associated with the Hall. The ice house is partly constructed from brick and partly hewn from the sandstone, it would originally have been stocked with ice taken from the adjacent pond complex. The remains of the

ice house are included in the scheduling.

All modern lighting, fencing, garden furniture, and the surface of modern paths and roads are excluded from the scheduling, although the ground beneath these features is included.

Reasons for designation:

Around 6,000 moated sites are known in England. They consist of wide ditches, often or seasonally water-filled, partly or completely enclosing one or more islands of dry ground on which stood domestic or religious buildings. In some cases the islands were used for horticulture. The majority of moated sites served as prestigious aristocratic and seigneurial residences with the provision of a moat intended as a status symbol rather than a practical military defence. The peak period during which moated sites were built was between about 1250 and 1350 and by far the greatest concentration lies in central and eastern parts of England. However, moated sites were built throughout the medieval period, are widely scattered throughout England and exhibit a high level of diversity in their forms and sizes. They form a significant class of medieval monument and are important for the understanding of the distribution of wealth and status in the countryside. Many examples provide conditions favourable to the survival of organic remains.

The moated site at Harvington Hall includes a range of associated features, the majority of which are well documented. The development of the status of the site will enhance our understanding of moated sites. The complex of fishponds surrounding the site and the evidence of the engineering required to establish the water management features within the confines of the landscape enhances the importance of the site.

The survival of the original quarries used in the construction of the site, and the documentation and physical evidence for the reuse of the quarries, as part of the domestic complex providing kennels and an ice house, provide further rare insights into the origins, construction and domestic reuse of the monument.

The moated site and pond have remained water-filled and the preservation of organic remains would be expected. Part excavation within the island of the moated site has also shown that several phases of archaeological deposits survive, including evidence of prehistoric occupation prior to the construction of the moated site. The series of buildings which survive on the island and which include the Hall, granary, chapel and the malt house further add to our understanding of the use and development of structures within a moated site. Monument Types and Dates

QUARRY (16TH CENTURY AD - 1580 AD to 1600 AD)
- Evidence CARTOGRAPHIC EVIDENCE
- Evidence EARTHWORK

Description

Believed to have been dug in the 1580s to provide clay and sandstone for the Hall built by Humphrey Packington at this time. The quarries are visible on the 1st Edition Ordnance Survey. [1] They are also drawn onto the 1745 Estate map. The westerly quarry is marked as 'stone quarry'. The easterly one is drawn, but not named. A small building on the edge of it is marked 'dog kennel'. [2]

Still visible as earthworks today [3]

The natural here comprises of Keuper marl clay overlying sandstone bedrock. It is believed that the sandstone foundations were excavated from these quarries to build the house, it is also possible that clay was used from them to make bricks/tiles. Assuming that clay as well as stone was extracted for making the bricks in the house, then there should be a kiln site close by. [4]

The quarries together with the moated site and the pond to the north east were designated as a Scheduled Monument in 1939.

Details:

The monument includes the buried and earthwork remains of the moated site and its associated fishpond complex and quarries at Harvington Hall, Chaddesley Corbett. The moat is sub-rectangular and measures approximately 150m north to south by 110m east to west with a large triangular island upon which stands Harvington Hall. The Hall, a Grade I Listed Building of the late medieval period, is excluded from the scheduling, although the ground beneath it is included.

To the immediate north east of the moated site is a sub-rectangular pond. This pond is the sole remaining unmodified pond formerly part of a chain of four ponds surrounding the moated site. To the north of the moated site lies a large sandstone quarry, from which the building materials used in the construction and modification of the Hall are believed to have come and which was later reused and adapted to serve as the kennels complex associated with the Hall. To the west of the Hall a further quarry also provided stone for building works at the moat. In the south west corner of this quarry is the entrance to the ice house associated with Harvington Hall. All the arms of the moat remain water-filled. The moat is partly lined with bricks and red sandstone blocks. The main approach to the island is via a Listed Grade I single arched bridge built of red sandstone and reinforced in brick. The buildings on the island rise directly from the moat edge in a sheer face along the inner face of the arms of the moat. On the north west part of the island lie an 18th century chapel and a 17th century malt house both of which are Listed Grade II and are included in the scheduling. There is a second entrance to the island to the south west in the form of a stone built double arched bridge with brick arch linings and which is Listed Grade II. Both entrances are believed to have been original entrances to the moat island.

On the northern side of the moated site, a substantial earthen bank acts as a dam retaining the water against the natural slope away from the site. There is an outlet in the northern angle of the outer bank of the moat ditch, allowing water to flow down hill from the moat. The modern approach to Harvington Hall runs across the retaining bank of the north eastern arm of the moat. The island of the moated site is roughly triangular, orientated north east to south west. The buildings of Harvington Hall are located in the south and east sectors of the island, with the main house in the southern angle. The interior of the island is largely level, although excavations in advance of a drainage trench uncovered archaeological deposits ranging from prehistoric to post- medieval.

To the north east of the moated site, across the modern access road, lies the sub-rectangular pool known as `Gallows Pool' on the late 18th century estate plan. This pond formed the first of a chain of ponds recorded as surrounding the hall in early maps. At the north western end of the pool lies a small separate stone lined pond. This is where the spring rises which feeds the entire system. A cobbled hollow way runs from opposite the eastern end of the quarry arcing towards the Gallows Pool.

The quarry which lies to the north east of the moated site exhibits signs of occupation, including beam slots, tooling and brick lined faces of chimney flues. To the west of the moat lies a second quarry, a further source of building materials for the Hall. This quarry also contains substantial tooling marks and beam slots. In the south eastern angle is a brick lined archway which is the entrance way to the ice house associated with the Hall. The ice house is partly constructed from brick and partly hewn

from the sandstone, it would originally have been stocked with ice taken from the adjacent pond complex. The remains of the ice house are included in the scheduling.

All modern lighting, fencing, garden furniture, and the surface of modern paths and roads are excluded from the scheduling, although the ground beneath these features is included.

Reasons for designation:

Around 6,000 moated sites are known in England. They consist of wide ditches, often or seasonally water-filled, partly or completely enclosing one or more islands of dry ground on which stood domestic or religious buildings. In some cases the islands were used for horticulture. The majority of moated sites served as prestigious aristocratic and seigneurial residences with the provision of a moat intended as a status symbol rather than a practical military defence. Description

Unlisted range of cottages visible on the 1839 Tithe map (described as six houses and gardens) and marked as 'Smithy' on 1st Edition Ordnance Survey. There is no information in the HER as to the buildings prior to 1838. [1][2]

Sales particulars for the cottages show exposed beams inside, and some exterior photos show timber framing. The 1745 Throckmorton Estate map shows a similar row of cottages not far from this location, described as 'Houses and Gardens at Lower Chaddesley'. These may or may not be the same row of cottages. Some timber framing visible on Google Streetview (image date July 2014). Row of cottages, one storey plus attic, red brick with tile gable roofs, some timber framing visible. North gable end has a pediment. Dormer windows above the eaves, variety of chimney stacks along the buildings. Some in need of repair or undergoing renovation. [3][4]

Group of five cottages, on Local List. [7]

Description

Grade II Listed 17th century farmhouse with mid 19th century and late 20th century alterations. Timber-framed with painted brick infill and machine roof tiles. Two storeys, two windows: 3-light casements. Ground floor with entrance to left-hand corner through 19th century lean-to porch with 20th century ledged and boarded door. Framing: two square panels high on first floor with straight tension braces. [1]

Historic Building Assessment carried out in 2007 confirmed the 17th century date. Original layout was two-cell main range with northern wing. Later alterations included 18th century replacement of the wattle and daub with brick nogging and a 19th century extension to the west [2].

Description

Stewards Cottage (formerly listed Stuarts Cottage and 25.2.58 Cottage 150 yards north of bridge to north of Chaddesley Corbett) - II House. 17th century with some early 19th century and mid-20th century alterations. Timber-frame with painted brick infill, tile roof. Two framed bays aligned east/west, gable- end external brick stacks. One storey with attic lit by two gabled dormers. Ground floor: two 3-light casements. Entrance to right of centre has a 20th century panelled door; single-storey 19th century extension to right. Framing: three square panels high, with straight angle braces. [1] [2]

Application for renovation works submitted and approved 2007, with condition for recording [3]

Minor amendment made to the listing entry in 2014. Name changed from Stuarts Cottage to Stewards Cottage [4]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph taken prior to renovation as brick work is still visible, when compared to the rendered building seen on Google Street View, 2018.[5][6]

SCYTHE MILL (15TH CENTURY AD to 20TH CENTURY AD - 1451 AD to 1925 AD)
- Evidence DOCUMENTARY EVIDENCE

SPINNING MILL (19TH CENTURY AD - 1830 AD to 1875 AD)
- Evidence PHOTOGRAPHIC EVIDENCE
- Evidence DOCUMENTARY EVIDENCE

Description

A blade mill was most likely built on the site in the mid 15th century, however evidence of its use is not apparent until the 17th century. During its later life it was converted to a spinning mill for the Kidderminster carpet industry, and then again returned to the blade industry by Nash of Belbroughton. The pool broke in 1925, which is when the mill appears to have ceased to function. [1]

Monument Types and Dates

TREE (POST MEDIEVAL to 19TH CENTURY AD - 1540 AD? to 1830 AD?)

Evidence CARTOGRAPHIC EVIDENCE

Description

1697 Warwick Corporation map marks Watch Oak, at the junction of the then Bromsgrove Lane and the 'Great Road, Bromsgrove Sturbridge'. 1697 map refers to Watch Oak Park, an 18th century map shows Watch Oak Meadow, 1745 Throckmorton Estate Map shows Watch Oak Park and the Chaddesley Tithe map (1839) shows Fox Piece and Pool Meadow. Bromsgrove Lane disappears from mapping after the 1745 Throckmorton Estate map.[1][2][3][4]

Dates for the tree are conjectural, especially start date.[5]

Description

House. Late 15th century, extended early and late 17th century, with some mid 19th and mid 20th century alterations. Timber-frame with painted brick and rendered infill. Two 15th century framed bays aligned north/south, single-bay 17th century cross-wing to south end, two late 17th century rear (east) wings. West front: two storeys, gabled and jettied cross- wing to right; two plus one windows: two 3-light casements, that to left under a gablet, central window a 2-light casement. Ground floor: four plus one windows: various sized casements, entrance to left hand has a flat canopy on 19th century wooden brackets, overlight and 19th century ledged and boarded door. Framing: close-studded with curved tension braces to 15th century part, straight angle braces to 17th century cross- wing. Interior: south bay of 15th century part has a smoke-blackened clasped purlin roof. Staircase of early 18th century to north end has turned balusters and moulded handrail, room to rear has a bolection moulded fireplace. (Buildings of England, p 194). [1][2][3]

Description

CHADDESLEY CORBETT CP A 450 (off east side) SO 87 NE 7/15 Barnett Mill (formerly 10.12.73 listed as Barnett Mill Harvington) - II Mill, now part of house. Dated 1830, with some mid-20th Century alterations. Brick on sandstone plinth with machine tile roof. Two storeys with attic lit by a 20th Century projecting segmental headed dormer; dentilled brick cornice and stone quoins. First floor: three 2-light casements under segmental heads. Wide central entrance with wooden architrave under segmental head; overshot cast iron wheel to right-hand gable (paddles lost). Interior: main gearing survives, but stones removed. [1] [2]

Complex of buildings, farm, cornmill and iron forge. Small farmhouse of brick and sandstone blocks, dates from the 18th century with 19th century additions. Farmhouse adjoins mill. The mill is combined building with a central wheel chamber with a cornmill on one side and a forge on the other with power from waterwheel available on both sides. The Mill was supplied from a half mile leat from Hill Pool, running on a higher level above a brook with well engineered sluices. The Cornmill is built of bricks on sandstone blocks, with satone quoins. A plaque over the door is dated to 1830. The forge collapsed ion the 1960s. The whole complex appears to have been rebuilt 1830 using sandstone blocks from earlier buildings. The Mill is believed to have belonged to Lady Mary Yate in 1675 and Rob Throckmorton by 1747. The Cornmill remains in use in 1934-42. [3] [4]

Included in Survey of Industrial Monuments of 1978. [5] [6]

Description

CHADDESLEY CORBETT DEANSFORD LANE SO 87 NE 1805-/7/10008 Mearse Farmhouse GV II Farmhouse. 18th century; possibly as enlargement of an earlier house, and with 19th century extensions. Flemish stretcher bond red brick. Hipped tiled roof with brick dentil eaves; gable-ended range at rear.Brick end and axial stacks. PLAN: the 18th century front block has a room on either side of the central entrance hall and a third room on the left side. The parallel service range at the back is possibly a 19th century remodelling of an earlier house, extended at either end in the 19th century. EXTERIOR: 2 storeys. Symmetrical 3-bay NW front with central entrance and blind bay set back slightly on left. 18th century mullion-transom 3-light windows with casements and glazing bars, ground floor with cambered brick arches, first floor centre similar but 2-lights. Central wooden doorcase with pilasters, panelled reveals, open pediment with semi-circular fanlight with radiating glazing bars and 6-panel door. Left(NE) end has 20th century ground floor window and panelled door, original 3- light first floor window and gabled attic dormer. Parallel storey and attic range at rear in blue bricks with gabled dormers, extended at either end in red brick. INTERIOR: said to complete and unaltered with 18th century joinery including chimneypieces, doors, window shutters, staircase, plaster ceiling and ironwork etc. [1] [2]

Description

Unclear from list description whether the buildings to the northwest of the farmhouse are still included in the list description or not. It is assumed that they are.

CHADDESLEY CORBETT CP HARVINGTON SO 87 SE 10/37 Harvington Hall Farmhouse (formerly listed as 20.10.52 Harvington Farmhouse and range of farm buildings on north-west) GV II Farmhouse. Early 17th Century, remodelled in c1700, extended mid-19th Century with some late 20th Century alterations. Timber-frame clad in brick on sandstone plinth with machine tile roof. Garden (east) front: two storeys, gables to each end, band to ground floor, stepped brick eaves. Six windows, mostly 3-light casements, the outer windows each have a segmental head, and in the gable above a blind window with segmental head. Ground floor: six windows, 3-light casements under segmental heads alternate with blind windows. Roughly central entrance has a 20th Century tiled gabled canopy and a half-glazed door. Framing: visible internally with close- studding on ground floor. [1] [2]

Description

History:

The cottage appears to have been built in the 17th century as a one and a half storey, timber-framed dwelling, with a two-room plan and a heated room at the south-west end. The brick lean-to, with stepped brickwork to the verge, is a mid-19th century addition that has been altered and extended in the 20th century. In the late 20th century, the cottage was extended to the rear to include a single-storey and two-storey extension with an attached garage to the side; this was converted to form part of the main house in the early 21st century. The interior of the house underwent some modernisation in the late 20th and early 21st centuries.

Details:

MATERIALS: the cottage is constructed of timber-framed square panelling, with brick infill panels; much of the ground floor has been rebuilt in brick. It has a plain clay tile roof, and a brick stack to the south-west gable. There are 21st century uPVC bargeboards applied to the gable ends. The windows are early 21st century timber casements.

PLAN: a rectangular building, aligned on a south-west to north-east axis, with a two-room plan and an inserted cross passage which incorporates the staircase. The heated room is to the south-west end with an external gable-end stack. There is a mid-19th century lean-to added to the south-west end, altered and extended in the 20th century.

EXTERIOR: the one and a half storey timber-framed, 17th century cottage has a gabled north-east elevation with square panel timber-framing with straight braces and brick infill. The ground floor, largely rebuilt in brick, has a three-light window, and to the gable are a pair of two-light windows. The roof truss comprises a tie beam, with three vertical struts supporting the collar above with vee-struts to the principal rafters.

The two-bay north-west elevation has brick to the ground floor and square-panelling above, with brick infill panels. Straight braces denote the extent of the two bays. The ground floor has five two-light windows that flank the now blocked, off-centre entrance. To the right is the end wall of the lean-to with stepped brickwork to the verges.

The south-west elevation has a two-light window in the gable, to the left of the brick stack that partially obscures the roof truss. The vee strut and two of the vertical struts to the collar are visible.

A dormer window has been inserted to the rear (south-east) elevation and the roof has been extended to form a catslide roof incorporating a late 20th century single-storey addition.

INTERIOR: the 17th century cottage is accessed through the late 20th century extension, and its timber-framed rear wall now forms an internal wall. The north-east room has an axial 17th century chamfered ceiling beam with stepped stops at its south-west end. It is supported by a 20th century brick pillar. The 17th century cross frame forms the partition wall, and an opening has been created to give access to the inserted cross passage and the heated room beyond. Within the cross passage is a 20th century staircase, accessible from the rear extension. The south-west room has a 17th century chamfered beam which runs through the later partition and has stepped stops where it meets the 17th century cross frame. The timber-framed gable end wall is visible in the lean-to addition at the south-west end. The rear wall has been removed giving access to the later 20th century single-storey addition.

At first floor a doorway has been cut through the tie beam of the internal cross frame, and an additional partition wall inserted between this and the north-east wall to form a corridor providing access to the 20th century rear extension. The purlins and the three17th century roof trusses are extant with their tie beams, collars and principal rafters.

Pursuant to s1 (5A) of the Planning (Listed Buildings and Conservation Areas) Act 1990 it is declared that the late 20th century single-storey and two-storey extension to the rear (south-east) elevation and the late 20th century single-storey extension to the side (north-east) elevation are not of special architectural or historic interest.

Reasons for designation:

Cakebole Cottage, a 17th century timber-framed dwelling, is listed at Grade II for the following principal reasons:

Architectural interest:

* as a good example of a 17th century timber-framed cottage with a two-room plan;
* the building retains a significant proportion of its 17th century fabric including much of its timber framing, chamfered ceiling beams and roof trusses.

Historic interest:

* for its illustration of 17th century timber-framed building techniques. [1] [2]

Description

SO 87 SE CHADDESLEY CORBETT CAKEBOLE 1805-0/10/10014 Cakebole House II Farmhouse. 18th Century, remodelled in circa early 19th Century. Red brick English garden wall bond, heightened in Flemish garden wall bond brickwork. Low-pitched hipped slate roof with lead rolls to hips and ridge and with deep eaves. Brick stacks on sides. PLAN: Double-depth plan with central entrance passage between two principal front rooms, leading to stairhall at the rear flanked by two back rooms, that to the left is the kitchen. The rear right-hand wing was extended in the 20th Century. EXTERIOR: 3 storeys and attic. Nearly symmetrical 3-window South East front, the widows and central doorway disposed a little to the left. 19th Century 16-pane sashes, centre first floor 12-pane sash and on second floor 8-pane sashes; the ground and first floor windows are in earlier openings with cambered arches, now covered by rendered heads with keyblocks. Doorway to left of centre with moulded doorcase with cornice and console brackets with small later canopy, flush 6-panel door, top four panels glazed. South West side has two sash windows on ground floor. At rear, North West, a lower wing extended in 20th Century. INTERIOR largely intact and retaining many features. 18th Century and 19th Century joinery including panelled doors, window shutters and an early 19th Century mahogany open-string staircase with stick balusters, column newels and moulded handrail. Moulded plaster ceiling cornices. Drawing and dining rooms have circa mid 19th Century marble chimneypieces with cast-iron grates. [1] [2]

FARMSTEAD (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Description

Early 18th century, remodelled early 19th century. Brick with stuccoed front, hipped slate roof and gable-end stacks. Two storeys; boarded eaves and plaster quoins. Three windows: 16-pane sashes in chamfered reveals with square labels. Ground floor: central entrance has pilastered wooden door- case with open pediment, radially glazed fanlight, panelled reveals and 6-panelled door. [1][2]

Newhouse Farm, Chaddesley Corbett. Partially extant 18th century listed farmstead with unconverted buildings. Regular courtyard with L-plan range plus detached buildings to the third side of the yard. Prominent L-plan loose courtyard in association, with three sides of the courtyard formed by working agricultural buildings. The farmhouse is detached with gable on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located on the site. [3][4]

West Midlands Farmsteads and Landscapes Project Regional Statement [5]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [6][7]

Farmhouse: 18th century. Brick, stuccoed front, slate roof. Working building(s): 19th century (?) [8]

Description

CHADDESLEY CORBETT CP TANWOOD LANE (off south side) SO 97 SW 11/44 Tanwood Stud - II Shown on OS as Woodside Farm. Farmhouse. 17th century, clad early 18th century, with some mid-20th century alterations. Timber-frame clad in brick; tile roof. Three framed bays aligned north-east/south-west; large external brick stack to north end with three diamond-plan brick shafts. Two storeys, band to ground floor. Three windows, 2-light casements. Ground floor: 3-light casement to left, 2-light casement to right, both under rubbed brick heads. Central entrance has a 20th century timber porch with hipped lean-to tiled roof; door, 20th century, flanked by two fixed casements. [1] [2]

Farmhouse at Woodside Farm/Tanwood Farm (Woodside Farm), Chaddesley Corbett. Partially extant 17th century listed farmstead with unconverted buildings. Regular courtyard of U-plan. Additional, prominent detached elements to the main plan. The farmhouse is detached and set away from the yard. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located on the site. [3][4]

West Midlands Farmsteads and Landscapes Project Regional Statement [5]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [6][7]

Farmhouse: 17th century. Timber framed, clad in brick, tile roof. [8]

Description

CHADDESLEY CORBETT CP VILLAGE STREET (east side) SO 8873 - 8973 14/55 Feversham Cottage (formerly listed as a part of Liberty Hall. Range of 20.10.52 6 houses to the south of Liberty Hall) GV II House. Early 18th century with some late 20th century alterations. Timber-frame with rendered infill and machine tile roof. One storey with attic lit by four gabled dormers. Ground floor: three windows. Two 3-light casements to left, to right oriel bow window with domed leaded roof. Entrance to right of centre has a flat wooden canopy and 20th century glazed door. Framing: three square panels high. (Anon, Notes on Chaddesley Corbett Village Street, nd). [1][2]

These are the best timber framedhouses in the village street. Building dates are not known, not shown on map of 1697. Earlier this century used as seven cottages. In the 1960s converted into four cottages, but their frontages are largely unchanged.[3][4]

Dates are conjectural as map evidence not conclusive. Site marked as Workhouse on 1745 Throckmorton Estate map, see WSM39781.[5][6]

Material digitised as part of NHPP7624 Charles Archive Project. Survey and report of 'Number 1, Chaddesley Corbett'.[7] Viewing Google Street View, this building is identified as 3 Batch Cottages, when comparing the elevation drawings in source [7] and Street View.[8][9]

Material digitised as part of NHPP7624 Charles Archive Project. Photograph of the village looking south, includes 3 Batch Cottage. [10]

Monument Types and Dates

WALL (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	ASHLAR
Main building material	SANDSTONE

Description

CHADDESLEY CORBETT CP VILLAGE STREET (west side) SO 8873 - 8973 14/64 Churchyard wall to south and east sides of the Church of St Cassian GV II Churchyard wall. Probably 18th century with some 19th century and mid-20th century repairs. Sandstone ashlar. Wall to east and south sides of churchyard stands three to four courses high on worn chamfered plinth with simple chamfered stone coping.[1][2]

The digitised shape includes the sandstones steps on the south eastern corner of the churchyard and the lychgate in the north east corner. Both structures appear contemporary with the wall and are attached to it. Presumably neither of these structures is Listed as they are not mentioned in the List description, however, any works to them would affect the setting of the wall.[3]

WAR MEMORIAL (20TH CENTURY AD to 21ST CENTURY AD - 1903 AD to 2050 AD)

Evidence	STRUCTURE
Main Building Material	STONE

Description

CHADDESLEY CORBETT CP VILLAGE STREET (west side) SO 8873 - 8973 14/59 Churchyard cross about 10 metres south of 25.2.58 Church of St Cassian GV II Cross. Probably 15th century, restored 1903. Sandstone ashlar. Three square plan steps lead up to square socket stone, octagonal top formed by stops to corners, early 20th century octagonal shaft with finial. Inscription on north side of socket stone: "To the glory of God/ and in loving memory of/ Henry Harris Oldnall, Captain RNA/ who died at Z ....., South Africa, January 29th 1901/ This ancient cross was restored 1903".[1][2][3][5][6]

The 3 steps are 2.8m square at ground level and 0.9m high. The unusually large socket stone is 0.75m high and 1.1m square with chamfered corners. According to inscription, the cross was restored in 1903, and the unweathered appearance of the steps suggests that they might be of this date.[4]

Monument Types and Dates

METHODIST CHAPEL (Built, (between) 19TH CENTURY AD to 21ST CENTURY AD - 1873 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main Building Material	BRICK
Covering Building Material	SLATE

Description

Photographic recording was performed on 29th November 2012 on condition of planning consent. The photo's depict a 19th century red brick building in a English bond with yellowbrick quions. Slate covered roof with dentilated eaves and ceramic finial with victorian gothic stained glass windows. Stucco plaques suggest the building dates to August 11th 1873 with a stone laid by Mr Charles Mann, minister James Tristram. [1]

HER Number	Site Name	Record Type
WSM48319	Possible Romano British Pit, West of Chaddesley Wood, Chaddesley Corbett	Monument

Monument Types and Dates

PIT (ROMAN - 43 AD to 410 AD)

Evidence SUB SURFACE DEPOSIT

Description

In 1985 the Esso Midline Pipeline watching brief identified a pit feature roughly 1.5 meters wide and an unknown length filled with sandy-clay containing burning and charcoal. Within the pit 47 sherds of Romano British pottery were discovered. [1]

Archaeologist site diary condition makes it difficult to ascertain if the pottery was definitely collected from the pit or elsewhere in the stripped area. [2]

WSM50819	Barn Cottage (Old Barn), Chaddesley Corbett	Building

Monument Types and Dates

OUTFARM (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Description

Barn Cottage (Old Barn), Chaddesley Corbett. Partially extant 19th century (?) unlisted outfarm with converted buildings. Regular courtyard of L-plan. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located to the side of the site. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Working building(s): 19th century (?) It is possible that the outfarm historically had an attached farm labourers cottage (LP character?) [6]

WSM51990	The Old Barn, Cakebole Lane, Chaddesley Corbett, Kidderminster	Building

Monument Types and Dates

(Former Type) BARN (Built, 18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

18TH CENTURY AD - 21ST CENTURY AD

Evidence	EXTANT BUILDING
Main Building Material	BRICK
Main Building Material	TIMBER
Covering Building Material	TILE

Description

Large timber framed barn, potentially 18th century, now a dwelling. Horizontal timber boarding over brick plinth. Plain clay tile roof with inserted roof-lights. [6]

Component of partially extant, 17th century unlisted farmstead with converted buildings. Regular courtyard L plan, plus additional detached buildings. The farmhouse is detached and set away from the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within a loose farmstead cluster. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement. [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement. [4][5]

Description

Recorded as part of the Worcestershire Farmsteads and Landscapes Project. [1][2]
West Midlands Farmsteads and Landscapes Project Regional Statement. [3]
Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement. [4][5]

A level 3 building recording was undertaken in 2016 by Worcestershire Archaeology prior to redevelopment. A photographic survey of the interior and exterior was carried out, along with historical research and phased plans. The current house is built on the site of an earlier building, visible on a map of 1745-6. It is contructed with materials and techniques typical of the early 19th century and is a substantial three storey brick structure. There was a clear delineation between spaces used by the family and their staff. The house was built with provision for agricultural workers, including a second kitchen to the rear of the property. A few small agricultural buildings remain around the house, although those to the south were largely truncated and altered in later periods so their original functions are not clear. Many of the agricultural buildings associated with the farm were demolished from the 1970s, with those on the western side sold as a separate property. The structure of the house was little altered through the 20th century, although many internal original details have been removed or obscured by plaster and carpet. [6]

17th-19th century farmhouse and barns. House is red brick with plain tile roof. Central stack. Principal range of 3 storeys. 3 windows under brick arched heads. Central doorway with classical timber surround and fanlight. [7]

FARMSTEAD (18TH CENTURY AD to 21ST CENTURY AD - 1750 AD? to 2050 AD)

Evidence CARTOGRAPHIC EVIDENCE

Description

Woodhouse Farm, Chaddesley Corbett. Partially extant 18th century, unlisted farmstead with unconverted buildings. Regular courtyard with L-plan range plus detached buildings to the third side of the yard. Additional, prominent detached elements to the main plan, including a covered yard, and smaller secondary yard. The farmhouse is detached with gable on to the yard. There has been significant loss (greater than 50%) of traditional buildings. Isolated location. Horse engine house located within the farmstead. Large modern sheds are located on the site. [1][2]

WSM54135	Neild House, Chaddesley Corbett	Building

Monument Types and Dates

FARMSTEAD (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Description

Neild House, Chaddesley Corbett. 19th century (?) unlisted farmstead with converted buildings. Regular courtyard of L-plan. The farmhouse is detached with side on to the yard. The farmhouse is the only surviving historic structure. Isolated location. Large modern sheds are located to the side of the site. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Farmhouse: 19th century - 20th century Working building(s): 19th century (?) The site developed from an outfarm (see 1st Edition and the transcription of the 1838 Chaddesley Corbett tithe). Comparison of the 1999 and 2005 APs indicate that the farm buildings have been replaced by a new build on the same footprint [6]

FARMSTEAD (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Description

The Fruit Farm, Chaddesley Corbett. Partially extant 19th century (?) unlisted farmstead with unconverted buildings. Loose courtyard with a single side of the courtyard formed by working agricultural buildings. The farmhouse is detached with gable on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within a loose farmstead cluster. Large modern sheds are located to the side of the site. [1][2]

WSM56935	Area of Palaeolithic Potential, Glaciofluvial Deposits	Geology

Monument Types and Dates

ENVIRONMENTAL DEPOSIT (Marine Isotope Stage 06 to Marine Isotope Stage 02 - 189050 BC to 12050 BC)
Evidence ENVIRONMENTAL REMAINS

Description

Potential presence of deposits with geological significance (ie: proves presence/extent of Anglian, Saalian and Devensian glaciation). These deposits could be suitable for radiometric and/or luminescence dating. They may also contain palaeo-environmental remains associated with glacial environments, particularly during deglaciation/glacial retreat. There is additionally limited potential for unstratified/reworked artefactual remains. The deposits are dated to Marine Isotope Stage 6 to Stage 2.

In 2013 research was performed by Worcestershire Archive and Archaeology service for the National Heritage Protection Plan Project "Putting the Palaeolithic into Worcestershire's HER". The project identified a number of areas of palaeolithic potential. [1]

HER Number	Site Name	Record Type
WSM56937	Area of Palaeolithic Potential, Holt Heath Sand and Gravel Member	Geology

Monument Types and Dates

ENVIRONMENTAL DEPOSIT (Marine Isotope Stage 05d to Marine Isotope Stage 02 - 113050 BC to 12050 BC)

Evidence ENVIRONMENTAL REMAINS

Description

Stourbridge beds containing Ipswichian (Marine Isotope Stage 5e) fauna including Hippopotamus at base of Holt Heath in Stour Valley. It is unknown whether this presence occurs elsewhere in the Severn system. Interbedded organic beds occur within the Holt Heath gravels elsewhere, particularly noteworthy being Upton Warren where Devensian faunal and palaeoenvironmental remains were recovered. Chronology of deposition of the Holt Heath Member is poorly understood but Luminescence Dating has been successful, therefore refining the chronology of this member is a priority. The deposits are dated to Marine Isotope Stage 5d to Stage 2. In 2013 research was performed by Worcestershire Archive and Archaeology service for the National Heritage Protection Plan Project "Putting the Palaeolithic into Worcestershire's HER". The project identified a number of areas of palaeolithic potential. [1][2]

Unknown potential for palaeo-environmental, artefactual, human and faunal remains. Given extensive presence of material from similarly dated deposits at Beckford, Aston Mill which indicates potential.

In 2013 research was performed by Worcestershire Archive and Archaeology service for the National Heritage Protection Plan Project "Putting the Palaeolithic into Worcestershire's HER". The project identified a number of areas of palaeolithic potential. [1]

A well preserved mammoth tusk was found during quarry work at Clifton in 2016 and reported to Worcestershire Archaeology (see event WSM46456). It was recovered from lower deposits of the Worcester Member sand and gravel Terrace 2, so is likely to have been deposited around 16,000 BP. However, the tusk is likely to have been displaced by glacial melt water as it was not found in situ, so may be considerably older. [2]

HER Number	Site Name	Record Type
WSM57742	Site of buildings at Weybridge Forge, Belbroughton	Monument

Monument Types and Dates

OUTBUILDING (18TH CENTURY AD to 20TH CENTURY AD - 1750 AD? to 1950 AD?)
Evidence CARTOGRAPHIC EVIDENCE
PIGSTY (18TH CENTURY AD to 20TH CENTURY AD - 1750 AD? to 1950 AD?)
Evidence CARTOGRAPHIC EVIDENCE

Description

Historic mapping shows outbuildings associated with forges at Weybridge. One appears to be a pigsty. Dates are conjectural as these are not shown on the Throckmortin Estate map of Chaddesley Corbett (1745) but are on the Belbroughton tithe map (1840) and the early Ordnance Survey mapping. The above maps do not all show buildings in the same location. This has been described as a complex site in the records for the forge buildings (WSM02288 and WSM02289).[1][2][3][4][5]

Monument Types and Dates

FARMSTEAD (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Description

Pleremore, Chaddesley Corbett. Partially extant 19th century (?) unlisted farmstead with converted buildings. Loose courtyard with three sides of the courtyard formed by working agricultural buildings. The farmhouse is detached and set away from the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within a loose farmstead cluster. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Farmhouse: 19th century (?) Working building(s): 19th century (?) Homestead recorded on tithe. The site possibly had no agricultural function by the early 20th century. Converted coach house [6]

Historic Farmsteads: A Manual for Mapping [7]

WSM61498	Woodhouse Farm, Chaddesley Corbett	Landscape Component

Monument Types and Dates

FARMSTEAD (18TH CENTURY AD to 21ST CENTURY AD - 1750 AD? to 2050 AD)

Description

Woodhouse Farm, Chaddesley Corbett. Partially extant 19th century (?) unlisted farmstead with unconverted buildings. Regular courtyard with L-plan range plus detached buildings to the third side of the yard. Additional, prominent detached elements to the main plan, including a covered yard, and smaller secondary yard. The farmhouse is detached with gable on to the yard. There has been significant loss (greater than 50%) of traditional buildings. Isolated location. Horse engine house located within the farmstead. Large modern sheds are located on the site. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Farmhouse: 19th century (?) Working building(s): 19th century (?) [6]

Historic Farmsteads: A Manual for Mapping. [7]

Tithe no. and description; 558 Woodhouse Farm Buildings, Garden, Yards etc. Occupant during 1901 census; Hill. [8]

This farm is not shown on the 1745 Throckmorton Estate map, the area is woodland (Lower Vicarage Wood), there is a map, dated only as 18th century, which shows the land as owned by Sir John throckmorton, and shows the farmhouse (described as House Garden Rickyard etc). This would suggest that the farm was built after 1745 but before 1800.[9][10][11]

FARMSTEAD (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Description

Drayton House, Chaddesley Corbett. Partially extant 18th century listed farmstead with converted buildings. Loose courtyard with three sides of the courtyard formed by working agricultural buildings. Additional, prominent detached elements to the main plan. The farmhouse is detached and set away from the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within or in association to a hamlet. Dovecote located within the farmstead. [1][2]

HER Number	Site Name	Record Type
WSM67320	2 Tanwood Cottages, Tanwood Lane, Chaddesley Corbett	Building

Monument Types and Dates

HOUSE (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Covering Building Material	CLAY
Main Building Material	BRICK
Evidence	EXTANT BUILDING

Description

A small two-storey early 19th century cottage in garden plot (possibly of earlier origins), rendered/painted brick construction with clay tile roof. Stacks to the east and south gables. There are large single storey non-pitched mid 20th century extensions to the west and north elevations. [1] [2]

The building is not currently listed although it has been proposed for inclusion on the Wyre Forest District Council Local Heritage List for Chaddesley Corbett. [3]

Tanwood Cottages underwent a building recording in 2016, performed by Martin Cook. The work identified that the original structure comprised a one-up-one-down rectangular cottage built before 1838 with walls half-a-brick thick, a single door in the south-east elevation and a single window on each floor of the north-west elevation. Redundant mortice and tenon joints in the first floor timber suggested re-use from an earlier timber framed structure. Between 1838 and 1902 the cottage was extended to the south-east, a new entrance installed new windows on each floor and a new hearth. A large beam supporting the first floor of the extension appears to have been taken from a earlier higher status building. A privy and pig sty was also added between 1838 and 1902, constructed of brick and tile. A further extension was added to the south west between 1902 and 19278 including a new kitchen/ diner, and a garage/workshop added in to the north – east. [4]

Monument Types and Dates

SCHOOL (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main Building Material	BRICK
Covering Building Material	TILE

Description

School. Probably mid-18th century; early 19th century and late 20th century alterations. Brick, with clay tile roof, gable stacks. One storey, dentilled eaves, five windows: modern timber replacement: each of 3 multi-pane casements set below overlapping gothic arched head. Central window flanked by twin entrance doors with gothic arch profile. East-west orientation. East gable features inscribed stone tablet: “These schools were rebuilded and enlarged 1809....James Pratt Esq”. Small modern extension to north gable of similar design, lower ridge and plain casement windows. Original twin entrance doors on south elevation open directly into St. Cassian’s churchyard. Formerly no direct access from school playground, access provided in 1990 through new extension and additional fire door. [1][2]

HER Number	Site Name	Record Type
WSM69674	Ridge and furrow earthworks east of Chaddesley village, Chaddesley Corbett	Monument

Monument Types and Dates

RIDGE AND FURROW (MEDIEVAL - 1066 AD to 1539 AD)

Evidence EARTHWORK

Description

Ridge and furrow earthworks surveyed in 1999-2000 as part of the ridge and furrow volunteer project. Very complicated field. A large pool has been made in recent years on the south-west side South of earthworks. On East side ridges are going in different directions? The headland is for half of the ridge and furrow. Conjectural line of Roman Road through the west side of the field.[1][2]

Field name on the tithe map is 'Old Gore' which comes from the name for land in the 'angle where two furlongs adjoin'. This would explain the complex earthworks in the field recorded in the survey.[3][4][5][6]

WSM69683	Ridge and furrow earthworks in Chaddesley Wood, Chaddesley Corbett	Monument

Monument Types and Dates

RIDGE AND FURROW (MEDIEVAL - 1066 AD to 1539 AD)
Evidence EARTHWORK

Description

Ridge and furrow earthworks surveyed in 1999-2000 as part of the ridge and furrow volunteer project. There is usually deep vegetation here. Earthworks only visible because of clearing and winter die back This ridge and furrow runs just inside the woodland at the parish boundary. There is what appears to be an old boundary ditch within the wood at the side of the earthworks.[1][2]

Monument Types and Dates

Description

Farm building present on the 1885 1st edition OS Map of Chaddersley Corbett but no longer extant on modern mapping. [6][7] [8]

Harvington Hall Farm, Chaddesley Corbett. Partially extant 17th century listed farmstead with converted buildings. Regular courtyard . Additional, prominent detached elements to the main plan, including a smaller secondary yard. The farmhouse is detached with side on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Located within a Church and/or Manor farm group. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Description

Two areas of possible archaeological activity were detected between Harvington Hall and Winterfold Cottages during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G19 - WSM70442). Two tentative linear features were identified in the west and possible circulinear features to the east of the survey area - these geophysical anomalies may relate to structural remains. Historic ploughing activity aligned east to west and north to south was also visible across the survey area, including ploughing headlands. [1]

Five trial trenches were excavated across this area in autumn 2016 by AOC (WSM70492). No archaeological features or activity was identified. [2]

Description

Tentative archaeological activity was detected in the field north of Chasser House during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G20 -WSM70442). Several very tentative linear and curvilinear features of archaeological origin were identified in the south-western corner of the survey area. Ploughing activity aligned north-west to south-east along with a headland by the western field boundary were also detected. [1]

Four trial trenches were excavated across this area in autumn 2016 by AOC (WSM70492). No archaeological features or activity was identified. [2]

Description

Two areas of possible archaeological activity were detected north of The Pound, Bluntington during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G27 - WSM70442). In the northern section of the survey area a group of curvilinear features were identified, and in the south a second set of linear features, predominately aligned east-west, were detected. These geophysical anomalies may relate to an enclosure or other structural remains, but interpretation is difficult from the results. Historic ploughing activity aligned east to west also visible across the northern extent of the survey area, along with a plough headland aligned north-south against the western edge. [1]

Sixteen trial trenches were excavated across this area in autumn 2016 by AOC (WSM70492). No archaeological features or activity was identified. [2]

Monument Types and Dates

FEATURE? (Unknown date)

Evidence TERRESTRIAL MAGNETOMETER READING

Description

Linear and curvilinear anomalies of uncertain origin were detected south of Melody Cottage, Drayton during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G30 - WSM70442). It is possible these tentative geophysical anomalies may relate to structural remains, but interpretation is difficult. [1]

Survey areas G30-33 all detected possible archaeological features, suggesting that this is an area of extensive archaeological activity (see WSM20018, WSM70454-5). [1] [2]

Two trial trenches were excavated across this area in autumn 2016 by AOC (WSM70492). No archaeological features or activity was identified. [3]

Description

Linear, curvilinear and pit-like features were detected south-west of Sam Spencer Court, Mudstow Green during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G16 - WSM70442). Several curvilinear and linear anomalies that are possibly archaeological in origin were detected across the survey area. These lack any obvious form or shaping and do not appear to represent identifiable structures. Four pit-like anomalies were also detected in the south-west. Further tentative linear features may relate to agricultural practices. [1]

Monument Types and Dates

ENCLOSURE? (Undated)
Evidence CROPMARK
FEATURE? (Unknown date)
Evidence TERRESTRIAL MAGNETOMETER READING
LINEAR FEATURE? (Unknown date)
Evidence TERRESTRIAL MAGNETOMETER READING

Description

Two possible archaeological features were detected west of Harvington Hall Farm during a geophysical survey undertaken in 2016 as part of the Birmingham Resilience Project pipeline (area G22 - WSM70442). Both possible features lie within the north of the survey area. The linear anomaly was aligned north-west to south-east, whilst the curvilinear response ran broadly east to west. [1]

A double-ditched square enclosure is visible as cropmarks on aerial photographs taken July 15th 2002. Fairly regular in appearance, though none of the corners are quite right angles. The cropmarks are not sufficiently clear to determine internal features or entrances. (Aerial Photograph: NMR 21694/01 SO 8874/1 15-JUL-2002). [2]

The National Record of the Historic Environment entry for this record also referenced the following event (1387393 EH Aerial Reconnaissance (South): 2002-3). [2]

This record includes National Record of the Historic Environment Information provided by Historic England on 9th April 2019 licensed under the Open Government Licence: http://www.nationalarchives.gov.uk/doc/open-government-licence/version/3/. [2]

Monument Types and Dates

HOUSE (18TH CENTURY AD - 1701 AD? to 1800 AD)

Evidence	EXTANT BUILDING
Covering Building Material	TILE
Main Building Material	BRICK

Description

Bluntington Cottage is seen from the tithe map of Chaddesley Corbett dated to 1839. It is together with a barn and garden Occupied by Thomas Lea and owned by Thomas Poole. This building does not appear on the estate map of 1745, as this area is still common land owned by Sir Robert Throckmorton.[1][2]
The building appears as an L shape on the tithe map, however, on the 1st Edition OS map and subsequent OS maps it has been altered on its south eastern elevation. The barn and cottage are also separated by the 1st Edition.[3]
The neighbour of this property has informed us of a Roman mosaic, that was discovered by the owners, in the garden and there is a hidden room and cellar within the house. The conjectured Roman road WSM30543 passes next to this property, which could have some connections, however, this is unconfirmed.[4]
The cottage is single storey with attic, with 3 gabled dormers on the north eastern elevation and a gabled proch and off centre front door. The cottage is white rendered and the roof is tile with dentilation under the eaves and two brick chimney stacks. Some alteration and extension at the rear of the cottage has occured at some time in the modern period. [5]

Monument Types and Dates

BOUNDARY BANK (LATE 11TH CENTURY AD to 19TH CENTURY AD - 1066 AD to 1900 AD)

Evidence EARTHWORK

Description

A post-Mediaeval or earlier linear boundary delimiting one edge of pasture fields and a surviving pocket of old coppiced woodland. It stands as a scarp 0.8 metres high which runs for at least half a kilometre. It now marks the parish boundary between Churchill and Blakedown parish and Chaddesley Corbett parish to the South. Although shown as a field boundary on the Ordnance Survey 1889 map, the parish boundary then followed a different course. (Comments made by N Smith, English Heritage Field Investigator 20-Feb-2003. Ordnance Survey 1st edition 25" 1889.) [1]

HER Number	Site Name	Record Type
WSM73566	Former Coach House, Tanwood Lane, Chaddesley Corbett	Building

Monument Types and Dates

COACH HOUSE (MODERN - 1901 AD to 2050 AD)

20TH CENTURY AD - 21ST CENTURY AD

Covering Building Material	TILE
Evidence	EXTANT BUILDING
Main Building Material	BRICK

Description

Possible former coach house. Single bay and single storey with loft, brick built with dentilation under roof eaves. The roof is tile. The north elevation has a double width window with large lintel over. There is a doorway to the left of the double width opening which has an archway over the top. On the west elevation there is a window in the loft space and a catslide roof that extends from underneath it. This building is a single bedroom house.[1][2]
This building is seen from the 2nd Edition OS map dated to 1902 and is presumed to have been built some time prior to this.[3]

Historic elements - The building was constructed by Charles Mann in 1892; a local builder who was responsible for much early housing in Bluntington, as well as the (former) Methodist Chapel in Tanwood Lane, which has been converted to residential accommodation in a tasteful manner and retains many original features; work done within the original construction and footprint, maintaining proportion and size. The Coach House (which is too small to house a 'coach') was where a 'trap' was parked, with a pony (not a horse) alongside, and the hay in the loft above. This indicates the scale of the design of the building. There are few examples of Mann's artisan buildings remaining in their original form and development on this site ought to retain as much of this element of local history as possible. Complete demolition ought to be reconsidered since it would destroy local links with the past. [4]

Broad Type	HLC Type	Confidence
Civic and Commercial	Hotel	Certain

Period

20TH CENTURY AD to 21ST CENTURY AD - 1946 AD to 2050 AD

Full Description

Stone Manor Hotel. The Medieval Stone Manor was sited on the estate grounds for many years, dating back to the Doomsday Book, but was destroyed by fire. In 1926, James Culcheth Hill rebuilt Stone Manor as his private dwelling with many of the timber structures being re-sited from the last "Fighting Man of War" to go in to battle under sail, H.M.S ARETHUSA, which was built in 1849 and decomissioned in the 1930s. In the late 1960's Stone Manor became a private members club, and in 1970 became a Hotel. The hotel has gardens, tennis court, swimming pool and restaurant. (http://www.stonemanorhotel.co.uk/about-us.php Date Accessed 5-Jan-2011).

Broad Type	HLC Type	Confidence
Woodland	Ancient Semi-Natural Woodland	Probable

Period

MEDIEVAL - 1066 AD to 1539 AD

Full Description

Caddeseley Wood is a large area of ancient oak woodland, once part of the Royal Forest of Feckenham and quite possibly the ‘wood of two leagues’ which is mentioned in the Domesday Book. Designated a NNR and a SSSI in part, it’s especially notable for the rare terrestrial caddis insect. You’ll find hornbeams, Midland hawthorns, wild service trees and small leaved limes here too. (http://frontpage.woodland-trust.org.uk/ancient-tree-forum/atfscapes/focus/worcestershire.htm).

Broad Type	HLC Type	Confidence
Fields and Enclosed Land	Modern Sub-division	Certain

Period

20TH CENTURY AD to 21ST CENTURY AD - 1946 AD to 2050 AD

Full Description

Formerly part of Hartlebury Common which comprises 220 acres of land officially established under the Enclosure Act of 1821. It is unique for two reasons: firstly it has been `common land' since at least the mediaeval era and so has never been cultivated; and in addition it is Worcestershire's only heathland bog and contains several species of plant that occur nowhere else in Worcestershire. Additional attribute data for Fields and Enclosed Land: Other Internal Boundary Morphology: None. Does not contain area of Copse/Covert. Ridge and Furrow not present.

Additional Information

Parish of: STONE.

Full Description

Winterfold House School is a Roman Catholic school and is centred around a spacious Georgian house set in nearly 40 acres of attractive grounds, surrounded by traditional English countryside of gently rolling farmland and pasture. This is the setting for our playing fields, pitches, woods and gardens. Winterfold, which has for some years been the seat of the Harwards, (fn. 5) is a red brick mansion standing in a wellwooded deer park.From: 'Parishes: Chaddesley Corbett', A History of the County of Worcester: volume 3 (1913), pp. 35-43. Your Place Matters:

Community Planning Toolkit for the Future of Rural Buildings and their Setting

Historic England

worcestershire county council

Authorship and Copyright
This toolkit has been written by Emily Hathaway of Worcestershire County Council Archive and Archaeology Service and Jeremy Lake of Historic England.

Copy editing and graphic design
This toolkit has been copy edited and designed by Sarah Austin MSc.

Acknowledgements
Many thanks to the following individuals and organisations for their constructive comments and suggestions in support of this publication: Lara Bishop, Steve Bloomfield, Pete Boland, Clifton upon Teme Neighbourhood Planning Steering Group, Jack Hanson, Leigh and Bransford Neighbourhood Planning Steering Group, Cody Levine, Adam Mindykowski, Aisling Nash, Maggi Noke, Tom Rogers, John France and Carol Wood.

Thanks also goes to Damian Grady from Historic England's Aerial Reconnaissance, for his beautiful aerial photographs which capture the diverse character of the county's settlements and landscapes.

Cover image
This photograph of Manor Road in Little Comberton, records buildings in the historic core of the village, dating from the 16th century to the 19th century. The buildings reflect both local vernacular traditions and national trends in architectural style and are set close to the road within narrow building plots that back directly onto farmland creating a sense of connectivity to the rural landscape. Little Comberton, like many small, nucleated villages in Worcestershire, is characterised by a compact and well defined core with clusters of wayside cottages and larger, detached houses and farmsteads, which form a linear building line, interspersed with green space, including traditional orchard. The strong building line contributes significantly to the attractive visual character of the village, which is designated as a Conservation Area. 20th century infill and expansion has developed to the north of the Conservation Area, occurring between the denser area of settlement, around the medieval church, and more scattered settlement to the north, along Wick Road. Section 1

Introducing the Toolkit for your Community-led Plan

Overview

All rural places and buildings are a reflection of how people have lived, worked, thought and related to each other throughout history. Rural settlement is at the core of our everyday lives and provides a base from which we view and experience the wider landscape. The villages, hamlets, farmsteads, and houses that we call home, connect us to each other and to our shared sense of history.

Understanding the series of changes that have created a place over time, can inspire and guide future changes, including the scale, style, form and location of new development, as well as opportunities presented by the natural and historic environment.

This toolkit is aimed at community planning groups and the professional advisors who support them, and can also be used by those undertaking research into individual areas. It responds to a need identified in workshops and national research (Locus Consulting, 2013), for guidance which helps communities and researchers to understand place as the result of past change, and the opportunities that this offers for the future.

It will help you step back and see your area in its broad context, and by following the step-by-step exercises, will enable you to identify the historic character and distinctive qualities of your area. Through assessing the character of your local landscape you will gain a deeper understanding that

will enable you to identify, evaluate and guide opportunities for change. This new understanding can then be used to develop locally tailored and informed policies within a community-led plan that can be referred to when planning applications are submitted in response to development opportunities.

Using a new understanding

'Your Place Matters: Community Planning Toolkit for the Future of Rural Buildings and their Setting' has been designed by Worcestershire Archive and Archaeology Service and Historic England, in collaboration with community groups to help you:

- Identify and then champion the distinctive characteristics of your area, focusing on how all buildings of different dates are sited and experienced within the landscape.

- Identify and assess the forms of settlement, buildings and other landscape features that make up the whole environment, afford habitats for wildlife and make it special for people.

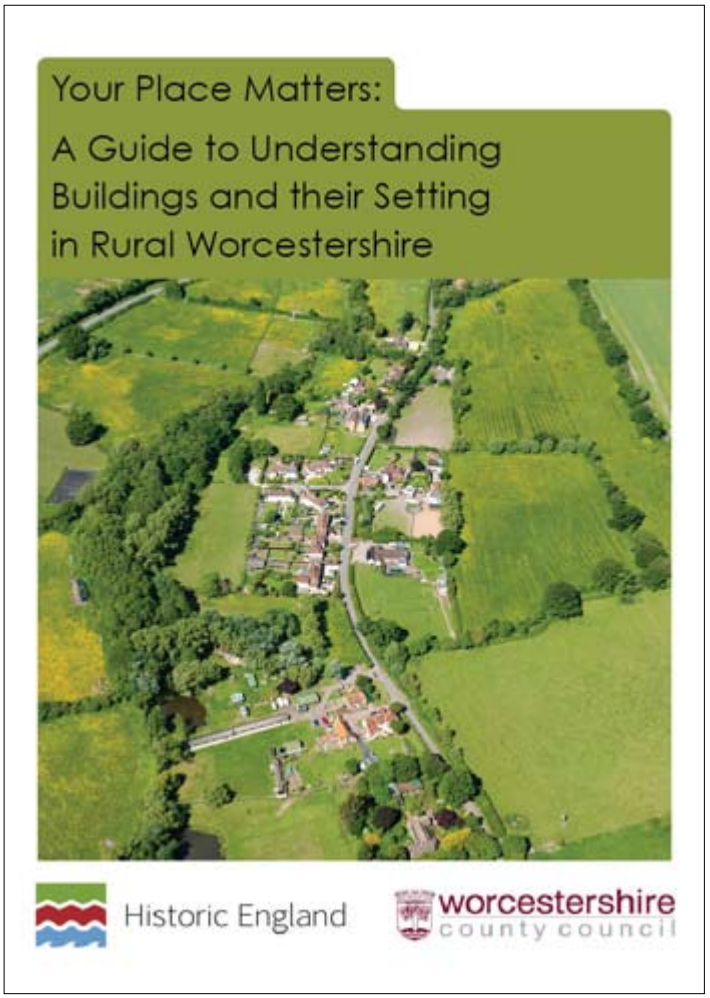

- Use this fresh understanding to inspire and guide your Community-led Plan and help ensure that new development responds to local character and distinctiveness, in line with national and local planning policy.

Trouble understanding the terminology?

The roles of different organisations, and the language used by heritage professionals, is often specialised. A glossary in Section 3 of this toolkit provides definitions of terms which may be newly introduced or unknown to you.

Using the Toolkit and Guidance documents

This Toolkit document is supported by a Guidance document 'Your Place Matters: A Guide to Understanding Buildings and their Setting in Rural Worcestershire'. This complementary document provides detailed information on the broad range of rural building types and their settings within their settlement and wider landscape.

These two documents are designed to work together through linking relevant information found within the supporting Guidance, with the Exercises found in Section 2 of this Toolkit.

This Toolkit document is also provided with hyperlinked tabs, that when selected will conveniently take you to relevant information found within another page of the document.

Resources Appendix Exercises

Toolkit document, hyperlink tabs

Planning background

The Localism Act (2011) gave new rights and powers to local communities over planning and setting the priorities for their own areas. The Neighbourhood Development Plan (NDP) is, at present, the primary mechanism for community-led planning. NDPs should support the strategic development needs set out in the Local Plan and plan positively to support local development (as outlined in paragraph 16 of the National Planning Policy Framework).

Neighbourhood Development Plans can empower local communities to:

- Set planning policies that can be used in determining planning applications.

- Grant planning permission through Neighbourhood Development Orders and Community Right to Build Orders for specific development which complies with the order.

The National Planning Policy Framework (NPPF) places good design, local character, and conservation of the historic and natural environment at the heart of sustainable development and good planning.

It stresses the importance of:

- New development making a positive contribution to local character and distinctiveness, drawing on 'the contribution made by the historic environment to the character of place' (2012, 30). The historic environment is defined as resulting from 'the interaction of people and places through time' (2012, 52).

- Conserving heritage assets in a manner appropriate to their significance and putting them to viable uses consistent with their conservation. Heritage assets include listed buildings, and other places and archaeological sites which are considered to have national or local heritage interest. The more important the heritage asset, the greater the weight that should be given to its conservation and the impact of any development on its setting.

- Achieving sustainable development whereby economic, social and environmental gains are all delivered through the planning system.

Historic England (formerly English Heritage) has also developed Constructive Conservation as the overall term for its positive and collaborative approach to conservation that focuses on actively managing change. The aims of this approach are to recognise and reinforce the historic significance of places, while accommodating the changes necessary to ensure their continued use and enjoyment. The recent Farrell Review of Architecture and the Built Environment (also called 'Our Future in Place') has also concluded that protection of the heritage that we most value, should not be at odds with making the ordinary better, through seeing, 'the potential of what is already there, the value of place, identity and sustainability' (2015, 108).

Research background

'Your Place Matters' provides a framework for deepening an understanding of a whole place and discovering and enjoying what makes one place different from another. It supports new approaches to considering the benefits offered by our environment, as exemplified by Ecosystem Services. This fresh approach, which takes into account the interdependent relationships between the historic environment, natural environment, economy, health and well-being, offers a strong foundation for understanding how culture has shaped England's rich array of landscapes, which in turn will help strengthen the recognition, assessment and protection of those buildings, monuments and areas considered to be most special.

Constructive conservation and new housing

The scale, form and setting of new development can pose different risks and opportunities to the historic environment of your area. The intensification of large scale development pressures on Worcestershire's, often fragile, rural landscapes is driving the need to understand the whole historic environment so that the historic character of places can be used as a framework against which proposed changes can be measured. This approach is not intended to fossilise places or encourage imitation, but rather nurture opportunities following the principles of constructive conservation.

The different types of new housing development that occurs within England are explained below. Further information can be found in, 'Evaluating the impact of housing development on the historic environment' (LUC and Haynes, 2014).

Conversion / restoration of non-residential historic buildings for new housing, these schemes form a significant element of new housing development within the rural landscape, for example, the re-use of industrial buildings and traditional farm buildings.

In-fill development, is the insertion of new development within the form / grain of historic settlements (nucleated, hamlets, isolated houses and farmsteads).

Insertion of new housing in historic areas of heritage value, such as historic gardens and designed landscapes, can potentially act as enabling development to fund restoration of an associated building. Development of this type within areas of sensitive historic landscape character, has significant potential for adverse effects, for example, upon relic field patterns and settings of historic town/ villages. Yet there is also potential for substantial conservation gain through the resulting restoration project.

Settlement expansion / urban extension, these are key options for Local Planning Authorities (LPAs) in delivering projected housing growth where there is no capacity for substantial infill or redevelopment within existing settlement boundaries. Such development has significant potential for impacts on the setting of historic towns and heritage assets in the urban fringe. Once allocated in the development plan, the principle of development in that location is established, it is therefore critical that a strategic assessment is made of these potential impacts on the historic environment.

New settlement is the establishment of new, discrete communities outside established settlement boundaries, for example, 'eco-villages' and 'garden suburbs'. These pose the additional challenges of infrastructure, service and amenity provision.

'Enabling development' is development that would be unacceptable in planning terms but for the fact that it would bring public benefits sufficient

to justify it being carried out, and which could not otherwise be achieved. Housing within the curtilage of historic buildings and designated landscapes are often an attractive prospect for developers seeking a 'unique selling point' and have potential value in addressing conservation deficits for assets that have no other viable prospect of a sustainable future. Close monitoring of delivery against conservation objectives is a significant challenge in such cases.

Living in local landscapes

The character of our everyday landscapes, and what makes them locally distinctive, results from how people have lived, worked and thought over time. This is captured in a useful definition of landscape provided by the European Landscape Convention as, 'An area, as perceived by people, whose character is the result of the action and interaction of natural and/or human factors' (2007, Art. 1). This international treaty seeks to promote landscape protection, management and planning across Europe, and to organise European-wide co-operation on landscape issues. Seeing the landscape as a whole, and understanding how its component parts fit together, is important in order to manage and design landscapes that are as rich and diverse as they can possibly be. Appreciation of what makes an area distinctive will benefit from stepping back and considering how its patterns of settlement, its landscape and its buildings mix together.

The basic patterns of settlement in rural areas have developed from before the medieval period, varying from areas with large villages and few farmsteads to areas with scattered farmsteads, houses and hamlets. Fields, open land, woodland and industrial sites developed in close relationship with these patterns of settlement and are crossed by routeways to enable local land use or access to more distant places including markets. A diversity of crafts and trading patterns, changes in religious practice, and increasingly a desire to simply enjoy the benefits of living in the countryside, have also shaped rural England. Which in turn, have provided the setting for buildings of different dates, styles and materials, as well as the fauna and flora, traditions, food and dialect, loved by their residents and visitors.

The two photographs below, show contrasts in settled landscapes in Worcestershire.

The east and south east is dominated by large nucleated villages with few isolated farmsteads, that mostly date from after the enclosure of open fields.
Photograph © Historic England NMR29433_013

The remainder of the county has fewer, smaller, villages and higher densities of isolated farmsteads and hamlets, which have developed along an intricate network of roads, in areas with a complex mix of woodland, common and heath.
Photograph © Historic England NMR29434_009

Rural life: putting people into historic places

Continuing and new ways of living and working require housing and other facilities that form the building blocks of settlement growth. Besides reflecting the skills and lifestyles of local people, these have all developed in response to changing ideas and developments at a national and even international level. This is evidenced by:

- Farming in Worcestershire, as in the rest of England, has affected more than 70% of the land area, requiring fields for the efficient management of crops and livestock and farmsteads to house farming families, finish products for market and produce manure to fertilise the fields.

- Farmers and rural communities have also made use of common land for fuel and livestock, the small proportion that now survives being often held in high regard as places for recreation and wildlife. The management of woodland for fuel and timber has declined since the late 19th century, but is now set to expand. Hedgerow trees are

also a significant element of landscape in many parts of the county, and were an important source of building timber.

- Mining, quarrying, manufacture and trade have been enormously important in England's development from the medieval period in the form of mines, quarries, workshops, shops and road, rail and canal networks.

- Households in areas with the highest densities of rural settlement often practised a variety of trades and crafts.

- Demand for houses with their gardens has generally changed in response to smaller household sizes, more living space and the desire of many to live in rural areas. This has become increasingly possible by faster means of transport and access to digital communications.

- Places of Worship, community buildings and spaces have also developed in response to the needs and character of communities.

A 17th century farmstead (top photograph) and 20th century development (bottom photograph) on Rye Street in Birtsmorton. Photographs © Worcestershire Archive and Archaeology Service.

Ways of working and living in rural Worcestershire

Farming

Enclosed land worked by farms covers more than 70% of the county's landscape. The largest farms developed in the east of Worcestershire, where production of corn was concentrated. The remainder of the county is characterised by an underpinning pattern of small to medium scale farms and smallholdings.

Farmland has expanded into areas covered by woodland and heathland, but large blocks of both, (especially in the north and west of the county), remained into the 18th century. Many of the smallest farms and smallholders benefitted from by-employment in small-scale industry and trades, access to common land for their animals, and harvesting fuel. Only fragments of heathland have survived, due to their enclosure in the late 18th and 19th centuries. Woodland remained an important source of building material and fuel, right up until the 19th century, and large blocks continue to dominate industrial landscapes, with less productive soils, such as the Wyre Forest.

Horticulture

Orchards, market gardening and hop gardens developed from the 17th century, increasing as the use of common land declined and reaching a peak in the early 20th century, to meet increasing demands for fresh produce in developing rural and urban markets. Thereafter followed a gradual decline as markets looked increasingly to cheaper imports from countries such as the United States, Australia and New Zealand.

Crafts, Trade and Industry

A large proportion of the rural population made a living in various trades, industries and the transportation of goods. Significant rural industries included coal and ironstone mining, salt production, quarrying, textiles, glove making and the manufacture of glass, nails, agricultural implements, needles, fish hooks and fishing tackle. Most rural communities also engaged in standard trades such as shoe making, tailoring, carpentry, building trades and the import or export of products for local farms. Also a significant percentage of the rural population, and in-particular women, were employed in domestic service.

Heavy horses, helping with the harvest, in the fields opposite the Park Gate Inn, Stourbridge Road, Kidderminster. 1928. Worcestershire Photographic Society 899:156, catalogue number 77601 © Worcestershire County Council.

The hop harvest, circa 1912. Worcestershire Photographic Society 899:156, catalogue number 78400. Copyright unknown.

Section 2

A step-by-step toolkit to understanding your area and producing a community-led plan

Overview

The Toolkit is divided into three stages, each comprising exercises that build upon the question-led approach advocated in Building for Life 12 (2015), Knowing Your Place (2011), and Placecheck (1998), (see reading list).

In partnership with the supporting Guidance 'Your Place Matters: A Guide to Understanding Buildings and their Setting in Rural Worcestershire', this step-by-step Toolkit is designed to help you:

1. Consider what makes your area distinctive by:

- Using maps and other information to appraise your whole area and identify how it has changed.
- Identifying and assessing the buildings and other features that contribute to local character.

2. Evaluate the issues and opportunities for change this historic character offers.

3. Champion your local landscape within the context of community-led plan policies.

4. Guide development proposals to ensure that they respond to local character and distinctiveness, in line with national and local planning policy.

As you work through the exercises, make good use of the 'Your Place Matters: A Guide to Rural Buildings and their Setting' document, for essential information on the broad range of rural building types, settlement patterns and landscape features in Worcestershire.

The stages and their outcomes are comprised as follows:

Stage 1: Getting Started Exercise A: First Impressions. Exercise B: Use maps to identify how your area has changed. Exercise C: Adding the detail.	**Stage 1: Outcomes** These exercises will enable you to gain a good understanding of the character of the landscape and settlement in your parish. The exercises are research led and will generate evidence that will inform Exercises F and G.
Stage 2: Buildings in their Setting Exercise D: Buildings in their setting: what are the defining characteristics of your local area? Exercise E: Use field survey to further deepen your understanding of the buildings within your local area.	**Stage 2: Outcomes** Exercises D and E, focus in on the built environment of your parish. They encourage you to identify the character of buildings and their settings, and critically assess their value. These exercises will generate further evidence that will inform Exercises F and G.
Stage 3: Your place, your choice Exercise F: Create a landscape character assessment for your community-led plan. Exercise G: Create policies for your community-led plan.	**Stage 3: Outcomes** The information and evidence that you have gathered in the previous exercises will now inform your landscape character assessment. This in turn provides the context for the policies within your community-led plan.

Stage 1: Getting started

Exercise A: First impressions

Overview

This is a warm-up exercise and can be done inside in one or more groups.

With heritage and landscape in mind, work in groups and discuss the following:

1. What makes the place where you live, special to you and your community?

Think about how you feel when you approach home, and about which features are familiar to you. 'Features' could be anything; winding, sunken lanes, the use of a particular type of building material, or a specific view or landmark. Consider which features make your place distinct from another. It is the combination of these features which form the landscape character of your local area.

2. How do buildings contribute to making your place special?

3. What do you think your local area would have looked like 20 years, 50 years and 100 years ago?

4. What would you like it to look like in 50 years time?

Top Tips

This exercise works best if a range of individuals, with a variety of experiences, are represented. If you are concerned that different groups are not represented go out and ask them!

Collate key words and thoughts on paper. This does not have to be a lengthy piece of text, broad statements and even bullet points are fine!

A spokesperson, from each group, can be elected to report back their group's thoughts and ideas.

Exercise B: Use maps to identify how your area has changed

Overview

The 18th and 19th centuries saw the formation of most of the English landscape as we see it today. The main sources of information for these changes are maps documenting the details of enclosure in the late 18th and early 19th centuries, and the mid 19th century assessment of holdings during the survey of the Tithe Commissioners.

Changes to the landscape can be understood by looking at, and comparing, historic and modern maps. The extent of later growth, within a historic settlement area (modern infill) or on its edge (modern expansion), can be determined by overlying a modern Ordnance Survey map on late 19th century or early 20th century Ordnance Survey maps. Modern development can either disregard or complement earlier patterns of landscape and settlement.

Resources:

- The National Library of Scotland has produced a free resource which includes a range of digitised, historic maps (dated 1842-1952), that can be overlaid on a modern map or satellite image, covering the entire United Kingdom.

- old-maps.co.uk is another excellent online archive of maps, dating from the late 19th century to the late 20th century.

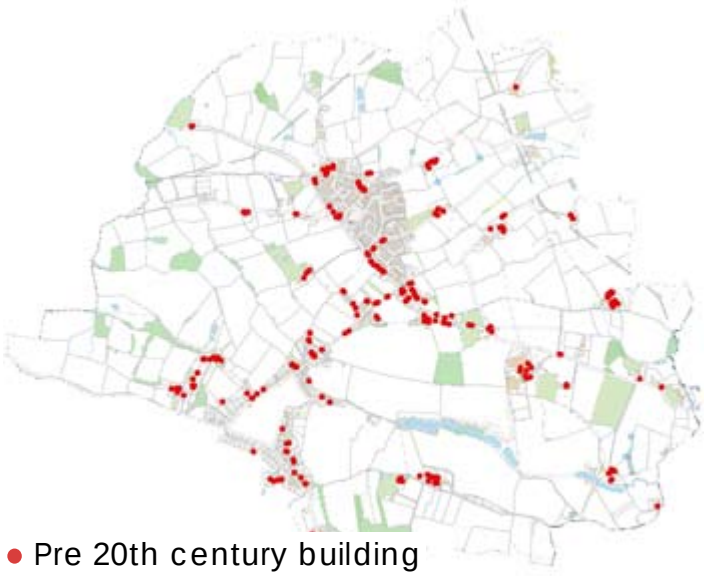

- Historic Environment Records and local Archive Services will have copies of historic Ordnance Survey maps and earlier maps, such as Tithe maps, which you can arrange to see.

- Worcestershire Historic Environment Record retains a complete collection of transcribed tithe maps, along with their associated schedules. A number of maps have been digitised and are available to view at The Worcestershire Tithe and Inclosure Map Project . This website also includes some digitised estate maps.

Comparing maps showing a dispersed settlement pattern

Map © Crown copyright and database rights Worcs XXXIII NW, 1905. Ordnance Survey 100024230.

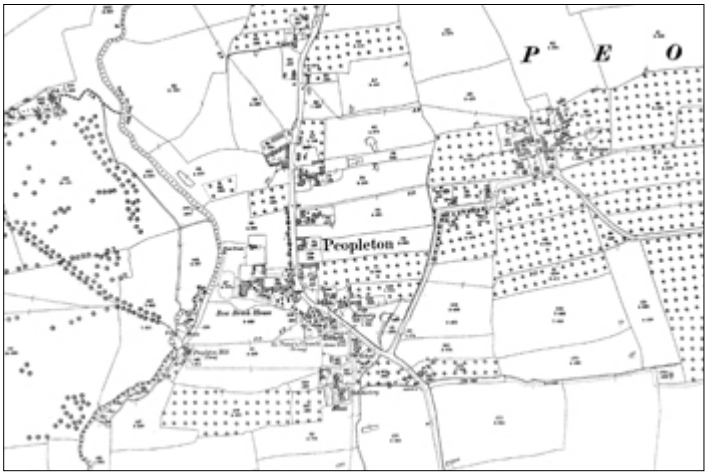

● Pre 20th century building

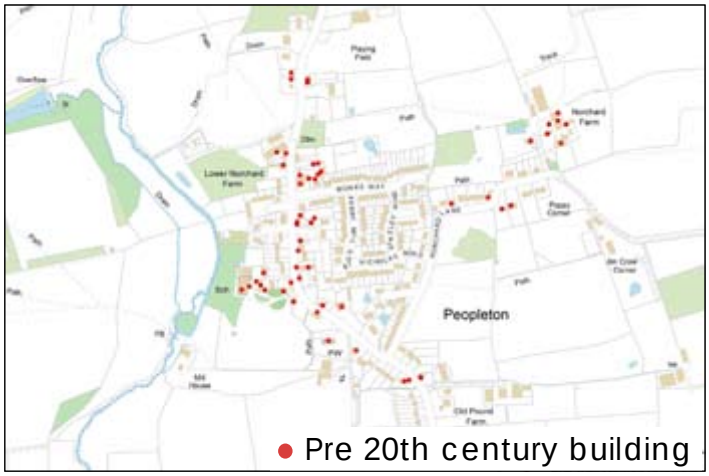

Map © Crown copyright and database rights Ordnance Survey 100024230.

The historic map above shows the parish of Broadheath, with two dominant areas of settlement surrounded by clusters of farmsteads, and the fields beyond. The first dominant area of settlement, in the centre of the map, from 'Peachley' in the north west, to 'The Knoll' in the south east, has developed along the main Worcester to Martley Road and to a lesser extent along Bell Lane to the south west. This interrupted row is characterised by clusters of farmsteads and dwellings with no individual core or focal point and it appears likely that settlement here developed around several manorial holdings or farmsteads. The map indicates that at the turn of the 20th century, the 'village' was reasonably serviced with a Christ Church (this was a Chapel of Ease, which later became part of the school), a school, a chapel, The Bell Hotel and a smithy. The second dominant area is concentrated around a remnant of unenclosed common land to the south west. When comparing with the modern map above, the settlement around the common appears to have retained its inherited character, despite there being moderate infill and expansion along the common edge. However, change to the northern settlement has been more dramatic, with significant loss of traditional farmsteads and development of large blocks of uniform 20th century housing north of the main road, thus substantially modifying its earlier, scattered character.

Comparing maps showing a nucleated settlement pattern

Map © Landmark digital mapping based on Ordnance Survey 2nd Edition, 1904. (Landmark reference number 39so9350 Original scale: 25" (1:2500)).

Map © Crown copyright and database rights 2016 Ordnance Survey 100024230.

The historic core of a nucleated settlement is easy to identify on historic mapping by looking at the pattern and form of buildings and their plots. In most cases the historic core represents the extent of a settlement by the beginning of the 19th century, it may have a high concentration of listed buildings or be a designated Conservation Area.

The historic map above shows Peopleton as it was recorded on the Second Edition Ordnance Survey map, dated 1904. By comparing this map with the modern map of 2016, it is possible to easily identify changes in the landscape that have occurred from the beginning of the 20th century to the present day. It is clear there has been a loss of traditional orchard, as well as a loss of mature parkland trees to the west of Peopleton, also an increase in woodland, and transformation of the large farmsteads that developed on the village edges. It is also possible to identify the early 20th century field pattern and note the later amalgamation of fields, and like many other loosely nucleated settlements, there has been a growth of development, as evidenced by the open areas within the village having been infilled with later housing.

Now identify how your area has changed over the last century by comparing modern to historic Ordnance Survey maps

1. Use your maps to identify the broad character of your area and examine how it has changed into its present form. Are there any areas which have remained unchanged over the last 150 years?
Which areas have changed the most?

2. Consider change or continuity of the following features:

- Landscape
  To what extent have inherited patterns of landscape changed, or remained constant, since the end of the 19th century?
  For example, fields, woodland, unenclosed land, water courses and designed landscape.

- Settlement and layout
  Do houses and other buildings in your area mostly cluster in a village (nucleated settlement type), or are they scattered across smaller settlements and farmsteads (dispersed settlement type)?
  Are houses and other buildings placed close together or more spread out, with defined private or public spaces in-between?

- Access and routeways
  What are the patterns of movement through, in and around the area?
  Are there any significant connections and nodes?
  How is the settlement pattern connected by routeways for vehicles and pedestrians?
  Can you tell if buildings were intended to face towards or away from routeways?

Top Tips

It's easy to get overwhelmed by too many maps. There is no need to examine every map of your parish. Some will be more useful than others and you may wish to narrow down your list of maps to those that will be the most help in answering your questions.

Remember maps can use different scales and different symbols to show the same feature. Map regression can be made simpler if all the maps have been reduced or enlarged to the same scale.

Exercise C: Adding the detail (desk based)

Overview

Deepen your understanding of the landscape by using other available resources including Landscape Characterisation, Historic environment and biological record resources, and aerial photographs.

Aerial photographs, like maps, can provide an overview of buildings within their wider landscape and settlement context. They can reveal current land use practices and disclose stories of earlier landscapes, in the form of archaeological remains. These can be identified on aerial photographs as earthworks (standing remains, visible on the surface of the ground) and as crop marks, soil marks and parch marks (buried or levelled remains, hidden under the ground). Medieval building remains, e.g. crofts and tofts and moated sites, survive as both above and below ground archaeology, reflecting different phases in the development and pattern of settlement, particularly between the 12th and 17th centuries.

This aerial photograph depicts a large scale, isolated farmstead, located to the west of the village of Naunton Beauchamp. The farmstead is on the site of a small medieval manor, and the earthwork remains of a late 15th or early 16th century moated site are recorded to the east (the right). The surrounding landscape is dominated by long, linear earthworks (ridge and furrow) under pasture. These are the result of ploughing when the land around the settlement was open and intensively farmed. Photograph © Historic England NMR 27792/019.

Aerial photography Resources:
(also see Resources link above)

- Google Earth and Bing Maps are web mapping services which allow you to explore your area with an aerial, bird's eye and street view.

- Historic England, Historic Environment Records and Archive Services have access to a wide range of historic and modern aerial photographs.

Landscape Characterisation methodologies are used to assess broad patterns of landscape. They will help you to assess your local landscape within its wider strategic context.

Did you know?
A landscape character assessment can provide a useful narrative of a landscape; how it has developed over time and how it may change in the future. It can be used to describe specific character areas which have been identified through their combination of characteristic features.

Landscape character assessments can be undertaken at a range of scales, from national to local, and provide a useful planning tool which will enable you to assess your local landscape within its wider strategic context and plan positively for the future.

Since late 2014 a partnership project, funded by the Historic England West Midlands Regional Capacity Building Grant scheme has provided workshops in 'planning for the historic environment' and guidance on 'Producing a Landscape Character Statement for your Neighbourhood Plan' for communities undertaking their own Neighbourhood Plans (see Reading List in Resources link above).

Landscape Characterisation Resources:
(also see Resources link above)

- National Character Area Profiles (NCAs) provide a broad understanding of the historic development and natural history of a landscape.

- Landscape Character Assessment (LCA) is a methodology used for identifying and describing the variation in the character of the landscape. It also sets out strategies and guidelines for the protection, management and development of individual landscape types. You can explore the Worcestershire Landscape Character Assessment data here.

- Farmstead Characterisation considers the reuse of traditional farm buildings and the sustainable development of farmsteads, through identifying their historic character, significance and potential for change. The Worcestershire Farmsteads Assessment Framework is available here and is fully integrated within the Worcestershire Historic Environment Record.

Historic environment and biological record resources:
(also see Resources link above)

- The National Heritage List for England is an online searchable database of designated heritage assets.

- Conservation Areas are areas, identified by local authorities, which are considered to have special architectural or historic interest. Most Conservation Areas have a 'statement' or 'area appraisal'.

- Areas of Outstanding Natural Beauty (AONBs) are nationally designated landscapes. Most AONBs have a management plan which sets out its vision for future conservation and management.

- Local Historic Environment Records (HERs) and Biological Records support a database of known records, which are often mapped on an integrated Geographical Information System (GIS). Local records are an essential source of information for local community projects, special interest groups, as well as individual researchers and professionals seeking to understand and manage the environment through planning and development control and in agri-environment. As well as providing you with information, local records can act as a depositary for your research. Sharing your work will help to cultivate and enrich the resource for the benefit of all.

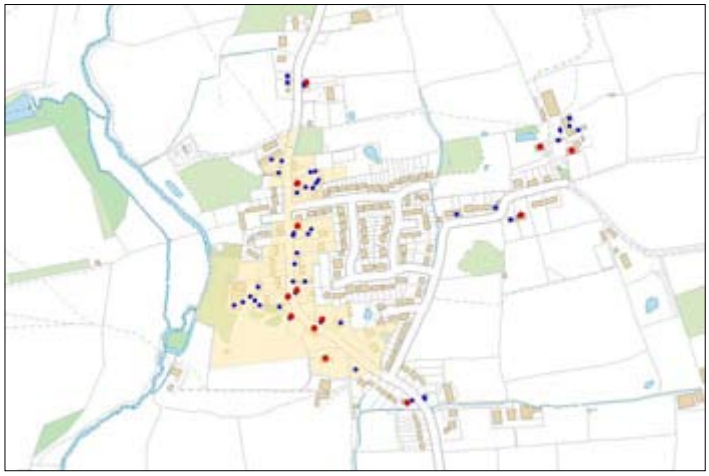

- Many areas also have local organisations to support geoconversation.

Top Tip
Mapping broad landscape patterns and characteristics will help you to better consider the issues and opportunities for change.

These Historic Environment Record maps show the distribution of listed buildings and non-listed buildings, recorded on late 19th century Ordnance Survey maps, in both the nucleated settlement (top) and dispersed settlement, (bottom) considered in Exercise B.

The maps clearly show that listed buildings, and pre 20th century buildings, are heavily concentrated within the historic core of the nucleated settlement (which is a designated Conservation Area), whereas they are scattered across the wider area of dispersed settlement, reflecting development along main routeways and on the common edge.

Key
- Conservation area
- Listed building
- Pre 20th century building

Map © Crown copyright and database rights Ordnance Survey 100024230.

Stage 2: Buildings in their setting

Exercise D: Buildings in their setting: what are the defining characteristics of your local area?

Overview

Buildings form the backdrop of our rural landscape and are central to our lives; they are also incredibly diverse. Some buildings and spaces, whether they are nationally designated or not, are perceived by local communities and visitors to have special value. 'Your Place Matters' will help you to identify what makes your area locally distinctive through consideration of all buildings, within their wider settlement and landscape context, and not just listed buildings, which are already given great consideration in the planning process.

The setting of buildings - the surroundings in which they were designed to be seen and experienced - can have an enormous impact on the desirability of a place. Setting is not fixed and may change as a building and its surroundings develop over time. Harm to a designated heritage asset, through development within its setting, is assessed against the same policies in the National Planning Policy Framework (2012, 31) as for physical harm to the significance of designated heritage assets generally.

What are the defining characteristics of buildings and their settings in your local area?

This is a desk-based exercise which will help you identify broad patterns of buildings in their landscape setting which, in turn, may inform individual character areas within your parish.

Using the information collated in Stage 1 and the supplementary guidance 'Your Place Matters: A Guide to Understanding Buildings and their Setting in Rural Worcestershire', consider change or continuity of the following features listed on page 24:

Appendix 1

1. Domestic Buildings.

As well as houses with their gardens, there will be a wide variety of other buildings with their own private, functional and community areas, including farmsteads and farmyards, churches and churchyards and industrial sites with their own working areas. How do different buildings relate to different spaces in and around settlement, and to wider patterns of land beyond? Are domestic buildings of different dates clustered together in distinctive areas? or more spread out?

2. The functions of building and spaces.

3. Public open spaces.

Are any buildings sited around or within public open spaces such as greens, recreation land or commonland used by the public? Can you tell if buildings were intended to face towards or away from public open space or historic open land?
Are buildings open to public view set along, or within, their property boundaries?

4. Buildings with an important community function.

Apart from churches and chapels, what other buildings have an important community function? Village halls, sports pavilions and other buildings may have a significant role in their local communities. Are they located in the centre of the settlement, on its edge, or distant from it?

5. Landmark buildings.

Are there any landmark buildings? Churches and other buildings may have significance as prominent landmarks in the landscape, or be regarded as particularly significant in local stories.

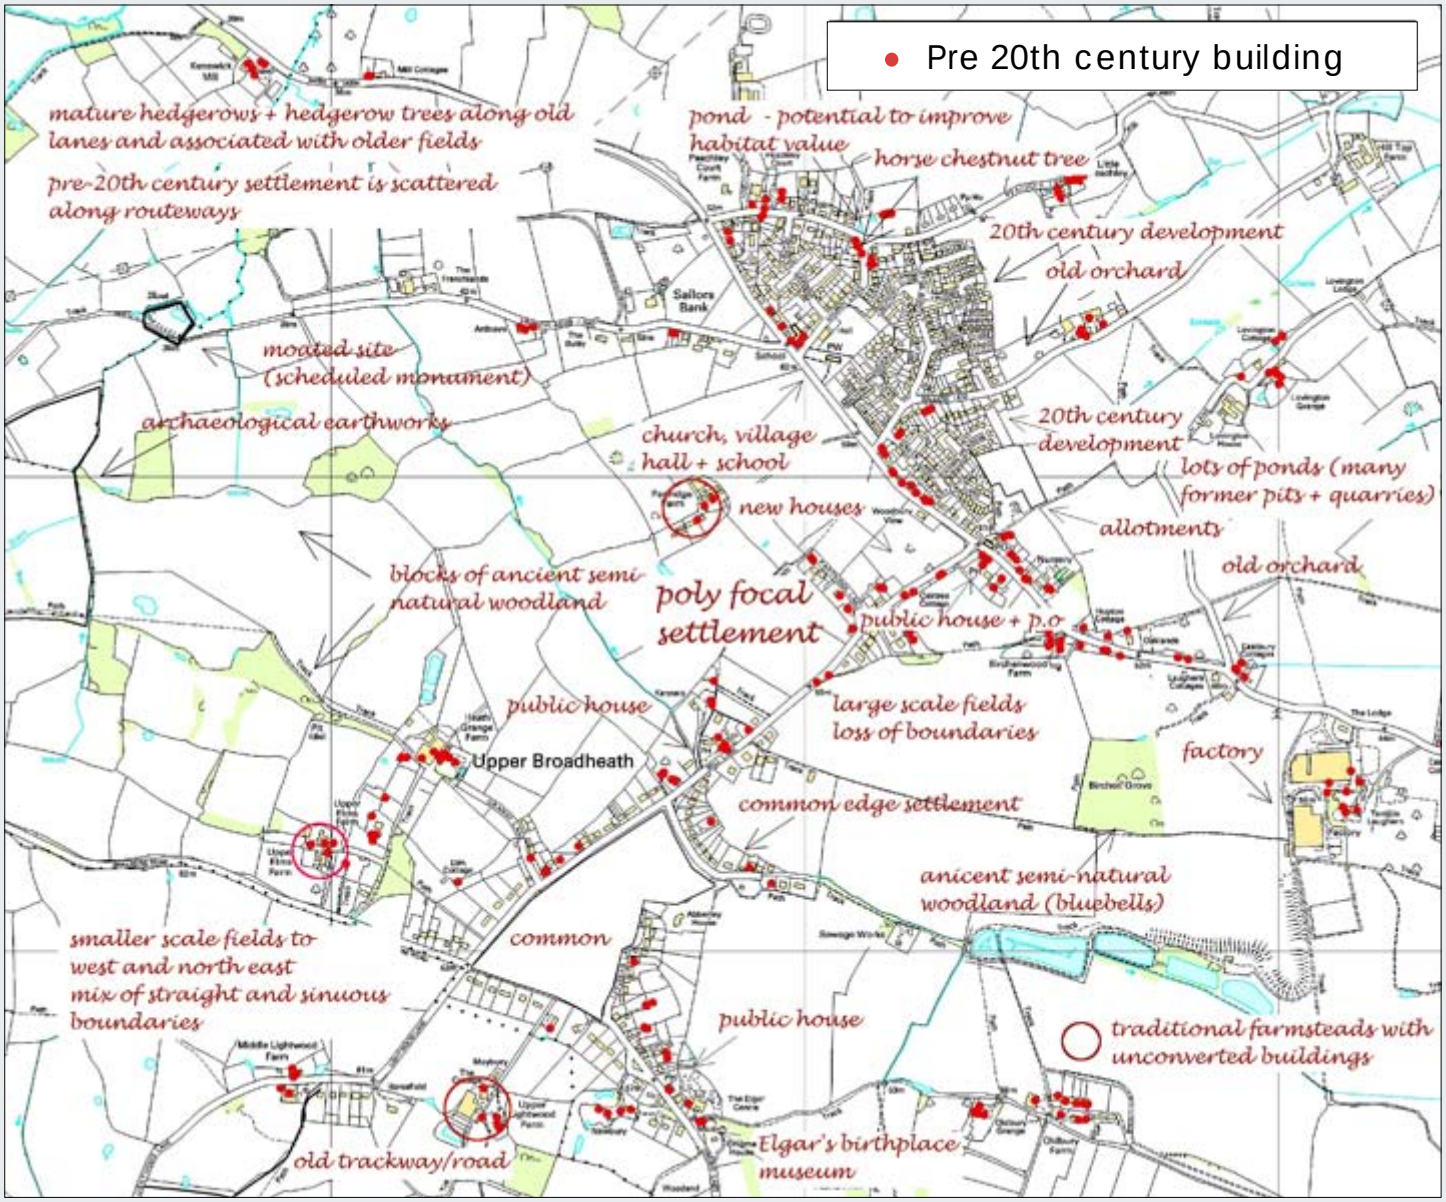

6. Buildings and Habitat.

Are any buildings or structures known to provide valuable habitat for wildlife?

7. Designations.

How do listed buildings and other designated sites fit within the wider historic character of the area?

Top Tip Why not annotate one or two A3 maps with key words and thoughts, as illustrated below for the parish of Lower Broadheath.

Exercise E: Use field survey to further deepen your understanding of the buildings within your local area.

Overview

Now that you've assessed the broad patterns and characteristics of your settlement using your maps, aerial photographs and other available resources, this exercise uses field survey to further deepen your understanding.

Use field survey to further deepen your understanding of the buildings within your local area.

Go out and walk, cycle or drive around your parish with the same question 'Focusing on buildings, what are the defining characteristics of my local area?' in mind.

Take a modern and historic Ordnance Survey map with you. As you move around, take a selection of photographs of key buildings / groups of buildings / building types, in their setting, which reflect the character and local distinctiveness of your parish. Make a note on your map, of where the photographs were taken and the direction you were looking. Also use your map to record key views, to and from, and within settlements.

Top Tip

For greater detail consider undertaking a 'notation-based' characterisation exercise, as illustrated on pages 29 and 30. Notation mapping is an effective method to systematically record the features and key characteristics that you believe make your area distinctive. This mapping technique and the symbols used, have been developed by the Bristol Historic Environment Record, for their 'Our Place', neighbourhood planning project (2013).

Consider the following questions, and build upon the information and evidence gathered in previous Exercises.

1. Landscape and Settlement:

- How does the landscape make you feel? Is it open and expansive or intimate? Things to think about include the topography, height of boundaries, character of routeways, vegetation and the density of buildings.

- How do you think this might have changed over the last 20, 50 or 100 years?

- How has this developed over time and has it been affected by recent change, such as new development, the loss of woodland or orchards, the planting of new woodland or the growth of roadside vegetation and trees?

- Are there any natural landmarks associated with settlement or visible from it?

- What are the defining characteristics of settlement boundaries? Are boundaries hedged, fenced or walled? Are they functional, decorative or both?

- Is settlement defined by any other notable landscaping features, for example verges, borders or trees?

2. Buildings and their Settings:

- Are buildings roadside or set back within their plots?

- What are the key characteristics of buildings in your area? Consider broad characteristics such as type, scale, massing, height, orientation, layout and materials.

- Are there areas marked by a similarity of date, type or form; or are they marked by a jumble of buildings and styles?

- How do buildings relate to other key features of the landscape, such as the geology?

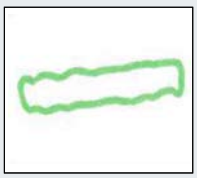

- How do buildings/groups of buildings make you feel? Do they make a positive, neutral or negative contribution to the character and distinctiveness of the parish?
- Are any buildings/groups of buildings considered to have special significance and why?
- Are there any landmark buildings associated with settlement, or visible from it?
- How do streetscape features contribute to the character of the area? For example, letter boxes, telephone boxes, wells, memorials, signage.
- Are there any special views looking into, out of or through settlement? Think about how a building or a group of buildings was designed to be seen and experienced.

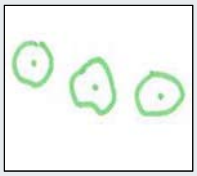

Photograph key buildings/groups of buildings/building types in their setting.

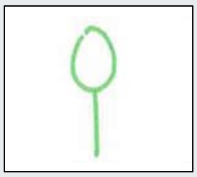

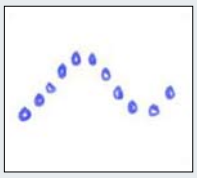

Photographs © Worcestershire County Council.

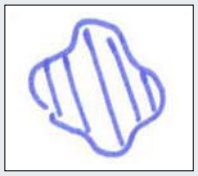

Notation mapping symbols for Heritage and Historic Environment.
(derived from the 'Know Your Place, Bristol' Project).
Using these notations populate your map with the features and characteristics that you believe make your area distinctive. Feel free to annotate the map with further information, or create custom symbols where necessary.

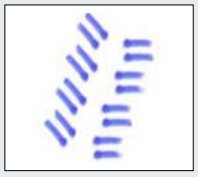

Distinctive boundary i.e. hedgerow or wall.

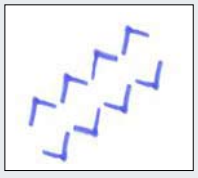

Distinctive line of trees in a boundary or in the open.

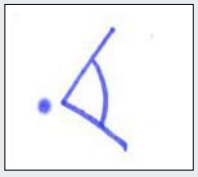

Biological landmark.

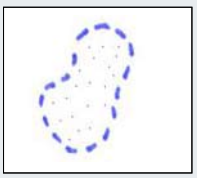

Watercourse.

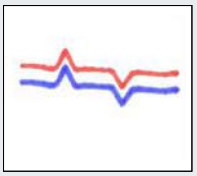

Distinctive body of water i.e. ponds.

Narrow, enclosed and/or sunken lane or street.

Wide, open lane or street.

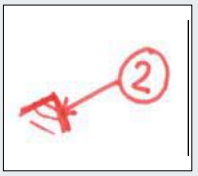

Extensive view (location point and direction).

Significant local open or green space.

Boundary between character zones.

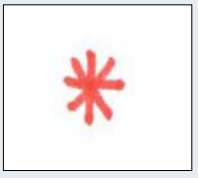

Distinctive group of historic buildings (i.e. by date or style).

Locally significant building.

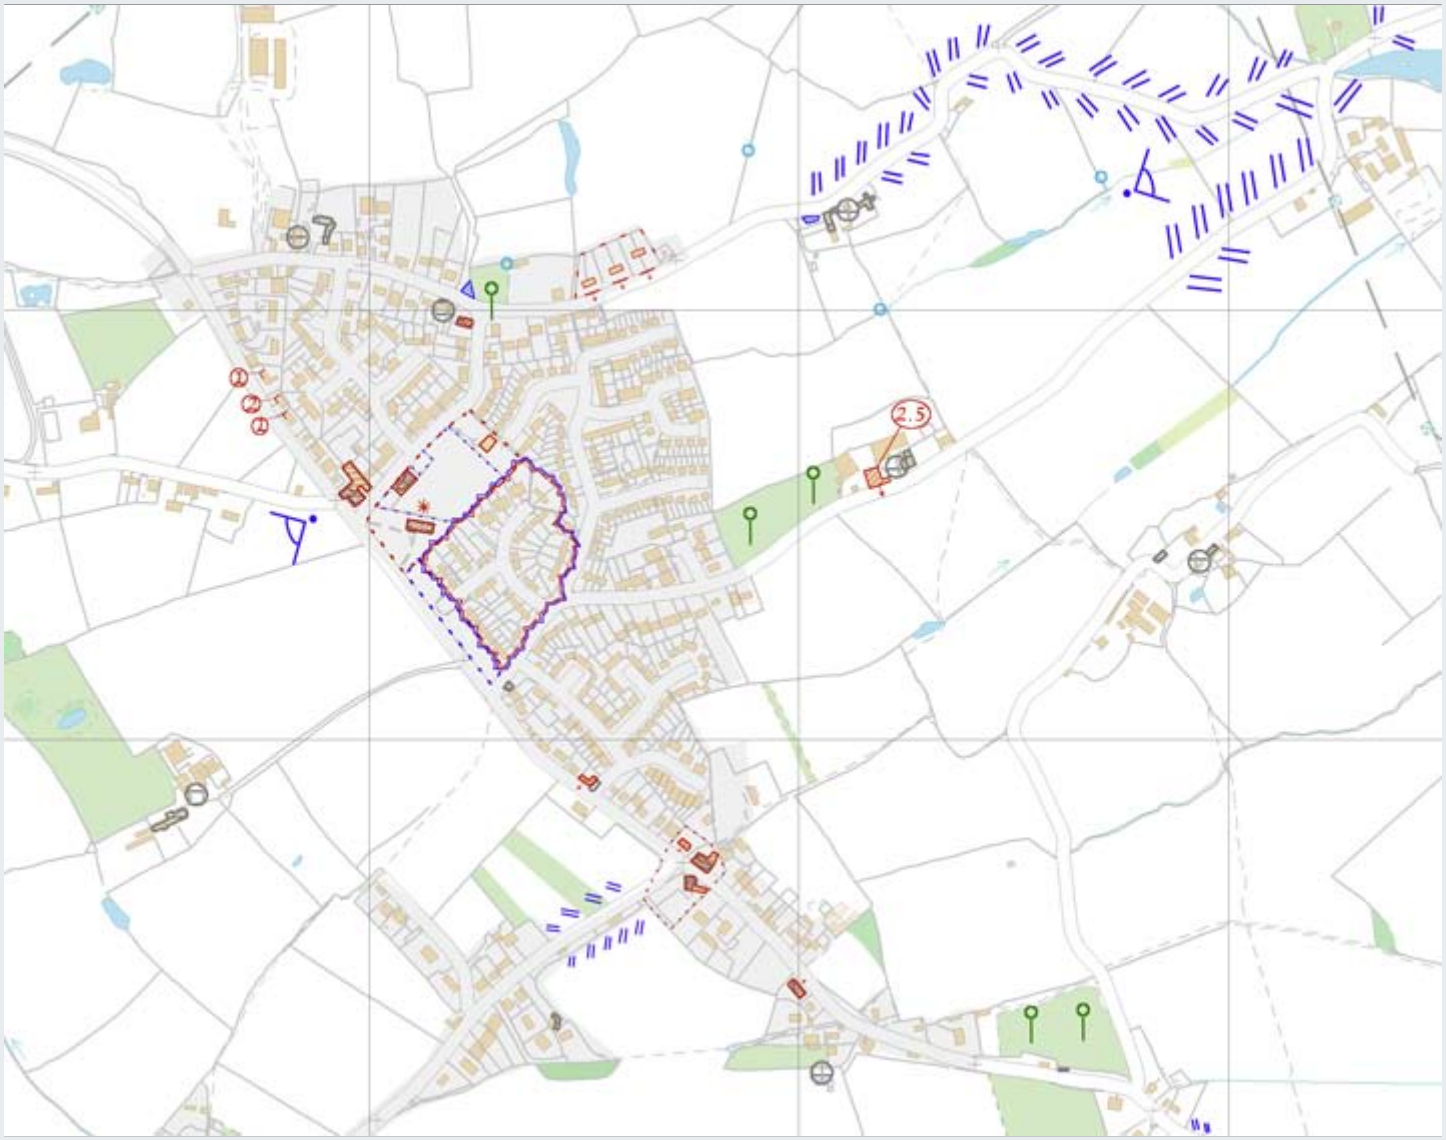

Scale of building (number of storeys).

Orientation - the main elevation and the way it faces.

Built landmark.

Custom notation.

Detail of part of schematic map with notation.

© Worcestershire County Council.

Stage 3: Your place, your choice

Exercise F: Create a landscape character assessment for your community-led plan

Overview

The character and form of different areas presents different constraints and opportunities for development. Identifying and championing the distinctive characteristics of your area through strong locally-tailored policy can inspire and guide development to more effectively respond to individual place, in line with national and local planning policy.

Assessing issues and opportunities for change, and deciding whether development proposals respect local character and distinctiveness, is not easy and should always be considered with the following questions in mind:

'What makes this place special to you and your community?'

'What would you like it to look like in 50 years time?'

Character Statements should:

- Be concise with a clear structure that details key characteristics and the future vision and objectives for your area. It is a planning document and not an academic exercise.
- Aim to build better understanding between developers, local authority planners, The Parish Council and the local community. It should be engaging and accessible to all.
- Reflect the relationships and interactions between different features. This is fundamentally important to describing the character of the area and designing landscapes that are the richest and most diverse as they can be.
- Aim to reflect the views of different groups within the community.
- Consider the social, economic and cultural benefits of retention or change.

Now go ahead and identify, map, and describe the broad character of your parish; including any individual character areas.

Do not make generic statements. A character statement should reflect your local landscape and describe the qualities and characteristics that are valued by local people and visitors. This does not mean that your character statement must provide a hugely detailed explanation of different features.

You should use all of the information gathered in the previous exercises, and focus on how all buildings are sited and experienced. Use maps and photographs to illustrate key features and characteristics.

Take a look at the Reading List, and the Landscape Character Assessment: Area Case Study, in Appendix 2, of the Resources Section, for examples and further guidance.

Maps © Crown copyright and database rights Ordnance Survey 100024230.
Photographs © Worcestershire County Council.

Exercise G: Create policies for your community-led plan

Overview

Your landscape character assessment is now going to be used to set out policy requirements for new development in your parish. Remember your policy, along with national and local planning policy, will be central to the planning decisions in your area.

Creating your policies

Policies should be clear, positive and capable of being delivered. Working through the following questions may help:

- Where has development occurred up to this date?
- Where can you see new development going in the future?
- Can new development respect and re-inforce existing patterns of settlement and landscape? Think about the scale, form, massing and orientation (relationship to roads and green spaces) of buildings and the use of building materials and significant architectural details.
- How sensitive is an area to changes in those patterns?
- Could new development harm/ enhance the setting of a historic building/group of buildings? In what ways could harm be minimised?
- Could new development harm/ enhance a significant view, to or from settlement?
- Can new development offer an opportunity to meet local needs and aspirations?
- Can new development explore opportunities to retain/enhance redundant historic buildings and their setting through the principles of constructive conservation?

- Can new public spaces respect broad landscape character? Will they require suitable management arrangements in place to maintain their use and good conservation long term.

- Can new development conserve or enhance existing open spaces?

- Can opportunities to restore or re-establish significant landscape features, such as traditional orchard or a village pond, be explored?

- Can opportunities to re-link hedgerow corridors with blocks of ancient semi-natural woodland, wood pasture and parkland be explored?

Top Tips

Looking at the Statements of Environmental Opportunities from your local National Character Area Profile may help you to step back and consider the opportunities offered by your local landscape.

Take a look at pages 35 and 36 to see how observations recorded within character statements, feed into and inform, the construction of policies for community-led plans.

See the Reading List, and Appendix 3 in the Resources Section of this toolkit, for examples of policies from Neighbourhood Plans

My Parish

Character statement observations

Domestic buildings:

- Large blocks of mid 20th century development - bungalows, 2 storey semi detached / detached housing
- Smaller but distinct areas of interwar housing
- Earlier buildings are more scattered - large scale farmsteads, 19th century villas and some timber-framed dwellings.

Large mid 20th century planned estates broke away from the traditional settlement pattern.

Pre 20th century settlement predominantly scattered along roads or common edge. Some isolated farmsteads. Houses predominately face the road.

More ad hoc 20th and 21st development respecting common edge settlement pattern

Community-led plan policy

New development does not need to imitate earlier architectural periods or styles but should add to, and not detract from, the quality and character of the surrounding environment. The use of sustainable materials and design is favoured.

New developments should reinforce the distinctive scattered, ribbon or common edge character of pre 20th century settlement by being small in scale and by retaining the open spaces in-between settlement. The general character, scale and mass of new developments should fit in with the 'grain' of the surrounding landscape.

Character statement observations	Community-led plan policy
Traditional farmsteads historically isolated or in clusters, set within medium scale fields with hedged boundaries and surviving traditional orchard. Many lost as a result of mid 20th century expansion. Surviving farmsteads on settlement edge under pressure from development.	Opportunities to convert redundant farm buildings using the Worcestershire Farmsteads Assessment Framework for guidance.
No individual village centre but focal areas of community activity around: 1. village hall, green, church and school 2. The Pub, post office, allotments 3. the Common.	Preservation of surviving traditional orchard as community space Developments should support and enhance existing community spaces.
Narrow lanes with mature hedged boundaries give a sense of enclosed tranquillity. Good access around settlement via PRoW network. Retains atmosphere of a rural settlement despite close proximity to urban centre.	New development should protect and enhance the natural and historic environment by retaining and enhancing features of high historic, nature or landscape value, including mature trees, hedgerow boundaries, archaeological earthworks, water-bodies , woodland, traditional orchard, community green space and key views.

Section 3

Resources

Information services

Historic Environment

The National Heritage List for England
Is an online searchable database of designated heritage assets (excluding conservation areas).

Heritage Gateway
Links and addresses for every Historic Environment Record in England.

Worcestershire Historic Environment Record
The county's primary source for archaeological and historic environment information.
Address: The Hive, Sawmill Walk, The Butts, Worcester. WR1 3PD
Telephone: 01905 822866

Pastscape
Historic England's PastScape, provides a quick and easy way to search over 420,000 records on the architectural and archaeological heritage of England, held in the National Record of the Historic Environment (NRHE).

Landscape

National Character Area Profiles (NCAs)
NCA Profiles provide a broad understanding of the historic development and natural history of a landscape. NCAs divide England into 159 distinct areas, each defined by a unique combination of landscape, biodiversity, geodiversity, history, and cultural and economic activity. Their boundaries follow natural lines in the landscape rather than administrative boundaries.

Landscape Character Assessments (LCAs)
LCAs identify and describe local variations in the character of the landscape, including how the landscape is perceived, experienced and valued by people.

Historic Landscape Characterisation (HLC)
HLC delivers a historical element to landscape character assessment by recording change or continuity to the landscape; providing a sense of time-depth, and context for its archaeological sites and monuments. The above link takes you to the Worcestershire HLC, which is accessible via an interactive map browser and is fully integrated within the Worcestershire Historic Environment Record.

Farmsteads and Landscapes Characterisation
The West Midlands Farmsteads and Landscapes Project recorded the distribution, scale, plan form, date, and the degree of change of all farmsteads and outfarms shown on the Ordnance Survey 2nd Edition 25" mapping of circa 1900. Through this project, it was possible to gain a better understanding of farmstead character, survival and current use at a landscape scale. This supported the development of an assessment framework aimed at informing and achieving the sustainable development of traditional farmsteads, including their conservation and enhancement, through identifying their historic character, significance and potential for change.
The above link takes you to the Worcestershire Farmsteads Assessment Framework, which is accessible via an interactive map browser and is fully integrated within the Worcestershire Historic Environment Record.

Characterisation has also been applied to the sea (Historic Seascapes) and towns and cities (Extensive Urban Survey, Urban Archaeological Databases and Metropolitan Historic Landscape Characterisation).

Heritage and Wildlife

MAGIC
The MAGIC website provides Natural England's geographic information about the 'natural' environment. The information covers rural, urban, coastal and marine environments across Great Britain.

The Earth Heritage Trust

The Herefordshire and Worcestershire Earth Heritage Trust is a charity that aims to record, protect and promote geology and landscape. The Trust is currently undertaking an important new project, 'A Thousand Years of Building with Stone', which aims to record, catalogue and untangle the history of stone use in heritage buildings across Herefordshire and Worcestershire

Worcestershire Biological Records Centre (WBRC)

The Worcestershire Biological Records Centre, an independent 'not for profit' wildlife charity, acts as the data storehouse for a wide range of biological data including plant and animal records as well as habitat information. They collect and collate data from a wide range of sources including local naturalists, professional ecologists, statutory bodies and other wildlife charities and organisations.

Worcestershire Wildlife Trust

The Royal Society of Wildlife Trusts (RSWT) is an independent charity, formed of 47 local trusts. As well as managing over 75 nature reserves, Worcestershire Wildlife Trust is the county's leading local charity working to conserve and restore wildlife and wild places across the county.

County Gardens Trusts (CGTs)

County Gardens Trusts are locally based charities caring for designed landscapes. They operate across England and are linked through the Gardens Trust (created in 2015 by the merger of The Garden History Society with the Association of Gardens Trusts).

Other sources of interest

Viewfinder

An online database of photographs held in the Historic England Archive. They date from the 1850s and document England's social, industrial, architectural and archaeological history.

Images of England

A 'point in time' photographic library of England's listed buildings, recorded at the turn of the 21st century.

Pevsner Architectural Guides

A series of architectural guide books describing notable historic buildings.

Victoria County History

An encyclopedic record, founded in 1899, of England's places and people.

Historic England Aerofilms collection

Over 4 million aerial photographs, covering the whole of England and dating from the early 20th century to the present day.

Glossary of terms

CABE
Chartered Association of Building Engineers.

Common Edge settlement
Detached or small groups of houses, dispersed between fields or small paddocks, encroaching onto open common, heath or waste.

Cropmark/Parch mark
Archaeological remains that become visible within standing crops, due to the subsurface differential growing conditions. Thus, buried ditches and walls can reveal themselves as crop or parch marks, especially during periods of drought.

Croft
An enclosed piece of land adjoining a house.

Dispersed Settlement
Settlement dominated by high densities of scattered farmsteads, hamlets and smaller villages. Typically associated with small and irregular fields, and the creation of farms within wood, marsh and moorland, during the medieval and earlier periods.

Earthwork
Archaeological remains that exist above ground, as an upstanding feature, ditch or artificial watercourse.

EcoSystem Services
An ecosystems approach provides a framework for looking at whole ecosystems in decision making, and for valuing the ecosystem services they provide, to ensure that society can maintain a healthy and resilient natural environment now and for future generations.

Geographical Information System (GIS)
A computer software system designed to capture, store, manipulate, analyse, manage, and present all types of spatial or geographical data.

Heritage Asset
A building, monument, site, place, area or landscape identified as being of significant value to merit consideration in planning decisions. Heritage assets include designated heritage assets and assets identified by the local planning authority (including local listing). The more significant the heritage asset, the greater the weight given to its conservation, and to the impact of any development on its setting.

Historic England
A Central Government service, championing England's heritage and providing expert, constructive advice.

Historic Environment
All aspects of the environment resulting from the interaction between people and places through time. This includes all surviving physical remains of past human activity, whether visible, buried or submerged, and landscaped and planted or managed flora.

Piecemeal Enclosure
Field systems that have been created out of the gradual, piecemeal enclosure of medieval open fields, woodland and wasteland. They can be of variable size and form, but typically lack any overall planning.

PROW
Public Right of Way.

Medieval Open Fields/Strip Fields
Medieval open fields were once arable land, held in common. This was traditionally farmed in strips on a rotational system, with multi-ownership or tenancy. It is usually associated with nucleated settlements and is suggested by the presence of ridge and furrow earthworks and / or piecemeal enclosure. The relicts of this type of cultivation are principally the long ridges and furrows often formed in a reversed 'S' shape, which can also be observed in curving hedge lines. Large areas of post-medieval and modern field systems will have open fields recorded as an antecedent type. Parish Boundaries may also echo former field strips.

Moated Site
A wide ditch surrounding a building, usually filled with water.

Nucleated Settlement
A settlement pattern dominated by villages with relatively few isolated farmsteads or hamlets.

Ridge and Furrow
A series of long, raised ridges separated by furrows that have resulted from the process of ploughing. These earthworks are characteristic of pre-industrial farming techniques.

Setting of a heritage asset
The surroundings in which a heritage asset is located. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset; and thus may affect the ability to appreciate that significance.

Soil mark
An archaeological feature made visible, due to its soil fill being of a different colour and matrix to the surrounding subsoil. Soil marks show up well in ploughed fields or areas where the topsoil has been stripped.

Survey Planned Enclosure
Survey Planned Enclosure (including Parliamentary enclosure) is characterised by regular, small and large, rectangular fields, with 'ruler straight' boundaries, and often contemporaneous tracks and roadways. Planned enclosure was undertaken by surveyors during the 18th and 19th centuries, and will have overlain any prior landscape enclosure pattern.

Sustainable urban drainage systems
(SUDS) A natural approach to managing drainage in and around properties and other developments. SUDS work by slowing and holding back the water that runs off from a site, allowing natural processes to break down pollutants.

Tithe and Enclosure Maps
19th century Tithe Maps represent the first strategic mapping survey of most of England and Wales. These maps were created as part of the Tithe Commutation Act of 1836; most were completed in the 1840s. As well as recording mid -19th century field systems they also provide details of land use and land ownership and occupation.

Toft
The place where a house stood or had once stood, often adjoining a garth or croft.

Veteran Tree
A tree which, because of its great age, size or condition, is of exceptional cultural, landscape or nature conservation value.

Designation checklist

Designated heritage assets
Details of nationally designated heritage assets can be found on the National Heritage List for England
Designated heritage assets mostly comprise of the following:

- Listed buildings which have been designated because of their special architectural or historic interest.

- Conservation Areas designated by local authorities, and generally covering settlements. Demolition of unlisted buildings in conservation areas requires planning permission, and a similar process of justification as for a listed building.

- Scheduled Monuments are archaeological sites considered to be of national importance. Consent must be sought from Historic England for any works affecting a Scheduled Monument.

- Registered Parks and Gardens, World Heritage Sites, and Registered Battlefields, are all landscapes considered to be of special historic interest. While no consents specific to these designations are required, conservation of these places is given 'great weight' in the planning process.

Undesignated heritage assets
Undesignated heritage assets are buildings, sites and landscapes, identified by local planning authorities as having value. Undesignated heritage assets may be, but are not always, recorded on the local Historic Environment Record.

- Local lists provide an opportunity for communities to have their views on local heritage considered. They can be used to identify significant local heritage assets, strengthening their role as a material consideration in the planning process.

- Sites of national archaeological significance. Where archaeological sites of national significance have not been scheduled, and they are of the same significance as scheduled monuments, they are

treated in the planning system as if they were designated assets (see NPPF paragraph 139).

- Areas of Outstanding Natural Beauty and National Parks. Within Worcestershire, the Malvern Hills and the Cotwolds are designated Areas of Outstanding Natural Beauty (AONB), for their special qualities or character. Conserving and enhancing the qualities of such landscapes are a material consideration in planning applications that are proposed, either within or adjacent to them. The Countryside and Rights of Way Act 2000 (CROW Act) places on local authorities a requirement to produce an AONB Management Plan and a 'duty of regard' to conserve and enhance AONBs (Section 85).

- Green Belt. The fundamental aim of Green Belt policy is to prevent urban sprawl, and new buildings are generally regarded as inappropriate. Exceptions are specified in NPPF paragraphs 79-92.

Wildlife, Habitat and Geology

- The Wildlife and Countryside Act (1981) is the principal law protecting wildlife, habitats and species in Great Britain, and was strengthened and updated by the Countryside and Rights of Way Act (2000). It is necessary to obtain expert advice when ascertaining if any protected species are present within or adjacent to a site.

- Sites of Special Scientific Interest (SSSI) are areas of land notified under the Wildlife and Countryside Act 1981 as being of special nature conservation interest.

- Sites of Importance to Nature Conservation (SINC) are sites of non-statutory designation recognised by local planning policies.

- Hedgerows Regulations 1997 are to protect important hedgerows from being grubbed-out.

- Regionally Important Geological and Geomorphological Sites (RIGS) are locally designated sites of local, national and regional importance for geodiversity. The significance of RIGS is a material consideration in determining an application.

Appendix 2

Landscape Character Assessment: Area case study

Elmley Castle and Netherton are located on the north side of Bredon Hill to the south east of Pershore, in the district of Wychavon.

Netherton

Free draining, fertile soils and a rolling topography, on the foothills of Bredon Hill, support a predominantly arable land use characterised by large, irregular fields, fragmented semi-natural habitats and little tree cover. A series of sinuous routeways (including an ancient salt way) link settlements with the landscape beyond. As a consequence of field amalgamation, hedgerow boundaries have been in decline since the early 20th century. Traditional orchard, associated with settlement, has also largely disappeared.

The small nucleated village of Netherton is the main settlement of the parish. Today it is comprised of just a handful of farms and cottages set along a through road which leads out to fields to the north, and Netherton Lane to the south.

The village retains a sense of intimacy with the facades of buildings and mature hedgerows restricting views; yet beyond the village, the landscape is more open and views more extensive.

Chapel Farm.
Photograph © Worcestershire Archive and Archaeology Service.

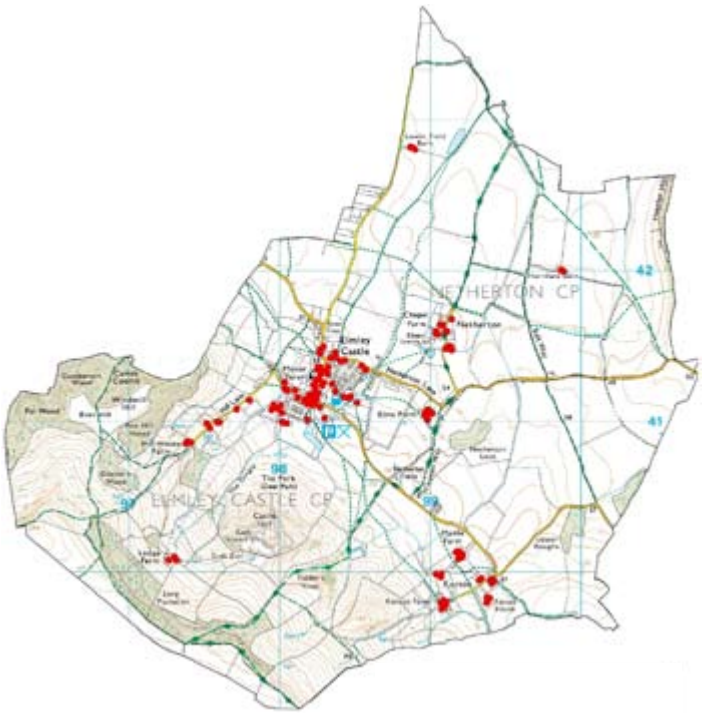

Photograph © Worcestershire Archive and Archaeology Service.

The dominating feature of the village is Chapel Farm. The farm was already large in scale before it was re-planned in the mid 19th century; then extended and remodelled again in the 20th century to showcase the wealth and standing of its then owners, the Steven's family. The towering grain silos, at both Chapel Farm and the outfarm to the north east, dominate views across much of the parish. The remains of an ornamental garden, with potential mature trees, is recognisable to the south of the farmhouse.

Archaeological evidence indicates that this agricultural landscape was farmed from at least the late prehistoric period and a series of isolated, late Iron Age and Romano-British farmsteads have been revealed as cropmarks within the parish. The remains of a 12th century chapel, which in 1738 was converted into a barn, survives to the east of the farmhouse at Chapel Farm. Earthworks associated with settlement and farming, south of Chapel Farm, indicate that, during the medieval period, the village was more densely populated than it is today; at least a dozen cottage sites have been traced as earthworks under permanent pasture.

Away from the village, settlement is sparse. A large scale, isolated farmstead (Elms Farm) to the south of the village has now been largely converted into residential dwellings, while two isolated outfarms, one with a set of large 20th century grain silos which echo those at Chapel Farm, remain in agricultural use.

Comparisons of modern with historic maps, (see page 49), indicate that settlement at Netherton has changed little, since the turn of the 20th century. In contrast, the Elmley Castle settlement has experienced far greater 20th century expansion which is concentrated in a planned estate to the east of the main street, away from the historic core of the village, which is a Conservation Area.

Netherton - Key Features

Landscape:

- Large scale, irregular fields, enclosed by hedgerow boundaries. Loss of boundaries over the 20th century as a consequence of field amalgamation.

- Little tree cover and fragmented semi-natural habitats.

- Loss of small-scale traditional orchard associated with settlement.

- Remnants of ornamental garden, with potential mature trees, to the south west of Chapel Farm.

- Netherton village retains a sense of intimacy with buildings and hedgerows restricting views of the landscape beyond. Views from Netherton Lane are also restricted by mature hedgerows.

- An extensive network of historic pathways, many of which are modern PRoWs, with open views across the landscape.

- Approximately 50% loss of farm ponds.

Settlement:

- Wayside settlement, concentrated in the small, nucleated village of Netherton. Dwellings are moderately spaced and the settlement has little depth with dwellings set close to the road within individual, generous sized plots, which back directly onto farmland.

- Chapel farmhouse is enclosed by a ha-ha within its own private space, and set away from the road, and from working areas of the farm, facing ornamental gardens to the south west. The remains of a 12th century chapel are adjacent to the farmhouse, within the private sphere of the garden. The 1st Edition Ordnance Survey map (1885) records a pathway, over fields, linking the farmhouse to Netherton Lane, in the south. The southern half of this pathway remains a PRoW. Views from Netherton Lane to the farmhouse are today obscured by mature hedgerows.

- Settlement beyond the village is limited to one large scale, regular planned, isolated farmstead, now largely converted to residential, and an adjacent 20th century dwelling, south of Netherton Lane.

- The farmhouse at Elm's Farm is slightly set away from the working area of the farm. It is enclosed by a wall thus creating its own private space, and faces away from the farm, out towards the open landscape to the south west.

Buildings:

- Chapel Farm retains a significant assemblage of traditional farm buildings dating from the 19th and 20th century, including two distinctive, 20th century grain silos. These along with a related pair of silos at Herrisfare, to the north east, dominate views from the surrounding landscape.

- Large 20th century agricultural sheds of corrugated iron.

- Large scale outfarms (Herrisfare and Rise) with surviving 19th and 20th century buildings.

- Buildings predominately constructed of brick, with tile roofs. Also some timber-framing on earlier dwellings (The Blizzards, The End Cottage) and use of local stone for plinths and boundary walls.

- Remains of 12th century chapel, constructed of local stone.

Elmley Castle

Elmley Castle is located on the northern slopes of Bredon Hill, (a Site of Special Scientific Interest) within the Cotswold Area of Outstanding Natural Beauty. Bredon Hill, an outlier of the Cotswold Hills, is composed of Jurassic, sedimentary rock. It supports a range of habitats with significant biodiversity, from ancient semi-natural woodland and parkland, to calcareous (limestone) 'unimproved' and neutral grassland, and calcareous scrub. Old quarry workings also support a number of locally uncommon plants. The north of the parish is characterised by a larger scale, cultivated landscape, with free draining, fertile soils. Semi-natural habitats are fragmented and tree cover is minimal.

The historic core of the village is a designated Conservation Area, that has witnessed little change over the past 200 years. It is characterised by a nucleated cluster of medium and large scale, regular farmsteads, with converted agricultural buildings, cottages and non-domestic buildings, which become more dispersed along Hill Lane, Netherton Lane and Mill Lane.

Despite being in the vale, Elmley Castle retains an intimate setting, largely enclosed from the wider landscape by its tight cluster of timber-framed and brick dwellings. Mature vegetation, wide grass verges, the mill pond and the trickling sound of the stream bestow a sense of tranquility to the village. The village displays a strong, significant continuity of high-status settlement, from the prehistoric period right through to the 19th century.

Settlement within the historic core is generally only one house deep with buildings facing inwards towards the road, and backing onto meadow, orchard, and later allotment gardens to the rear.
Photograph © Worcestershire Archive and Archaeology Service.

The Village Hall, Queen Elizabeth I Public House, Plough Inn, Elmley Castle C of E First School, and the post office, all form an important assemblage of buildings within the core, with significant communal value.
Photograph right © Worcestershire Archive and Archaeology Service.

The Scheduled Monument of 'Elmley Castle' is interpreted as the remains of a medieval ringwork and bailey, located within two Iron Age hillforts. This monument dominates a prominent spur on the northern slopes of Bredon Hill, to the south west of the village, and commands wide views over the surrounding countryside. In contrast, views towards the monument, from the village, are more restricted.

Views towards Elmley Castle are restricted with only dwellings along part of Hill Lane having unrestricted views to the south west.
Photograph © Worcestershire Archive and Archaeology Service.

The 11th century church of St. Mary the Virgin is enclosed within its own ecclesiastical space and encircled by a dry stone wall. It dominates the southern periphery of the village and retains views to Elmley Castle and the 'medieval' deerpark, which runs from the southern edge of the village to the remains of the castle. The deerpark is a Site of Special Scientific Interest and site of National Significance considered for scheduling.

A large Elizabethan House is recorded on historic mapping, to the south west of the Church. 'Park House', which like the church would have enjoyed privileged views of the park and castle site, was demolished in the early 1960s to make way for the construction of the Parkland Estate. The remains of a ha-ha define the boundary between the site of the house and the deerpark.

The children's playing field, in Elmley Castle, dedicated in 1929 in loving memory of Ernst Victor Stevens of Chapel Farm, Netherton, reflects changing social attitudes to health, welfare and children during the early 20th century and is an early example of a recreational area dedicated to children. Photograph © Worcestershire Archive and Archaeology Service.

The Parkland Estate is comprised of detached, executive houses, set within generous sized plots and constructed of a grey/brown brick, similar in colour to the stone rubble of the church. Within the estate there is established greenery; much of which is a relic of the formal garden associated with the earlier house. This small estate shares many characteristics with earlier generations of suburban 'garden' estates, despite its moderne 1960s architecture and smaller plots of land.
Photograph © Worcestershire Archive and Archaeology Service.

The majority of 20th century development is concentrated, in a planned estate, to the east of the historic core, in-between Mill Lane (to the south) and Netherton Lane (to the north). The estate has continued to grow throughout the course of the 20th and 21st centuries and has a mixture of former local authority housing, and post 1970s private developments, which are increasingly influenced by more vernacular styles. The estate now extends to the brook to the east, and the boundaries of Elmley Castle C of E First School to the west, with the most recent houses adjacent to, and influenced by, The Old Mill House.

Outside of the main village, settlement is confined to the small nucleated hamlet of Kersoe, known as Criddesho, during the Anglo-Saxon period. Kersoe is comprised of a cluster of dwellings, including a number of large scale traditional farmsteads. Ridge and furrow survives in earthwork form, indicating how, from the medieval period, the land around settlement was open and communally farmed.

Protected and notable species in the locality include, the great crested newt, the common lizard and slow-worm, the lesser horseshoe bat, badgers and brown hares, and the red kite.

The village has also experienced some small scale development on its northern periphery, and infill development along Hill Lane, Mill Lane and Netherton Lane.
Photograph © Worcestershire Archive and Archaeology Service.

Former local authority housing with its simple, standardised design and generous sized plots, is becoming increasingly sought after.
Photograph © Worcestershire Archive and Archaeology Service.

Elmley Castle - Key Features

Landscape:

- Located within the Cotswold Area of Outstanding Natural Beauty.
- Located on the northern slopes of Bredon Hill (a Site of Special Scientific Interest) and overlooked by the Scheduled Monument 'Elmley Castle'.
- Views towards 'Elmley Castle' are restricted.
- Mosaic of habitats with high biodiversity, cultural and historic interest.
- Mature vegetation, wide grass verges and standing and running water bodies bestow a sense of tranquility to the village.
- More intensively farmed landscape to the north of the village with amalgamated field pattern and fragmented semi-natural habitats.
- Loss of small-scale traditional orchard associated with settlement.
- Well established network of historic pathways, many of which are modern PRoWs.
- Archaeology associated with high status settlement and medieval farming.

Settlement:

- Continuity of high-status settlement from the prehistoric period to the 19th century.
- An inherited nucleated settlement pattern with traditional farmsteads, cottages and non-domestic buildings concentrated within core settlements.
- Settlement in the historic core of Elmley Castle is linear with minimal depth. Buildings face inwards towards the main thoroughfare and back onto farmland. Settlement becomes more scattered on the boundaries of the village but retains its linear, wayside character.
- 20th century development is dominated by a planned estate, with a mixture of detached, semi-detached, bungalows and two-storey flats, east of the historic core. There has been limited modern expansion to the north of the historic core and east of the church (Parkhall Estate). There is some modern infill on the periphery of the village where settlement was historically more scattered.

- An intimate setting, with buildings and hedgerows restricting more wide-ranging views.

- Communal buildings and spaces, including the children's playing field, school, church, village hall, public house and post office, with high significance.

Buildings:

- Large scale traditional farmsteads located within core settlements.

- Earlier buildings are timber-framed or stone. Thatch is a feature of many older properties. Later buildings predominately of red brick and tile.

- 20th century development set within smaller plots, with less emphasis placed on green space the later the development.

- Mixture of former local authority housing and private development.
- Mixture of detached, semi-detached, bungalows and two-storey flats.

- 20th century infill, characterised by executive style detached houses in areas with historically more scattered settlement.

- The Parkland Estate shares characteristics with earlier generations of suburban 'garden' estates, despite its moderne 1960s architecture and smaller plots of land.

Appendix 3

Examples of policies from Neighbourhood Plans

(also see Reading List)

Chaddesley Corbett Neighbourhood Plan 2014 – 2026 (2014)
Policy - Landscape Design Principles

In order to be considered favourably all new development proposals will need to satisfy the following landscape design principles:

1. The pattern of open spaces surrounding settlements should be retained in any future developments. Of particular importance is the open space either side of Hockley Brook between Stewards Cottage (Briar Hill) and Hemming Way. The additional and important open spaces identified in the Chaddesley Corbett Conservation Area Character Appraisal are particularly significant (see Map 3 below).

2. Strategic views across the Parish shown on Map 5 in Appendix III and the Proposals Map, and defined below, will be protected by ensuring that the visual impact of development on these views is carefully controlled.
The views are:
(i) The view across the Parish looking towards St Cassian's Church 62 spire and Harvington from the edge of Chaddesley Woods and footpath 640.
(ii) The view of the Conservation Area of Harvington Hall and its environs from Harvington Hall Lane and footpaths 614 and 615.
(iii) The views east from footpath 620 across fields towards Chaddesley Village.
(iv) The view of Barrow Hill from footpath 599 at Tanwood Lane.
(v) The views towards Chaddesley Corbett and St Cassian's Church spire across fields, trees and hedgerows from footpath 599 at Tanwood Lane.
(vi) The view of the medieval fishponds looking towards Brockencote from footpath 674 in St Cassian's churchyard and the view into the Conservation Area looking towards St Cassian's church from the pavement alongside the A448.

3. Development proposals should seek to preserve or enhance the character of the village and hamlets both within and outside the Conservation Areas, especially those with buildings dating from the nineteenth and early twentieth century. The demolition of buildings and structures that contribute to the character and appearance of these areas including those identified in the proposed Local Heritage List will be resisted.

4. Local habitats and wildlife biodiversity particularly relating to Chaddesley Woods NNR should be preserved. Linking wildlife corridors, including brooks and watercourses, should be enhanced.

5. Minimal and discreet signage will be supported to promote compliance with rules and regulations in respect of access to paths for walkers and the control of dogs and horses.

6. Mature and established trees of amenity value should be protected and incorporated into landscaping schemes wherever possible. The planting of local species will be encouraged. Species should be appropriate to the location and setting in terms of type, height, density and the need for ongoing management. When constructing boundaries native tree species should be used in preference to building walls or the planting of "Leylandii / conifer". Existing hedgerows should be retained and the establishment of new native hedges is encouraged.

Marchington Neighbourhood Plan (March 2016)
Policy BE1 Protecting and enhancing local historic character (objective 3)

1. Built development in and around Marchington village must protect, complement or enhance, the historic rural character of the settlement and its hinterland, which is identified in the Marchington Character Study and the Marchington Conservation Area Appraisal. Applicants must explain in a Design and Access Statement or Heritage Statement, how the proposed development will protect, complement or enhance the historic rural setting of the Parish, including the Conservation Area and Listed Buildings, with regard to:
a) the scale and form of the development,
b) the density of the development,
c) the materials used in the development, and
d) elevated views of Marchington village and its landscape setting (shown on the Proposals Map).

2. All new development involving Historic Farmsteads and their setting will be required to demonstrate that there will be no adverse impact on the built and landscape character of the location.

3. All new development affecting the setting of Sudbury Hall, Registered Parkland, Conservation Area and associated heritage assets (see Proposals Map) will be required to demonstrate that the setting of Sudbury, including longer views, will not be adversely affected.'

Policy BE2 Protecting and enhancing (non-designated) local built heritage assets (objective 3)

All development proposals will be required to take into account the character, context and setting of the local built heritage assets (see Appendix 1) including important views towards and from the assets. Development will be required to be designed appropriately, taking account of local styles, materials and detail. The loss of, or substantial harm to a locally important asset will be resisted, unless exceptional circumstance can be demonstrated.

Policy NE1 Protecting the Countryside and Landscape (objective 3)

Any proposals for development in the rural areas should recognise and seek to protect and enhance the historic landscape and local character of the Parish. Field patterns and elements of the landscape heritage of the area, including ridge and furrow, field ponds, mature trees and historic hedgerows should be protected and incorporated into any landscape design schemes and their long term maintenance ensured.

Proposals for development should include consideration of the above factors through an appropriate landscape analysis either as a freestanding report or as part of a design and access statement.

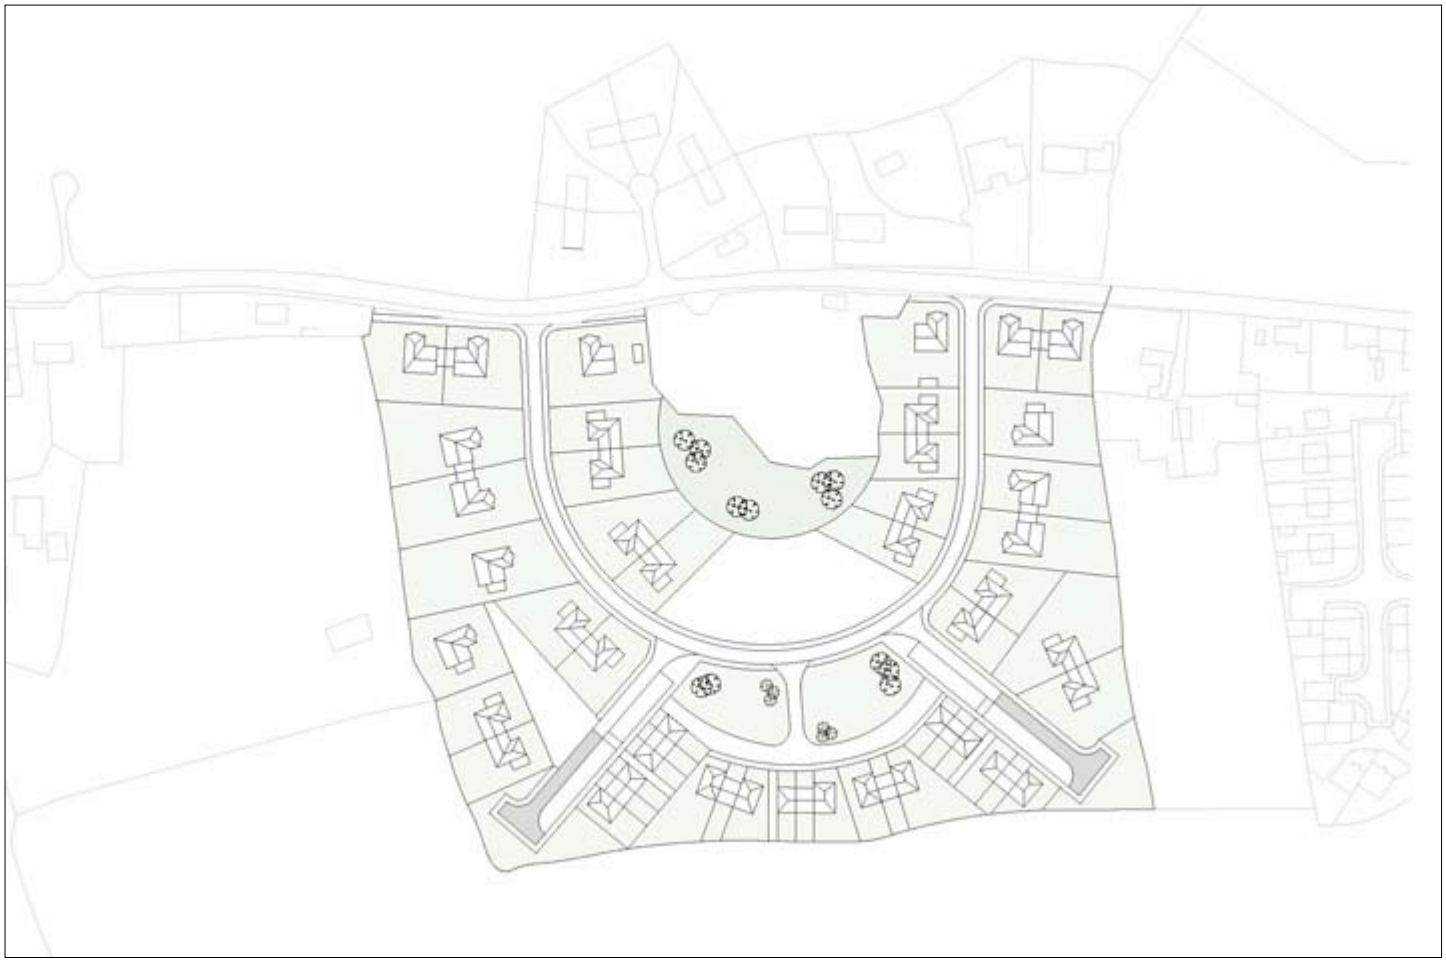

Appendix 4

Assessing development proposals: A hypothetical case study

The development proposal below is hypothetical, yet typical of the type and scale of planning application, that is increasingly likely for residential development in rural areas, particularly in and around villages.

Proposal

Outline application for the erection of 50 residential dwellings (40% affordable housing) with vehicular access, parking provision and landscaping works.

Masterplan of the hypothetical, proposed residential development.
© Worcestershire Archive and Archaeology Service.

Front elevations of detached and semi-detached properties, from the hypothetical, proposed residential development.
© Worcestershire Archive and Archaeology Service

Front elevations of terraced properties, from the hypothetical, proposed residential development.
© Worcestershire Archive and Archaeology Service.

Landscape Character Assessment

The physical landscape is characterised by a low lying, rolling topography comprised of mixed mudstones and sandstones with free draining soils that have support mixed farming with scattered farmsteads and other wayside dwellings that have occasionally clustered together. During the 20th century in-fill development has created a less scattered settlement character together with a diverse mixture of housing styles. Small scale enclosure survives in places but overall the irregular and sub regular fields, characteristic of the area, are large in scale as a consequence of 20th century field amalgamation. Small blocks of ancient semi-natural woodland and relic orchard, associated with settlement, are also a feature of the area. More recently horticulture and recreation, in particular a nursery and a golf course, has had an increasing impact on the landscape.

Where development is going to occur?

The linear settlement along this road retains its dispersed, intimate, wayside feel despite 20th century infill, along the main routeway and the development of a larger scale, 20th century block south of the road. Historic properties are set close to, and face the road, while more recent, wayside development is set back within their plots and often hidden from view by mature hedgerow or walled boundaries. Development along the main routeway is only a single house deep, with plots backing directly onto farmland beyond and relic orchard dominating the spaces in-between buildings. The open countryside and Malvern Hills dominate views to the south west, at the eastern end of the road, gradually becoming more filtered as you move westwards. Housing is diverse with a mixture of public and private development of two-storey detached, semi-detached and terraced houses and bungalows. Pre 20th century properties are predominately constructed of brick and tile with timber-framing restricted to the oldest properties.

Example policies from which to test the development:

- In parts of the parish where the dispersed historic wayside character is still coherent, with older houses relating to historic open space, this should be protected and conserved by setting new development back from the routeway.

- The design of new buildings can follow the diverse architectural style that characterises the settlement but should respect and conserve the form, scale and building line which allows the historic open space to be appreciated.

- New development should conserve and enhance the way that new and historic houses are seen at the interface between the settlement and the farmed landscape.

- Developments that adopt Green Infrastructure approach in landscaping and design will be viewed favourably, where enhancement and multi-functionality are evident within the Masterplan.
